
Вы меня простите, текста много. И фото немного идут впереди, но это коронавирус все меняет планы. Вообщем полёт под яблочным соком прошёл на ура в принципе, контент хороший, полёт быстрый, 400 людей практически все места раскуплены. Визового режима в штатах усиленного 0 - всё как обычно, раздают коронавирусные брошурки, весь персонал в масках, собаки как обычно ходят нюхают наркоту, офицеры принимают решение о запуске в страну в течении минуты. Аэропорт в целом похож на зомбиленд. Долго на старых мигах велись споры, что же лучше - позволить себе бизнес-перелёт, или же хороший отель? Всегда склонялся к тому, что нужно себе позволить ВСЁ. Но сейчас, когда некоторые бизнес-классы представляют собой унылое гавно, как никогда актуален становится сервис от Сержика, который предоставил размещение в самом крутейшем отеле Чикаго - Trump Tower. Причём номер был готов за неделю до заселения. На секундочку, номер такой категории в кассе - около 120 000 рябчиков на 2 дня с налогами. Как тут не обратиться.

стоит ли говорить, что благодаря прекрасной работе мастера, который, кажется, не устаёт совершенствоваться, меня при заселении тут же обслужили по полной. Предоставили максимально поздний выезд в 15:00 вместо 12:00, дали переходников, обеспечили прекрасный room service, красоту и качество номера Вы можете оценить на фото сверху. Ни вопросика, ничегошеньки не возникло в процессе. Заселялся я около 21:00 по Чикагскому, в местах обитания Сержиков я подозреваю это было ориентировочно 5 утра. Несмотря ни на что, меня сопроводили вплоть до успешного плюха в кровать. Высший пилотаж!

Не смог удержаться и не поехать за-тестдрайвить новый аппарат в семью, разницу между старым можете посмотреть воочию)

ALPHA
LOCKER

ABOUT

Alpha locker is written in C #. It has a minimum weight to 50kb. It encrypts all drives connected in the PC. Encrypted files if the PC has been switched off, when switched on again. The unique key for each machine. Large encrypted list of extensions that can be refilled if desired. Decryptor files allows selective dekript a single file or an entire folder, which significantly increases the chance to restore the encrypted data. Admin with statistics and general information. The ability to add or remove features on the request of the buyer. Script Database automatic backup, which has flexible settings, which allow to make timely backups. Communication for the decryptor via e-mail.

Мей? 11:18

привет edited 14:25

Я немного стремаюсь за всё это 14:27

В плане чарджа 14:27

Это оч некрасиво с моей стороны 14:27

Но можно я заплачу по факту получения в укре? 14:27

Готов за больший процент забрать 14:28

Бро, ну договаривались по прибытию пака же 15:27

Не будет чарджа 15:27

Боч сказал же 15:27

Dron Baron
Не будет чарджа
Ты уверен? 15:27

Оправляй и все 15:27

Тебе чардж пришёл на твой мист? 15:28

Пак на посреде, как по условиям было
Если его не дкржать там 2 месяца но все ок 15:28

Нет 15:28

Я бил saboskirt 15:28

2 мес назад 15:28

И акк не в локе 15:28

Анталия, Сентябрь, 2020

СПАСИБО Serggik00&Ko !!!

В очередной раз отправился в отпуск благодаря команде Serggik00. На самом деле, каждый раз об этом пишу, но не перестаю снова и снова удивляться профессиональной и корректной работе этих ребят. Сам много лет работаю в топ-менеджменте и прекрасно понимаю какой должен быть уровень профессионала, исполняющего твои заказы, просьбы, пожелания. И как же приятно, когда данный сервис может продемонстрировать очень высокий уровень предоставления своих услуг. Это большая редкость во многих видах деятельности. Оперативное, четкое и корректное выполнение работы, которая сопровождается от начала и до конца отпуска. И самое важное, что эти ребята постоянно на связи. Я не припомню, чтобы я ждал ответа на свой вопрос дольше пары минут. Могу сказать только - Браво!!! Даже не задумывайтесь стоит ли работать с этими ребятами. За 5-6 лет со многими поработал, но никто даже близко не стоит по уровню компетентности. И уверяю, это самый честный отзыв.

Spirituosenempfehlung
Monthly proposal

Ron Esclavo Solera, Ron Dominicana, 1423 ApS, Dominikanische Republik

Grundlage dieses Rums, der mit seinem Namen den Sklaven der Zuckerrohrplantagen Tribut zollt, sind ausschließlich Destillate aus der Dominikanischen Republik. Typisch für diesen Solera-Rum ist seine Bernsteinfarbe sowie sein opulenter Charakter, Aromen von Rumtopffrüchten und milden Gewürzen.

The name of this rum pays tribute to the slaves in the sugar cane plantations. It is based entirely on spirits from the Dominican Republic. As a solera rum its amber colour and opulent character are typical, as are its aromas of „Rumtopf" (fruit marinated in rum) and mild spices.

Spirituosen
Spirits

Jack Daniel's Tennessee Whiskey Old No. 7

Johnnie Walker Blue Label

The Singleton, Single Malt Scotch Whisky of Glendullan, 12 Years old

Hendrick's Gin

Grey Goose Vodka

Cognac Rémy Martin CM 28

Walcher Williams Exclusiv

Etter Zuger Kirsch

Jägermeister

Speziell auf Flügen von und nach Mexiko: Tequila Patrón Añejo

Exclusively on flights to and from Mexico: Tequila Patrón Añejo

Алкогольное меню очень пострадало во время пандемии, но всё же упиваться Blue Label всё еще возможно (по 160 Евро за бутыль)

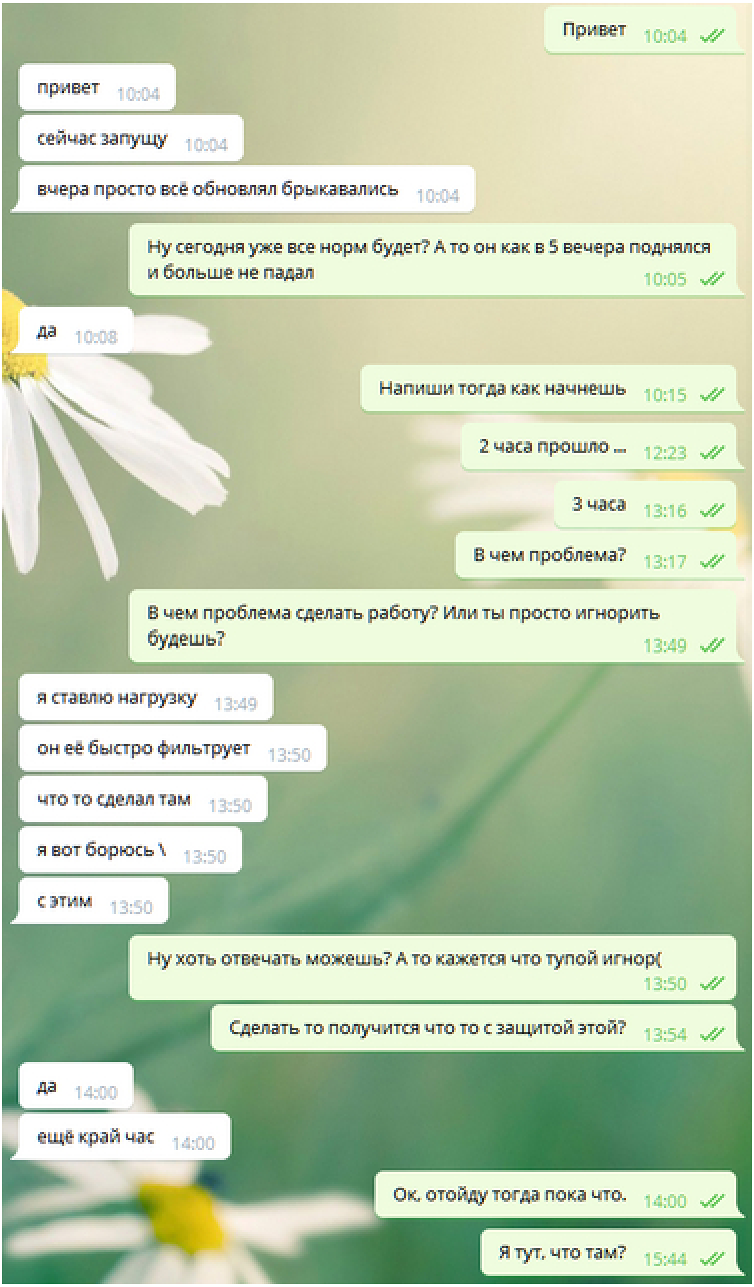
Вот такой вот буфетик. Напомню, лаунж на то и нужен, что там для участников всё абсолютно бесплатно круглый день, и виски и вино и жратва, но жратву некоторые лаунжы зажимают, а арабские лаунжы зажимают совершенно всё (и бухло ессно тоже)

10164



Привет 10:04

привет 10:04

сейчас запущу 10:04

вчера просто всё обновлял брыкались 10:04

Ну сегодня уже все норм будет? А то он как в 5 вечера поднялся и больше не падал 10:05

да 10:08

Напиши тогда как начнешь 10:15

2 часа прошло ... 12:23

3 часа 13:16

В чем проблема? 13:17

В чем проблема сделать работу? Или ты просто игнорить будешь? 13:49

я ставлю нагрузку 13:49

он её быстро фильтрует 13:50

что то сделал там 13:50

я вот борюсь \ 13:50

с этим 13:50

Ну хоть отвечать можешь? А то кажется что тупой игнор(13:50

Сделать то получится что то с защитой этой? 13:54

да 14:00

ещё край час 14:00

Ок. отойду тогда пока что. 14:00

Я тут, что там? 15:44

10165

Наконец то дошли руки написать отзыв! Начну с истории, с Сержиком наши взаимоотношения развивались ни один год, побывали в Доминикане и Финляндии с его помощью. Поэтому, когда встал вопрос о бюджетном отдыхе нашей семьи из 4 человек, сомнений не было. Учитывая ограниченный выбор направлений, осенние каникулы решили провести в Турции. К сожалению цена пакетного отдыха у туроператоров зашкаливала, но дети (и взрослые тоже) безумно хотели к морю. По итогу удалось поймать бюджетные билеты на 4-х за 68 тр на 12 дней и с этого момента буквально закипела двусторонняя работа: естественно, хотелось пожить в премиум отелях и иметь подогреваемые бассейны в ноябрьский сезон. Сложность и не бюджетность размещения в отелях заключалась в большом возрасте детей, которые старше 11 и много где уже рассчитывались как взрослые. Кроме того, дети хотели иметь свою отдельную комнату, что подпадало исключительно под Familie Room. По русской привычке - хотелось бриллиантов за даром) Забегая вперёд можно констатировать, что если хочешь дорого и богато все равно не получится за три копейки, но в результате с Сержиком все вышло минимум на 100 тр дешевле, чем позиции у туроператоров. Мы не любим сидеть на одном месте и поэтому в плане кроме проживания у нас был запланирована встреча с друзьями в Белеке, путешествие на Памуккале, самостоятельное посещение храма св. Николая, а также шоппинг. В результате при постоянной поддержке Сержика (очень важно, что при поздних заселениях он всегда был на связи) мы побывали в трёх отелях: Дельфин империал, Лара Барут в Анталии и Алва Дона в Белеке. Никаких проблем и накладок в ходе размещения не возникло, сработано быстро, четко и профессионально. Все наши «хотелки» были реализованы! От всей нашей семьи Сержику желаем здоровья в это сложное время и стабильности, поскольку имеем планы на отдых)

к вечеру 7:28

Нужно сейчас 7:28

часа 3 не раньше 7:28

Клиент ждёт 😬саппорт забухал 7:28

А заказ отдавать надо 7:28

ща кош дам 7:28

и сумму 7:29

закидывай 7:29

начну 7:29

через час 7:29

Как будет готово кину 7:29

не 7:29

Это я ,сержик 7:29

половину хоть 7:29

сейчас 7:29

для порядка 7:29

вдруг тебя машина собьет насмерть 7:29

и ты не оплатишь 7:29

всякое бывет 7:29

Не переживай ,я закину всю сумму как бронь получу
Не собьёт
7:29

Не переживай 7:30

> @serggik00 [Avia/Hotels/Cars]
> Не переживай ,я закину всю сумму как бронь пол...

бро, от тебя это не зависит, все может быть 7:30

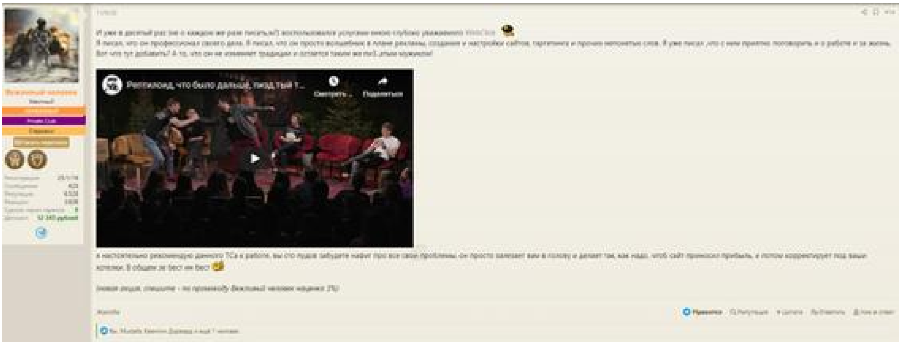
Serggik00 лучший в своём деле и надежный !!! Спасибо за отдых 😎🤙🤘



Вежливый человек

И уже в десятый раз (не о каждом же разе писать,ю?) воспользовался услугами моего глубоко уважаемого [illegible]

Я писал, что он профессионал своего дела. Я писал, что он просто волшебник в плане рекламы, создания и настройки сайтов, таргетинга и прочих непонятных слов. Я уже писал ,что с ним приятно поговорить и о работе и за жизнь. Вот что тут добавить? А то, что он не изменяет традициям и остается таким же пиз3.атым кужжулем!

Рептилоид, что было дальше, пизд тый т...

Поделиться

я настоятельно рекомендую данного ТСа к работе, вы сто пудов забудете нафиг про все свои проблемы. он просто залезает вам в голову и делает так, как надо, чтоб сайт приносил прибыль, и потом корректирует под ваши хотелки. В общем зе бест ин бест 😎

(новая акция, спешите - по промокоду Вежливый человек [illegible] 3%)

Пару слов о первом классе - бесконечный интернет, всё та же опостылевшая (хаха) чёрная икра под Grey Goose, пару литров Blue Label, ну и старание команды, этого не отнять.

Икорка баклажанная под Грей Гуз!

Территория отеля, делится с частными виллами.

пару дней выдались прямо совсем дождливыми. Под виски безлимит мы в принципе купались, но комфортно полежать на берегу было практически невозможно. Пришлось поехать на экскурсию в город и посетить местный спа.

Всем добра!

Отпишусь и я в теме. С помощью Serggik00 путешествовал уже не первый раз, и как и прежде высокое качество сопровождения и сервиса!

В это путешествие были в Турции, регион Фетхие, хорошая пятерка на берегу Эгейского моречка.

Гостиница оправдала все ожидания, Serggik00 и его команда всегда были на связи и заботливо сопроводили все 10 дней нашего отдыха!

Чекаут прошел без сучка и задоринки, все как по часам.
Спасибо за отдых! И до скорой встречи снова!

```
Test modes:
  -H                slow headers a.k.a. Slowloris (default)
  -B                slow body a.k.a R-U-Dead-Yet
  -R                range attack a.k.a Apache killer
  -X                slow read a.k.a Slow Read

Reporting options:

  -g                generate statistics with socket state changes (off)
  -o file_prefix    save statistics output in file.html and file.csv (-g required)
  -v level          verbosity level 0-4: Fatal, Info, Error, Warning, Debug

General options:

  -c connections    target number of connections (50)
  -i seconds        interval between followup data in seconds (10)
  -l seconds        target test length in seconds (240)
  -r rate           connections per seconds (50)
  -s bytes          value of Content-Length header if needed (4096)
  -t verb           verb to use in request, default to GET for
                    slow headers and response and to POST for slow body
  -u URL            absolute URL of target (http://localhost/)
  -x bytes          max length of each randomized name/value pair of
                    followup data per tick, e.g. -x 2 generates
                    X-xx: xx for header or &xx=xx for body, where x
                    is random character (32)
  -f content-type   value of Content-type header (application/x-www-form-urlencoded)
  -m accept         value of Accept header (text/html;q=0.9,text/plain;q=0.8,image/png,*/*;q=0.5)

Probe/Proxy options:

  -d host:port      all traffic directed through HTTP proxy at host:port (off)
  -e host:port      probe traffic directed through HTTP proxy at host:port (off)
  -p seconds        timeout to wait for HTTP response on probe connection,
                    after which server is considered inaccessible (5)

Range attack specific options:

SOMBERKNAVE

ANT Product Data

(TS//SI//REL) SOMBERKNAVE is Windows XP wireless software implant that provides covert internet connectivity for isolated targets.

08/05/08

(TS//SI//REL) SOMBERKNAVE is a software implant that surreptitiously routes TCP traffic from a designated process to a secondary network via an unused embedded 802.11 network device. If an Internet-connected wireless Access Point is present, SOMBERKNAVE can be used to allow OLYMPUS or VALIDATOR to "call home" via 802.11 from an air-gapped target computer. If the 802.11 interface is in use by the target, SOMBERKNAVE will not attempt to transmit.

(TS//SI//REL) Operationally, VALIDATOR initiates a call home. SOMBERKNAVE triggers from the named event and tries to associate with an access point. If connection is successful, data is sent over 802.11 to the ROC. VALIDATOR receives instructions, downloads OLYMPUS, then disassociates and gives up control of the 802.11 hardware. OLYMPUS will then be able to communicate with the ROC via SOMBERKNAVE, as long as there is an available access point.

Status: Available – Fall 2008

MAESTRO-II

ANT Product Data

08/05/08

(TS//SI//REL) MAESTRO-II is a miniaturized digital core packaged in a Multi-Chip Module (MCM) to be used in implants with size constraining concealments.

(TS//SI//REL) MAESTRO-II uses the TAO standard implant architecture. The architecture provides a robust, reconfigurable, standard digital platform resulting in a dramatic performance improvement over the obsolete HC12 microcontroller based designs. A development Printed Circuit Board (PCB) using packaged parts has been developed and is available as the standard platform. The MAESTRO-II Multi-Chip-Module (MCM) contains an ARM7 microcontroller, FPGA, Flash and SDRAM memories.

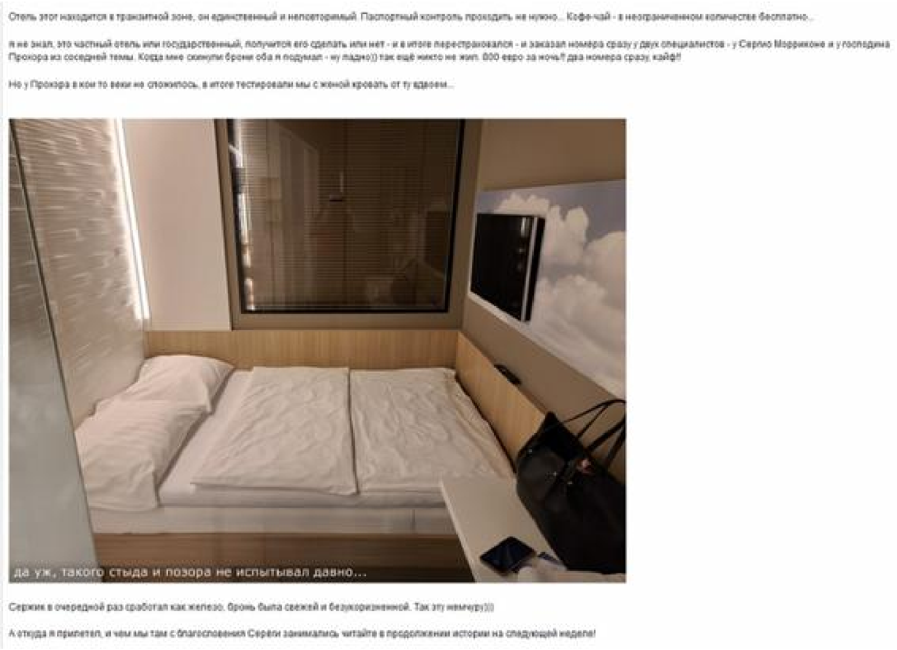
Кому то очень удобно в кровати))

10305

Ещё чуток лаунжа



Отель этот находится в транзитной зоне, он единственный и неповторимый. Паспортный контроль проходить не нужно... Кофе-чай - в неограниченном количестве бесплатно...

я не знал, это частный отель или государственный, получится его сделать или нет - и в итоге перестраховался - и заказал номера сразу у двух специалистов - у Сергио Морриконе и у господина Прохора из соседней темы. Когда мне скинули брони оба я подумал - ну ладно)) так ещё никто не жил. 800 евро за ночь!! два номера сразу, кайф!!

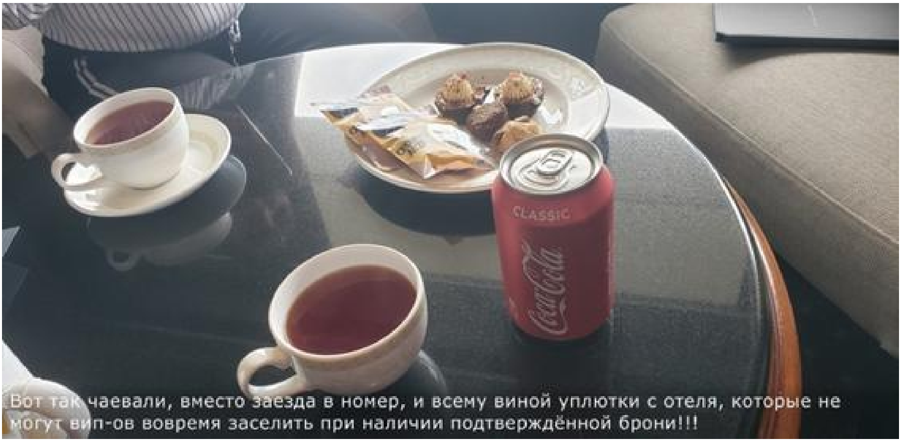
Но у Прохора в кои то веки не сложилось, в итоге тестировали мы с женой кровать от ту вдвоем...

да уж, такого стыда и позора не испытывал давно...

Сержик в очередной раз сработал как железо, бронь была свежей и безукоризненной. Так эту немчуру)))

А откуда я прилетел, и чем мы там с благословения Серёги занимались читайте в продолжении истории на следующей неделе!

10306



CLASSIC
Coca-Cola

Вот так чаевали, вместо заезда в номер, и всему виной уплютки с отеля, которые не могут вип-ов вовремя заселить при наличии подтверждённой брони!!!

Пару слов о мексиканцах 😛) Это ребята, которые даже из рутинного хождения в туалет могут сделать проблему, если стоит задача сложнее по типу - выдать арендную машину, то вешайтесь
то брони нет, то бланков нет, то бензина нет итд. Процесс получения автомобиля растянулся на 2+ часа. Кстати, Серж сделает Вам ЛЮБОЙ авто,
даже самый элитный, как огромную Секвойю (для Мехико то) , только если его сдавать в том же месте, где и брали, иначе Мексика требует оплату на месте.

Bill Payment
Overnight Checks℠
Account Transfers
Wire Transfers
Chase QuickPay℠

Chase Person to Person
QuickPay℠

NEW

With just an email address, you can send money to your friends online or by mobile phone.
It's convenient. It's simple. It's free.

Pay a friend for an IOU or send money to your kid at school without mailing cash or checks.

Send money from almost anywhere. Simply log on to Chase Online or Chase Mobile®, and enter your recipient's email address. We'll send that recipient an email to set up a person to person payment which he or she can do by enrolling in Chase QuickPay. Once you're both enrolled, you can send money back and forth.

- **It's FREE!** And you'll save a check and a stamp.
- **It's convenient.** No need to wait for a check in the mail or cash in hand. Everything is done online or through your mobile phone.
- **It's simple.** Only one person needs a Chase checking account.
- **It's secure.** You won't see your recipient's account details and vice versa.

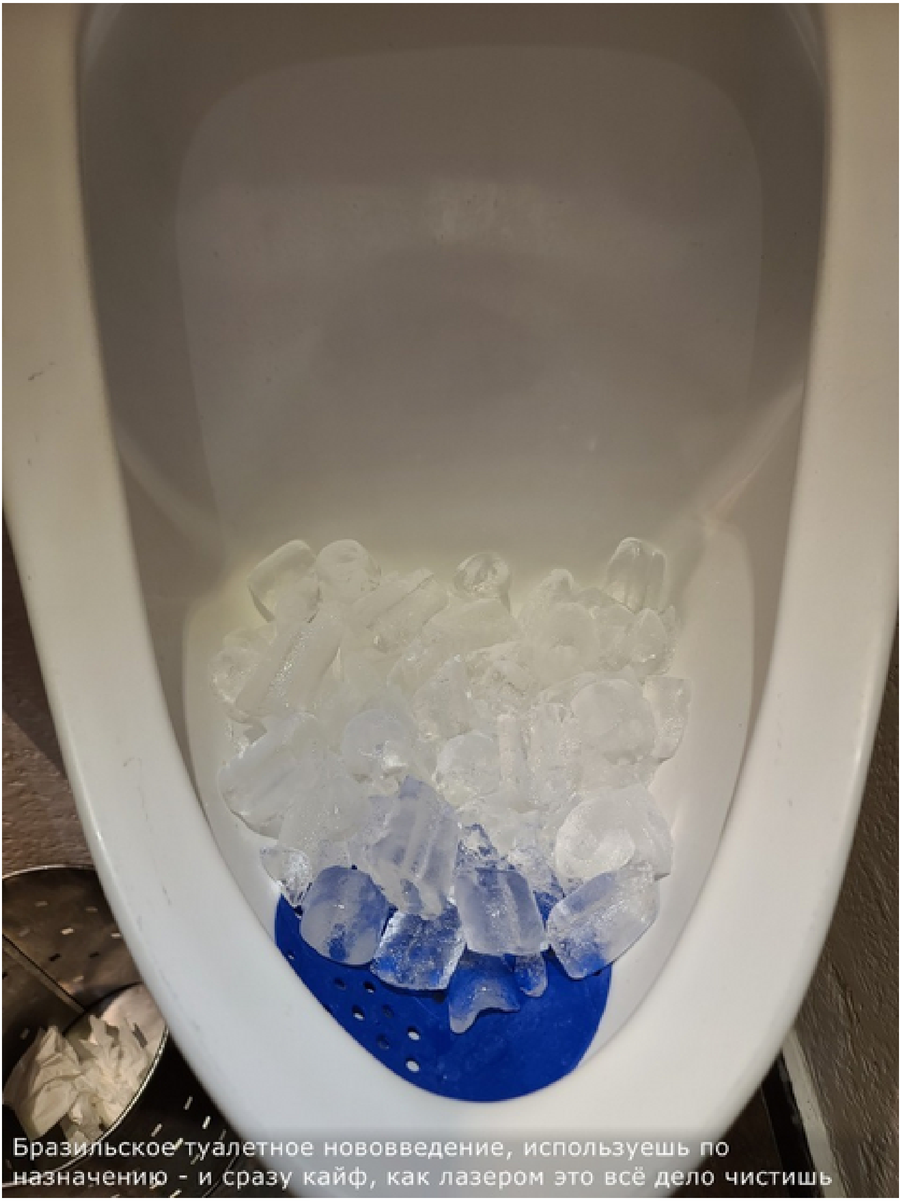
У меня было пару дней на шопинг и всякие изыски в перерывах между интенсивным пьянством. На экскурсии не ходил, ибо я в Чикаго уже раз бой)) хака. Но зато попал на премьеру нового Cadillac Escalade, у которого, как оказалось, новый GLS и иже с ним украли центральную панель на всю ивановскую. Очень зачётный автомобиль, сделал пару кружков и обязательно приобрету, как появится Platinum версия, пока таковой не наблюдается.

С таким краном ванная заполняется до минуты, вода льётся как из ниагарского водопада

10344



Бразильское туалетное нововведение, используешь по назначению - и сразу кайф, как лазером это всё дело чистишь

400 евро!!! за 10 м2!! пробыть 12 часов максимум можно!!!

400 евро!!! из которых 30 евро платишь, за то, что на этих 10 м2 с тобой ещё кто-то (двойное размещение) и 20 евро платишь за окошко блять!!!

бывают случаи, когда мне малость жалко отель и персонал, что мы как бы не совсем честно туда заехали)) Но в этом случае, я бы жил по схеме в этом отеле каждый день, без всякого зазрения совести.

Мудаки немцы пользуясь монопольным положением на рынке на сверх-мелкой площади открыли предприятие... На 700 м2 разместили - 60 !! ШЕСТЬДЕСЯТ, КАРЛ!!! номеров по 10 м2 каждый без исключения.

ДА уж, после этого кухни-студии покажутся путинскими дворцами!

I am not a thief of deals with p...
Bro u think I verify for free? 12:32

You might be a while in altenen 12:32

But not in other chats 12:33

I am honest with people not with banks 12:32 ✓

I'm a big boss from UK brudda 12:32

I do this shit 13 years 12:32

So if u want ur shit verified pay now 12:33

Create a verified paxul account and when you send me a photo I pay you 12:34 ✓

Jerry lane
Foto
I only sell this right now 12:36

And it's fully verified 12:36

+ balance 12:36

ok 12:49 ✓

they are fresh I bought them yesterday 12:51 ✓

Yes you're psn card Was live 12:53

But bro i exchanged that and got 5$ of it 12:55

I can't sell u the paxfull for 5$ 12:55

Or for 10€ 12:55

U understand brother? 12:55

10+5 12:56 ✓

40+20 12:57 ✓

Then 40 12:57

So that means u remaining payment is 30€ psn card 12:57

2That's why i said 2 after 2 12:58 ✓

Then send now the 2nd one 12:58

If check how much pop out 12:58

If it's good i will send u the account directly 12:58

U have to understand bro 12:58

Бразилия - огромнейшая страна, с населением более 200 млн человек!! она раскинулась на половину Латинской Америки, всё по джунглям та по горам. Ну и кстати одна страна из списка направлений, куда летает Люфтганза первым классом.

Что-то, ну а лететь вдвоём в салоне на 8 мест - это максимум удовольствия. Бухаешь на одних кроватях, спишь на других! Все коронавирусные правила отменяются.

Икорка приехала чёрная под Грей Гуз. Ну как не любить эту Люфтганзу

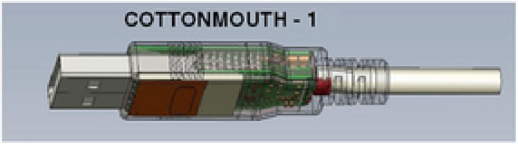
COTTONMOUTH-I

ANT Product Data

08/05/08

(TS//SI//REL) COTTONMOUTH-I (CM-I) is a Universal Serial Bus (USB) hardware implant which will provide a wireless bridge into a target network as well as the ability to load exploit software onto target PCs.



COTTONMOUTH - 1

(TS//SI//REL) CM-I will provide air-gap bridging, software persistence capability, "in-field" re-programmability, and covert communications with a host software implant over the USB. The RF link will enable command and data infiltration and exfiltration. CM-I will also communicate with Data Network Technologies (DNT) software (STRAITBIZARRE) through a covert channel implemented on the USB, using this communication channel to pass commands and data between hardware and software implants. CM-I will be a GENIE-compliant implant based on CHIMNEYPOOL.

(TS//SI//REL) CM-I conceals digital components (TRINITY), USB 1.1 FS hub, switches, and HOWLERMONKEY (HM) RF Transceiver within the USB Series-A cable connector. MOCCASIN is the version permanently connected to a USB keyboard. Another version can be made with an unmodified USB connector at the other end. CM-I has the ability to communicate to other CM devices over the RF link using an over-the-air protocol called SPECULATION.

а сразу после обширной экскурсии, мы малость забухали с видом на водопад, отоспались, и поехали на границу трёх стран, после чего нас ждал прекрасный ужин в нео-мишленовском ресторане при отеле Бельмонд.

Ресторан при водопадах, тянет на мишлен! Подарили повару бутылку водки, так он так расчувствовался, чуть не заплакал.

COTTONMOUTH-II

ANT Product Data

(TS//SI//REL) COTTONMOUTH-II (CM-II) is a Universal Serial Bus (USB) hardware Host Tap, which will provide a covert link over USB link into a targets network. CM-II is intended to be operate with a long haul relay subsystem, which is co-located within the target equipment. Further integration is needed to turn this capability into a deployable system.

08/05/08

(TS//SI//REL) CM-II will provide software persistence capability, "in-field" re-programmability, and covert communications with a host software implant over the USB. CM-II will also communicate with Data Network Technologies (DNT) software (STRAITBIZARRE) through a covert channel implemented on the USB, using this communication channel to pass commands and data between hardware and software implants. CM-II will be a GENIE-compliant implant based on CHIMNEYPOOL.

(TS//SI//REL) CM-II consists of the CM-I digital hardware and the long haul relay concealed somewhere within the target chassis. A USB 2.0 HS hub with switches is concealed in a dual stacked USB connector, and the two parts are hard-wired, providing a intra-chassis link. The long haul relay provides the wireless bridge into the target's network.

решили в этом году отметить Новый год вне дома и вне РФ в целом!
для меня выбор туроператора всегда очевиден - Serggik00 - обращаюсь к нему не первый раз и даже в такое загруженное время как Новый год - сервис был отменный!

на самом деле хотелось бы отметить, что уровень сервиса реально вырос значительно, время работы 24/7, поддержка постоянная до заселения, во время проживания, вплоть до вылета обратно!
очень все достойно!

ну а все остальное скажут фото 🙂

Очень устав от карантина и найдя возможность выехать в Турцию, мы сразу же решили в очередной раз обратиться к Сержу. Даже и не думали, что в это сложное время Серж сможет организовать все как всегда на высшем уровне, в кратчайшие сроки да ещё и предоставить скидку как старым клиентам. Есть у нас в Белеке (Анталия) 2 любимых отеля. Премиальные ультра пятерки. Так вот Серж смог сделать нам оба отеля. Мы даже и не надеялись на такую удачу, т.к бывали в этих отелях уже много раз, но Серж все организовал очень быстро и четко. Никакого волнительного ожидания. Только обратились и в этот же день все было готово. И вот мы уже уже в премиальном отеле. Не смотря на то, что заселение в отель С 14:00, мы прибыли в 9.30 утра и в 9.40 мы были уже в комфортном номере с роскошным видом и богато укомплектованном мини баром)
Наслаждались отдыхом забыв обо всем на свете 5 ночей и 6 дней, а потом переселились в ещё более роскошный отель на несколько ночей. И там все было ещё круче! Мы счастливы! Отдохнули по полной. Конечно же Серж профессионал своего дела и он постоянно был на связи и все держал под контролем. Отдых в отеле прошёл просто роскошно, а все потому, что мы уверены в работе Сержа. В который раз обращаемся к Сержу и всегда очень довольны его работой. Благодаря Сержу посетили уже множество различных отелей, а так же побывали на экскурсиях в различных странах. Искренне от души благодарим Сержа и рекомендуем всем кто в теме. Серж реально профи и обращаясь к нему отдых проходит на полном расслабоне. Серж благодарим тебя от души! И скоро обратимся снова 😀

P.S в этот раз ездили вдвоём, но прошлые годы ездили неоднократно вчетвером в различные отели и всегда все было супер!

Куда скидывать? 14:41

Номер 14:41

+79517890956 14:45

Сначала небольшую сумму скинуть для проверки или сразу все? 14:46

давай лучше небольшую 14:46

10 рублей говорят скинули для проверки 14:47

да 14:49

есть 14:49

По курсу цб так же? 14:49

да 14:50

Скинули 14:51

Пришли? 14:54

да есть 14:55

Отлично 14:55

Ну значит сегодня на 8 вечера, 1 час. По остальным по мере надобности будем сообщать. IP выше скинул больше никакой инфы не надо от меня? 14:59

да нет 15:02

ты тту 19:58

проверь 19:58

ресурс 19:58

Кстати - статуя Христа она только в кино и на картинках большая, а по факту - это супер-маленький памятник в 30-35 м высотой. Например Родина-Мать в Киеве раскинулась на 100 м, ну так к слову)

В 30 минутах езды от статуи - находится другая достопримечательность - гора Сахарная Голова с канатной дорогой.

Выглядит надёжно. Например ехали когда-то во Вьетнаме или на Ямайке, так было стойкое ощущение, что вот вот наступит пздц!)

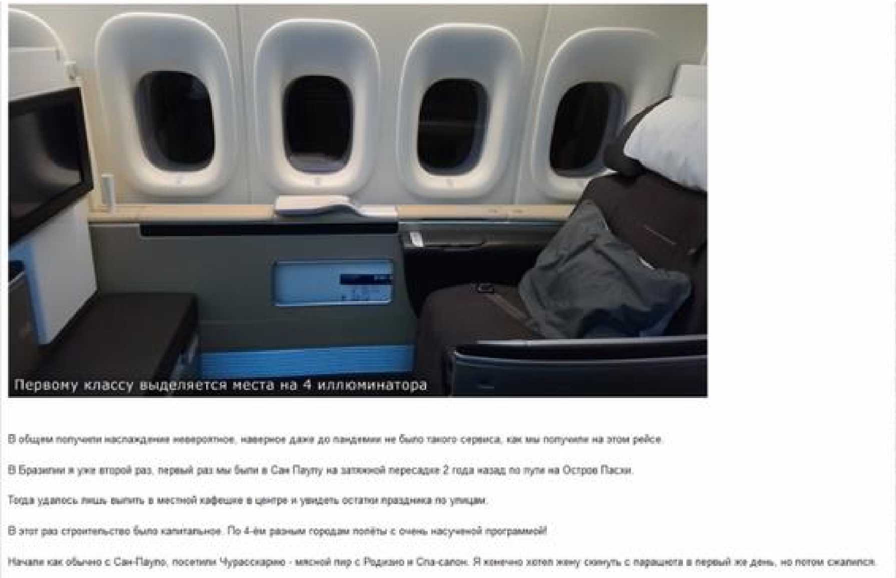
Всем привет! Хочу поделиться одним из лучших отдыхов, и помог мне в этом лучший из лучший в своем деле это СЕРЖИК (serggik00)! Созвон с Сержиком за неделю, обговариваем отели и экскурсии! Прилетам в Дубай и селимся в Риксосе! Сержик на связи! Все прошло равно! В процессе отдыха согласовываем следующий отель! Дальше идёт организация экскурсий, а там вертолет, ресторан «атмосфера» на самой высокой башни мира, гидроциклы, поездка на крузаках в пустыню. Забегу вперед все прошло на ура! Получили море позитивных впечатлений! Далее переехали в другой отель и оказалось, что категория номера на завтраках, а просил завтрак/ужин! Серж включается в проблему начинает ее решать! Сразу предложил вернуть разница в цене, но разница составляла 20к, а ужин стоил примерно 500 евро! Я сказал что этот вариант мне не подходит, и Серж сделал мне соседний отель, который входил в одну сетку с завтраками и ужинами! Я заселился в новый, потом выселился из предыдущего, и сделал обгрейт вернулся обратно в тот отель где и был первый раз! В итоге я жив в том же номере, но только с завтраки и ужинами! Притом что я ничего больше не доплачивал Сержику! И когда мой отдых заканчивался сержик спросил во сколько я выселяюсь, я ответил что в 4:30 утро по Москве, то он сказал что будет на связи! После выселения мне пришло смс все ли хорошо! Я был приятно удивлен))))) Подвиду итог: Сержик профи в своем деле! Если отдыхать, то только с ним! Еще раз спасибо, БРО!!!!!!!!

10433



Первому классу выделяется места на 4 иллюминатора

В общем получили наслаждение невероятное, наверное даже до пандемии не было такого сервиса, как мы получили на этом рейсе.

В Бразилии я уже второй раз, первый раз мы были в Сан Паулу на затяжной пересадке 2 года назад по пути на Остров Пасхи.

Тогда удалось лишь выпить в местной кафешке в центре и увидеть остатки праздника по улицам.

В этот раз строительство было капитальное. По 4-ём разным городам полёты с очень насученой программой!

Начали как обычно с Сан-Пауло, посетили Чурасскарию - мясной пир с Родизио и Спа-салон. Я конечно хотел жену скинуть с парашюта в первый же день, но потом сжалился.

CRYPTOLOCKER :: КРИПТОЛОКЕР [OFFLINE/ONLINE VER.]

>> ОСОБЕННОСТИ СБОРКИ <<

- уникальный эксплойт повышения прав
- уникальный генератор случайных чисел
- перезапись free-секторов "sectors pollution"
- балансировщик нагрузки работы софта
- невозможность запуска нескольких экземпляров
- реализован noKillProcess
- удаление/затирание теневых копий
- интеллектуальное отключение процессов
- функция самоудаления билда
- функция антипесочниц, антиотладки
- расширение у зашифрованных файлов
- список расширений шифруемых файлов
- алг. шифр. «MOSAIC» (ChaCha2.0/AES+RSA)
- правило шифрования: весь файл или часть
- автовыбор метода выполнения: треды/IOCP
- количество файлов-требований
- имена файлам-требованиям
- содержимое файла требования (offline ver.)
- каталог файла ключа (offline ver.)
- имя файла ключа (offline ver.)
- автозагрузка (вкл/выкл)
- геомодуль (вкл/выкл, страны)
- отсрочка запуска
- сетевая функция
- правила подготовки: повышение прав, UAC, отключение служб/процессов, Shell-инструкции

>> FEATURES BUILD <<

unique exploit for elevating rights +
unique random number generator +
rewriting free sectors "sectors pollution" +
software load balancer +
Inability to start multiple instances +
implemented by noKillProcess +
delete/overwrite shadow copies +
intelligent shutdown of processes +
.exe self-deletion function +
anti-sandbox function, anti-debugging +
extension for encrypted files +
list of extensions of encrypted files +
encr. algorithm «MOSAIC» (ChaCha2.0/AES+RSA) +
encryption rule: whole file or part +
autoselect execution method: threads/IOCP +
number of file-requirements +
names to file-requirements +
text of the file-requirement (offline ver.) +
file-key directory (offline ver.) +
file-key name (offline ver.) +
autoload (on/off) +
geomodule (on/off, countries) +
delayed launch +
network function +
start rules: raising rights, UAC, shutdown of services/processes, Shell-instructions +

- Оффлайн вер.: V.1.0 - **$350** / V.2.0 - **$500** / V.3.0 - **$800**
- Онлайн версия:
  - новая панель - **$500**
  - новая панель + веб-страница для жертвы + анонимный чат - **$650**
  - новая панель + веб-страница для жертвы + анонимный чат + BTC-шлюз (платежная система) - **$800**

- Offline ver.: V.1.0 - **$500** / V.2.0 - **$500** / V.3.0 - **$800**
- Online version:
  - new panel - **$500**
  - new panel + webpage for the victim + anonymous chat - **$650**
  - new panel + webpage for the victim + anonymous chat + BTC-gateway (payment system) - **$800**

» Развертывание ресурсов (сервера, сеть TOR, панель управления, чат, платежный шлюз) входит в стоимость.

» Ключ на панели - это просто идентификатор для получения главного ключа. Утилита дешифрования на стороне клиента получает ключ дешифрования с сервера ключей, используя этот идентификатор. Ключи хранятся и передаются в зашифрованном виде.

» Deployment of resources (servers, TOR, control panel, chat, payment gateway) included in the price.

» The key in the panel is really just an identifier for receiving the main key. The client-side decryption utility receives the decryption key from the key server using this identifier. Keys are stored and transmitted as encrypted.

ONE DASH

Скоростные VPS-сервера на Windows

— ПОЧЕМУ МЫ? 01.

Производительность
Используется прямая KVM виртуализация, что позволяет обеспечить автономную работу, для вашего комфорта.

Ничего лишнего
Лишних действий - нет. После запуска Вы поулчите инстуркции по использованию. Все важные программы - установлены.

Стабильность
Круглосуточная работа всех виртуальных серверов поможет вам полностью автоматизировать процессы.

Кросс-платформенность
Самые популярные ОС, поддерживающие удаленный доступ с разных устройств, включая телефоны.

— А ЧТО ЕЩЁ? 02.

Время запуска
По результатам тестов среднее время запуска сервера - 1.3 минуты.

Приватность
Данные и сессии шифруются. Это безопасно - никто не имеет доступ кроме вас.

Доступная аренда
Сроки аренды в нашем сервисе начинаются от семи дней.

Автоматизация
Мы избавляемся от рутины. Доступны все команды и полезные инструкции.

Высокая скорость
Используем SSD диски, выделенную сеть и мощное оборудование.

ДОБРОГО ВРЕМЕНИ СУТОК, ПРЕДСТАВЛЯЕМ ВАМ НАШ АВТОРИТЕТНЫЙ СЕРВИС ПО ПРОДАЖЕ ENROLL.

МЫ НА РЫНКЕ УЖЕ БОЛЕЕ 3-Х ЛЕТ,
И ЗА ВСЕ ЭТО ВРЕМЯ МЫ УСПЕЛИ НАКОПИТЬ ОГРОМНОЕ КОЛИЧЕСТВО ОПЫТА,
БАНКОВ, И ОТЗЫВОВ НА ДРУГИХ АВТОРИТЕТНЫХ ПЛОЩАДКАХ.

НИ ОДНОГО АРБИТРАЖА И ПРЕТЕНЗИЙ, ЗА ВСЁ ВРЕМЯ НАШЕЙ РАБОТЫ.
МЫ ЗНАЕМ ВСЁ ПРО ENROLL, И ТО ЧТО С НИМ СВЯЗАНО, И ПОЭТОМУ МЫ ВСЕГДА ПОДБЕРЁМ ДЛЯ ВАС ПОДХОДЯЩИЙ ТОВАР.
У НАС В ПРОДАЖЕ НА ПОСТОЯННОЙ ОСНОВЕ ВЫ МОЖЕТЕ НАЙТИ ЛЮБЫЕ БАНКИ, МЫ ПРОДАЕМ КАК И PUBLIC БАНКИ,
ТАК И NON-PUBLIC. РАССКАЖЕМ И ПОДБЕРЁМ, КАКИЕ ЛУЧШЕ ПОДХОДЯТ ПОД ШОПЫ, ЗАЛИВЫ, АВИА/ОТЕЛИ, И Т.Д.
ПОСТОЯННЫЕ ПОПОЛНЕНИЯ 24/7, СВЕЖИЕ БАНКИ И ИСКЛЮЧИТЕЛЬНО ВАЛИДНЫЙ МАТЕРИАЛ.
У НАС ДЕЙСТВУЕТ НАШЕ ЗОЛОТОЕ ПРАВИЛО: «ОДИН КОМПЛЕКТ – ОДНИ РУКИ!».
МЫ РАБОТАЕМ НА КАЧЕСТВО, А НЕ НА КОЛИЧЕСТВО, И ГЛАВНОЕ, ЧТОБЫ КЛИЕНТЫ БЫЛИ ДОВОЛЬНЫ.

В КОМПЛЕКТЕ ПРЕДОСТАВЛЯЕТСЯ:

PORTABLE BROWSER (ANTIDETECTED) – БРАУЗЕР С КОТОРОГО ПРОИСХОДИЛ ENROLL.
SSH – ТУННЕЛЬ С КОТОРОГО ПРОИСХОДИЛ ENROLL.
ENROLL (CC+INFO) – САМА РОЛЛКА, ДОСТУП В ЛИЧНЫЙ КАБИНЕТ, CC, ИНФА С ПОМОЩЬЮ КОТОРОЙ ПРОИСХОДИЛ ENROLL.
E-MAIL – ПОЧТА, НА КОТОРУЮ СДЕЛАНА РОЛЛКА.
СЕКРЕТНЫЕ ВОПРОСЫ И ОТВЕТЫ НА НИХ.

НАШИ КОНТАКТЫ 24/7:
foxroll@prv.st
foxroll@exploit.im

June 20

Привет, с теми шопами туго что то, есть сейчас вариант с брендом [redacted] у нас в тц крупных он есть
Я могу на твоег опосреда вбить его за копейку, допустим пак на 500$ за 50 сделаю, или кому из знакомых нужно мб

[redacted]

там оч много хороших вещей 21:59

Вообще на ввх даже тему думал открыть, но там запретили теперь если не участник преокта(22:01

На ввх на любую тему нужен деп ёбнутый 22:02

д нет вроде. я видел бесплатно 22:02

созадвали 22:02

типо шмотки продают 22:02

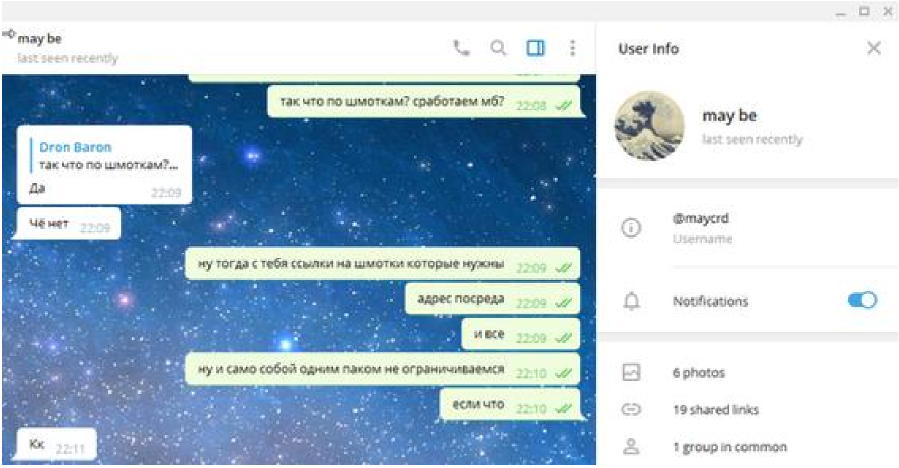
Ну ты проверь сначала касательно депа 22:02

А акк ввх я тебе свой дам если чё 22:02

:) 22:03

Репа есть хорошая 22:03

посмотри вообщем сайт. под заказ сделаю без проблем. + очень выручишь потому что у меня ту ттраблы) 22:03



may be
last seen recently

так что по шмоткам? сработаем мб? 22:08

Dron Baron
так что по шмоткам?...
Да 22:09

Чё нет 22:09

ну тогда с тебя ссылки на шмотки которые нужны 22:09

адрес посреда 22:09

и все 22:09

ну и само собой одним паком не ограничиваемся 22:10

если что 22:10

Кк 22:11

Есть прекрасный фильм Memento, там где события выдаются в обратном порядке)

я решил попробовать себя в таком жанре, и презентую Вам небольшую зарисовку о том, как я провёл январь, но уже в разрезе окончания путешествия!

Жена так хотела первый класс от Сержика, что согласилась СУТКИ провести в пределах аэропорта Франкфурта, который на данный момент представляет из себя огромный зомби-ленд!

На весь аэропорт, на кучу терминалов!!! , госпожа Люфтганза открыла всего лишь 2 лаунжа - в которых дают пожрать в прямом смысле - дырку от бублика, и залить это всё прекрасной немецкой штиль-вотер.

И то, это не прям в лаунже, а нужно спускаться за его пределы и жрать на скамейке собственно, потому что унтер-полицай и правила!

Пересечение от гейта к лаунжу очень часто занимает около часа, пока пройдёшь по терминалу, пока сядешь на межтерминальный поезд, пока пройдёшь секьюрити чек... а немцам же делать нехуй, они стоят-тыняются с друг другом травят басни. Когда приходит жертва - это полнейшая комплексная проверка со всеми возможными девайсами, бутылки запихиваются в специальный анализатор дополнительно, тебя обыскивают, проверяют на наркоту и взрывчатку, короче как положено..

До секьюрити ни воды не купить, ни булочку съесть.

Но, я бы был не Конюхов - Ахтауа, чтобы не придумать выход. В первом классе я трём стюардессам и пёрсеру (кто не знает - это умывальников начальник и мочалок командир в самолёте) поведал грустную историю (правдивую) о том, что, из терминала мы выйти не можем - корона. В лаунже не кормят и не поют, а рейс наш домой аж завтра, ровно через сутки.

В итоге профит этой истории таков - всё что мы не допили в салоне по Blue Label. Вот такая вот изящная бутылочка шампанского ещё по 190 Евриков - целая.

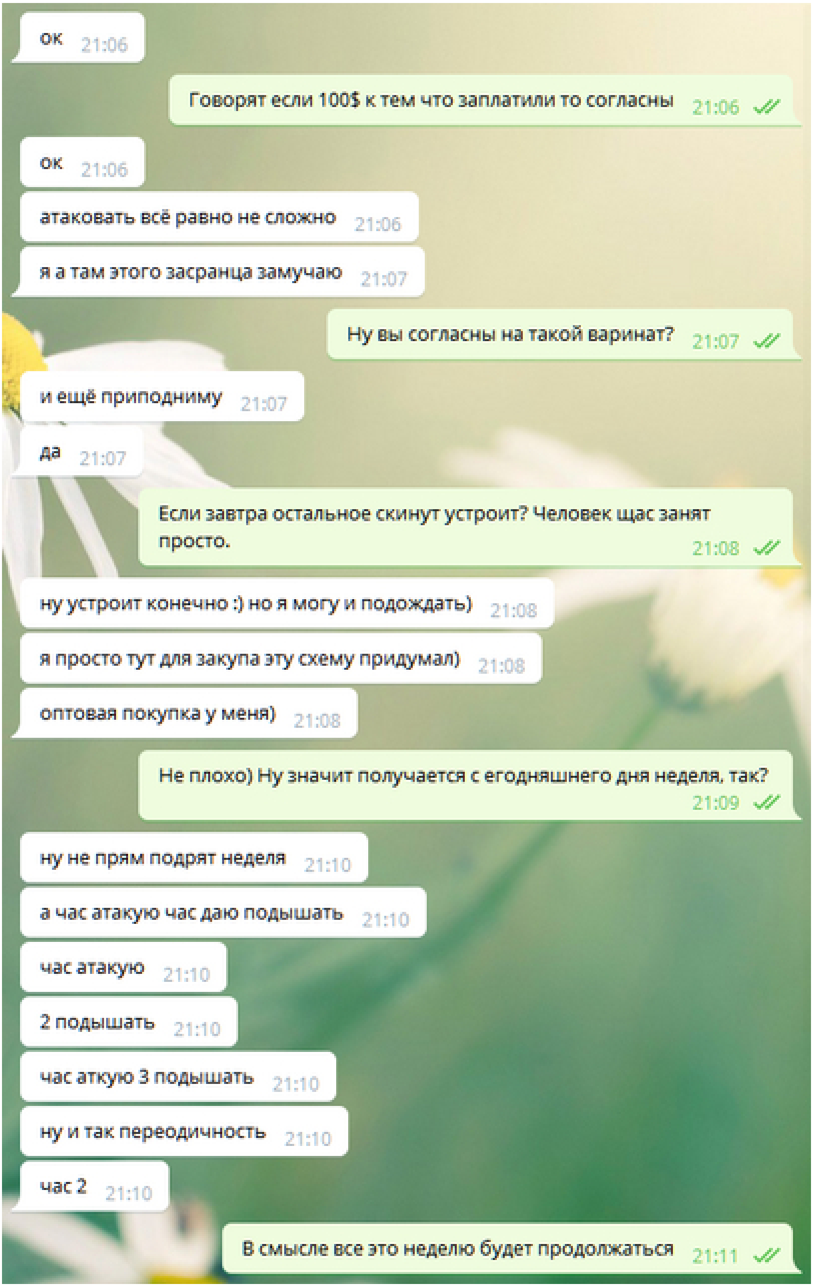
10508



ок 21:06

Говорят если 100$ к тем что заплатили то согласны 21:06

ок 21:06

атаковать всё равно не сложно 21:06

я а там этого засранца замучаю 21:07

Ну вы согласны на такой варинат? 21:07

и ещё приподниму 21:07

да 21:07

Если завтра остальное скинут устроит? Человек щас занят просто. 21:08

ну устроит конечно :) но я могу и подождать) 21:08

я просто тут для закупа эту схему придумал) 21:08

оптовая покупка у меня) 21:08

Не плохо) Ну значит получается с егодняшнего дня неделя, так? 21:09

ну не прям подрят неделя 21:10

а час атакую час даю подышать 21:10

час атакую 21:10

2 подышать 21:10

час аткую 3 подышать 21:10

ну и так переодичность 21:10

час 2 21:10

В смысле все это неделю будет продолжаться 21:11

Спасибо Serggk00 за помощь в организации прекрасного отдыха!
Благодаря ему мы целый месяц могли спокойно отдыхать в прекрасных отелях Занзибара.

Хакеры украли данные 5 млн банковских карт

02.04.2018 11:13

Хакерам удалось похитить данные владельцев более 5 млн дебетовых и кредитных карт, которыми пользовались покупатели, приобретая товары в американских сетевых универмагах Lord & Taylor, Saks Fifth Avenue и Saks Off 5th. Несмотря на то что информация об инциденте появилась 1 апреля, похоже, случившееся шуткой не было.

Хакеры из группировки Fin7, также известной под названием JokerStash, выкрали данные кредитных карт более чем 5 млн американцев. Как сообщает компания Gemini Advisory, информация о 125 тыс. карт выставлена на продажу, оставшиеся данные также могут в скором времени быть раскрыты. Ранее группировка взломала базы клиентов сетевых магазинов Whole Foods, Chipotle, а также отелей Omni Hotels & Resorts и Trump Hotels.

Под удар попали клиенты магазинов Saks Fifth Avenue и Lord & Taylor, совершавшие покупки в период с мая 2017 г. по настоящее время. Большинство пострадавших проживают в штатах Нью-Йорк и Нью-Джерси.

Торговая компания Hudson's Bay Company (старейшая в Соединенных Штатах Америки), владеющая этими сетями, подтвердила факт взлома своей системы безналичных платежей. Как уточняется, проблема с безопасностью данных возникла в определенных магазинах в Северной Америки. Пока проводится расследование, передает ТАСС. Нет никаких признаков того, что данная проблема отразилась на торговле компании Hudson's Bay Company в интернете, а также на ее платформах Hudson's Bay, HBC Europe и Home Outfitters.

С заявленным количеством скомпрометированных платежных карт нынешняя хакерская атака является одной из самых больших и наиболее вредных для сферы ритейла, утверждают специалисты в области кибербезопасности.

Ранее следственные органы США заявляли о краже данных 130 млн кредитных карт с 2006 по 2008 гг. в Heartland Payment Systems, операторе магазинов 7-Eleven и Hannaford Brothers. В 2013 г. преступники взломали Target Corp и украли данные 40 млн карт, а также 56 млн из Home Depot в 2014 г.

В Hudson's Bay Company подчеркнули, что покупатели не подвергнутся мошенническому снятию денег из-за взлома. Компания уже пообещала своим клиентам бесплатную защиту личных данных и рекомендовала им проверить состояние своих банковских счетов на предмет несанкционированного снятия средств.

Итак, обращался к Сержику в марте, дабы попытать счастье и вырваться из городской суеты. Мой выбор пал на Бали, естественно в первый раз были сомнения и море глупых вопросов, на которые каждый раз давался четкий и всеобъемлющий ответ, что говорит о профессионализме и понимании клиента. Что касается самого отдыха все было не так радужно, как хотелось, так как в день начала путешествия набирала обороты сильная снежная буря, которая задержала наш вылет на 3.5 часа. Но в итоге полет прошел гладко и без задержек в дальнейшем, по приезду в первый отель никаких вопросов по заселению не возникло, хоть и была глубокая ночь в тех краях. Сам по себе отель очень понравился, пара-тройка скринов прилагается ниже.

отель #1, отель #1, отель #1, отель #1, отель #1

В первом отеле жили вдвоем и буквально дня 3-4, плюс стали поступать не очень приятные новости о сокращении рейсов от многих авиакомпаний и поддавшись панике, перебронировал билеты домой на более ранние числа, о чем впрочем ни разу не пожалел😃

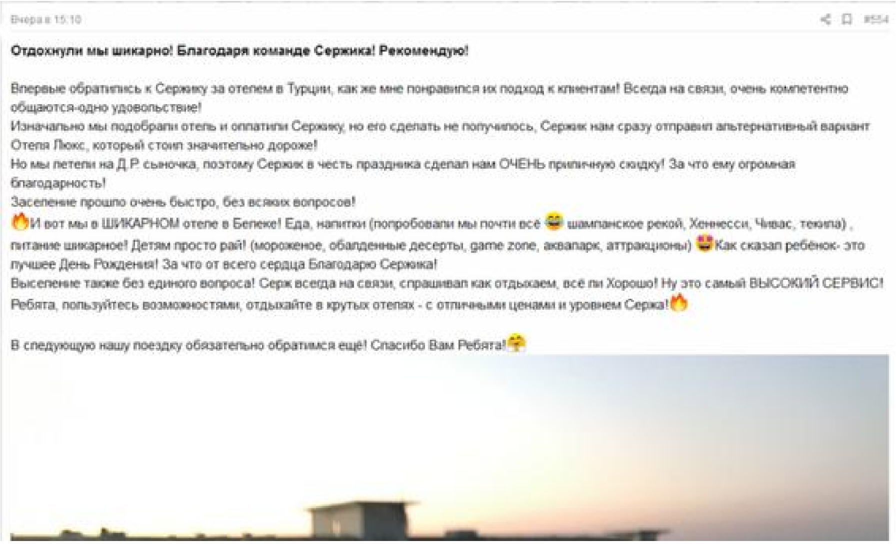
Вторым местом пребывания стала вилла в другом городе острова, жили в ней уже вчетвером с друзьями, при заселении также не было никаких вопросов, выселение происходило уже без меня, но друзья также не имели никаких проблем и успешно справились с задачей. К сожалению из виллы имеется только видео.

вилла #2

Ну и завершая сей мини рассказ, еще раз хочу поблагодарить @Serggik00 за предоставленный отдых. Профессионализм, адекватные ответы в любое время суток и другие плюсы, заставляют тебя обратиться и в следующий раз к нему, рекомендую всем!

p.s. пара видов с острова как бонус)

10524

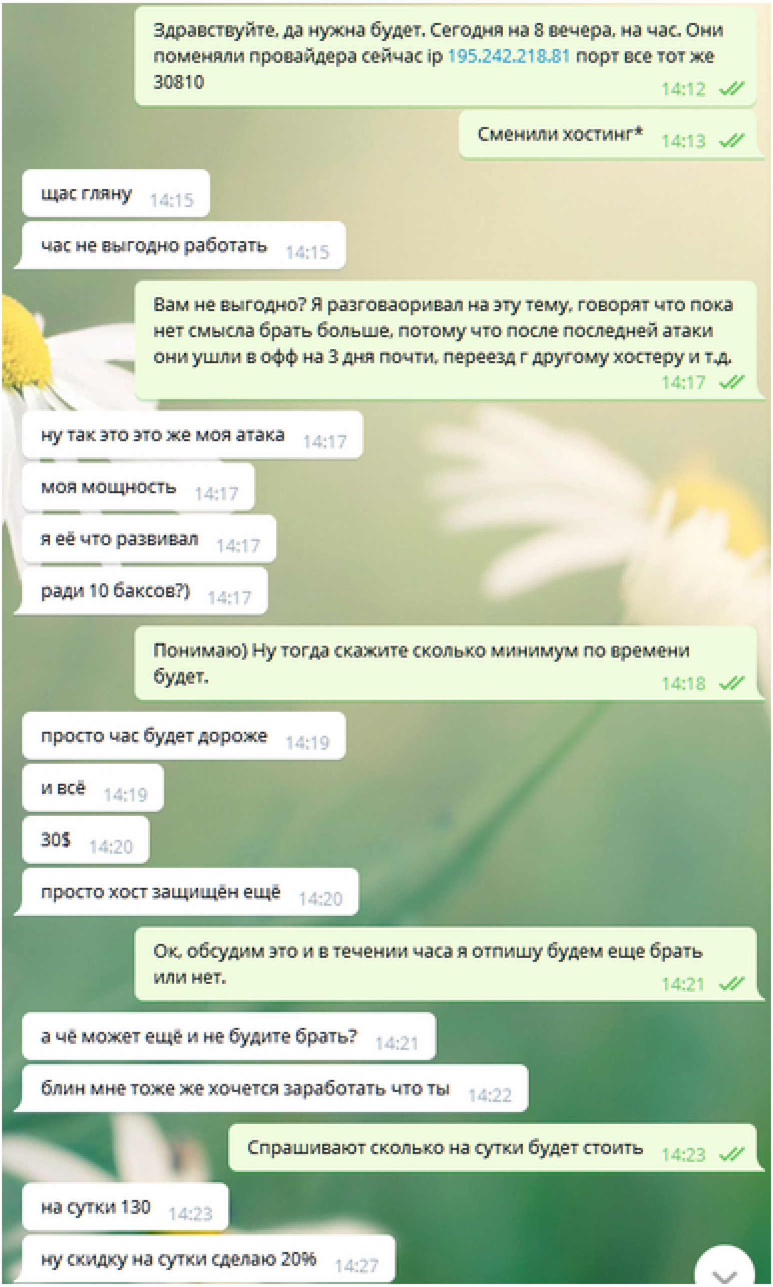


Отдохнули мы шикарно! Благодаря команде Сержика! Рекомендую!

Впервые обратились к Сержику за отелем в Турции, как же мне понравился их подход к клиентам! Всегда на связи, очень компетентно общаются-одно удовольствие!
Изначально мы подобрали отель и оплатили Сержику, но его сделать не получилось, Сержик нам сразу отправил альтернативный вариант Отеля Люкс, который стоил значительно дороже!
Но мы летели на Д.Р. сыночка, поэтому Сержик в честь праздника сделал нам ОЧЕНЬ приличную скидку! За что ему огромная благодарность!
Заселение прошло очень быстро, без всяких вопросов!
🔥И вот мы в ШИКАРНОМ отеле в Белеке! Еда, напитки (попробовали мы почти всё 😂 шампанское рекой, Хеннесси, Чивас, текила) , питание шикарное! Детям просто рай! (мороженое, обалденные десерты, game zone, аквапарк, аттракционы) 😍Как сказал ребёнок- это лучшее День Рождения! За что от всего сердца Благодарю Сержика!
Выселение также без единого вопроса! Серж всегда на связи, спрашивал как отдыхаем, всё ли Хорошо! Ну это самый ВЫСОКИЙ СЕРВИС! Ребята, пользуйтесь возможностями, отдыхайте в крутых отелях - с отличными ценами и уровнем Сержа!🔥

В следующую нашу поездку обязательно обратимся ещё! Спасибо Вам Ребята!🤭

10525



Здравствуйте, да нужна будет. Сегодня на 8 вечера, на час. Они поменяли провайдера сейчас ip 195.242.218.81 порт все тот же 30810 14:12

Сменили хостинг* 14:13

щас гляну 14:15

час не выгодно работать 14:15

Вам не выгодно? Я разговаоривал на эту тему, говорят что пока нет смысла брать больше, потому что после последней атаки они ушли в офф на 3 дня почти, переезд г другому хостеру и т.д. 14:17

ну так это это же моя атака 14:17

моя мощность 14:17

я её что развивал 14:17

ради 10 баксов?) 14:17

Понимаю) Ну тогда скажите сколько минимум по времени будет. 14:18

просто час будет дороже 14:19

и всё 14:19

30$ 14:20

просто хост защищён ещё 14:20

Ок, обсудим это и в течении часа я отпишу будем еще брать или нет. 14:21

а чё может ещё и не будите брать? 14:21

блин мне тоже же хочется заработать что ты 14:22

Спрашивают сколько на сутки будет стоить 14:23

на сутки 130 14:23

ну скидку на сутки сделаю 20% 14:27

ну не удержался)

И как обычно в подобных путешествиях меня сопровождает полное покрытие от Серж-сервиса. Самый лучший и оптимальный страховой полис

для путешествия в обе стороны был выбран ничуть не порезанный первый класс Lufthansa,

для того, чтобы насладиться комфортом в полной мере - в аэропорту Борисполя есть возможность сделать тест, Mastercard даёт сделать его бесплатно по премиум-карте,

результаты уже через 6-8 часов приходят на почту на английском,

сюда добавляешь липовую или настоящую справку от врача на бланке Lufthansa, и вуаля - бургеры и экипаж ходят по салону в маске, а ты сидишь без маски)

Если вы живете в США, изучите такие ресурсы, как:
Dice, Craigslist, Glassdoor, LinkedIn и др.
В Великобритании - JobServe, CyberSecurityJobsite, CWJobs и др.

Изучите имеющиеся вакансии и информацию, доступную на веб-сайтах по найму специалистов в области информационной безопасности.

Список топовых кадровых агентств в области кибербезопасности:

http://www.csoonline.com/article/3013033/it-careers/security-recruiter-directory.html

Barclays Simpson выпускает ежегодный анализ рынка, который поможет вам понять, что из себя представляют различные специальности в индустрии кибербезопасности:

http://www.barclaysimpson.com/security-resilience-market-report-2017

2 Получайте образование
Шаг

По данным Департамента трудовой статистики Министерства труда США, начальным образованием для входа в сферу кибербезопасности является степень бакалавра.

Однако, если у вас её нет - не спешите расстраиваться. Компании и правительственные учреждения испытывают огромную нехватку квалифицированных талантливых кадров в сфере информационной безопасности и активно пытаются закрывать имеющиеся открытые позиции. Если у вас нет высшего образования, вы можете успешно пройти виртуальное обучение и получить работу.

Я бы порекомендовал вам пройти И полностью усвоить содержимое "Полного курса по кибербезопасности" (Тома 1-4).

Если вы сможете продемонстрировать уровень знаний и навыков из этого онлайн курса, работодатель обязательно заинтересуется вами!

Коннект поднялся 20:22

сек 20:22

а порт какой 20:23

30810 20:23

пашеь? 20:33

пашет? 20:33

Lf 20:33

Да 20:33

логин забит 20:33

порт не пашет 20:35

Логин забит, но гейм все равно держится еще, когда на другом хосте они были то все падало 20:35

то есть залогиниться не как 20:36

Ну да, этого достаточно впринципе 20:36

не ну мы можем щас ещё раз убить 20:36

первый раз же норм убили 20:36

Ну было бы не плохо 20:36

а щас? 20:39

Похоже на то что лежит, порт гейма закрыт 20:39

Спасибо за спасенную поездку во Францию, если бы не Серж, то провел бы новый год в грустной России 😉. Оперативно сделал подтверждение брони и еще приятно подогрел бонусом на НГ 😎. Еще обращусь и не раз. Мерси!

10546

Среда в 17:47 #585

Как часто и бывает, вспомнил об отзыве в преддверии возможного нового заказа.

Будет заказ или нет, пока неизвестно, но хоть в этот раз решил не забыть об отзыве. Хоть и с опозданием на несколько месяцев. С другой стороны это знак качества, когда спустя 3, 6, 12 месяцев можно прийти, а сервис на месте. Как и несколько лет до того.

В общем, ближе к делу.

Отзыв: спасибо команде Serggik за профессионализм, поддержку, корректное и интеллигентное (что большая редкость в этой сфере) общение.

Люксовые апартаменты на две недели в столице одной из стран Европы. Какой, смотрите на фото.

Спасибо. До новых встреч.

Уже не первый раз обращаемся к Серго, и все проходит на высшем уровне!
В этот раз решили полететь в один из самых крутых отелей Турции.
Это отель где ультра все включено. Очень вкусная еда, закуски, фри бар в любе время дня, йога, водные развлечения, и парк развлечений Lens of Legends, посещение которого входит в стоимость отеля.
У нас был двухместный номер с видом на море - уютный и с большой кроватью. Очень красивые виды, куда не глянь! Фото прикрепляю.
Серго очень ответственно относиться к своей работе и на связи 24/7, это даёт дополнительную уверенность.
Спасибо Серго, что помог нам осуществить этот замечательный отдых. Эти 9 дней и 8 ночей ещё долго будем помнить.
Ещё будем обращаться не раз 👌

Serggik00 — это находка в мире путешествий❤❤❤уже бронируем отели не первый год, сформировали свою базу постоянных клиентов, которые бронируют отдых через Сержика, и это лучший сервис!!

вот только что сделали клиенту отель на лазурном берегу, фото не так много — совсем заотдыхались)но могу сказать, что, как всегда, все было сделано на высшем уровне: быстро, без сбоев!
Огромная экономия и деньги, и времени. Никаких нервов, все спокойно)

советую сервис Сержика всем!

RECEIVED
01 APR 2[redacted]
TAN CURRENCY EXC

The exchange rate applicable to your transfer appears above. Most money transfers are converted into payment currency at the time they are sent. However, in a few countries, local regulations require money transfers to be converted only when they are paid. If you are sending to one of those countries, the exchange rate noted above is only an estimate, and the actual exchange rate will be determined at the time of payment. Ask your agent if you have questions about the exchange rate applicable to your transfer. CERTAIN TERMS AND CONDITIONS GOVERNING THE MONEY TRANSFER SERVICE YOU HAVE SELECTED ARE SET ON THE BACK OF THIS FORM. BY SIGNING THIS FORM, YOU ARE AGREEING TO THOSE TERMS AND CONDITIONS. IN ADDITION TO THE TRANSFER FEE, WESTERN UNION AND ITS AGENTS ALSO MAKE MONEY FROM THE EXCHANGE OF CURRENCIES. *PLEASE SEE IMPORTANT INFORMATION REGARDING CURRENCY EXCHANGE SET FORTH ON THE BACK OF THIS FORM. PROTECT YOURSELF FROM CONSUMER FRAUD. BE CAREFUL WHEN A STRANGER ASKS YOU TO SEND MONEY.

18 мин. назад

Ну что, наконец-то дошли руки и ноги написать отзыв)
Для тех кто только вошёл в чат скажу что Серж это один самых старейших и надежных сервисов данного и других теневых форумов. Первый раз воспользовался его услугами как говорится ещё в мезозойской эре)))
Вот и в этом году, когда не все могли сделать Турцию, я конечно обратился к Сержу) что тут сказать, все как всегда, на уровне! А сервис стал ещё лучше, очень хороший саппорт, ему тоже отдельно спасибо, так как нас было 15 чел, вместе с детьми и нужно было расселить всех. В один отель не получилось, но мы влезли в 3 соседних отеля, и ходили в гости)
Вообщем мои рекомендации всем пользователям, а Сержу успехов и долгих лет!
Фоток в этот раз не очень много, но парочку выложу)

если дадите баксов 200 20:41

или 150 20:41

я его серверу вообще не дам жизни 20:41

в течение там допустим недели 20:41

то есть я буду монитрить работу сервера 20:41

и в любой момент когда он заработает атаковать их 20:41

Плюсом к тем что уже заплатили? 20:42

да 20:42

ну и за эту сумму я вам больший срок даю 20:42

и гарантирую что серв здохнет 20:42

Поговорю на счет этого, посмотрм что скажет 20:43

Тот кто оплачивает 20:44

ну если сейчас перетрёте 20:44

Я не особо решаю тут 20:44

будет ок 20:44

Скинул, в течении минут 15 порешаем и тогда отпишу 20:47

лежит ? 20:58

сервер? 20:58

Да 20:59

ок 21:05

час да? 21:05

Ну час закончился, пока все 21:0

Если коротко. Обратился в сервис 🦁Серживо🦁 и сделал заказ. Впервые.

Перелет для друга до Луанды, Африка. 🇦🇴🇦🇴🇦🇴🇦🇴

😍 Все четко, ровно, качественно и неожиданно приятно!!! 😍

Гарантий намного больше, чем дают сами авиакомпании или белые агентства!

Серж был на связи и спрашивал все ли хорошо от момента входа в аэропорт, на регистрации, на таможне, на посадке в самолет, на пересадке, во время ожидания, во время посадки.

Потом Серж забывает кто ты такой. Сервис ТОП!!!! Фотки прилагаю!

СпасибА тебе Сержико, ты нереально крут!!! Или нереально кент!!! 🤷‍♂️ (я не сильно понял)

Понедельник в 22:27

#543

Доброго времени суток.Поехал на выходные в Стамбул и могу с уверенностью рекомендовать брать отель не на букинге, а у Сержика)))
Обратился в очередной раз к Сержику и всё прошло супер гладко, как и всегда! Огромное спасибо за столь идеальный сервис, даже удивляешься на сколько круто работает Сержик и его саппорты!(реально лучше , чем любые турагенства) Было бы еще круто , если бы сделали рекомендации по отелям в популярных направлениях (так как долго выбирал отель, а оказалось у Сержика его нет( )
Надеюсь закончится ковид, откроют границы и будем обращаться к Сержику ещё чаще!) Еще раз БОЛЬШОЕ СПАСИБО, сори , что выложил отзыв через пару дней, а не сразу!

7 Дек 2020 #563

Уже на второй день экскурсий после опаснейшего горного перевала длиной в 45 км в одну сторону с шириной дороги в одну машину и без любых ограждений, мы утюнулись в перекрытую цепями дорогу

Так как до точки назначения оставалось километра 2.5, мы пошли пешком. У самой достопримечательности - соляного утёса - стоял забор всё на огромных замках.

Конюховы так просто не сдаются, и потому было принято решение сделать еще + 1 км и обойти сбоку по полям. О чудо, как раз в конце пути, забор был провален и проход был возможен,

НО! тут же с поля там где трудятся фермеры, выбегает франт. Самый натуральный, ухоженная бородка, новый костюм, круглое сомбреро, весь в золоте и в белой рубашке. Напомню, это в горах

то за селом в поле... и уж очень он начал уговаривать нас дальше не ходить, ведь там штрафы) аж по 50 $ на человека. Мы тут же предложили заплатить ему на месте, лишь бы пройти!

Тут же возникла новая версия, о арестах и злой полиции) Ну сопоставив факты и прочие вещи я принял оперативное решение - не настаивать на проходе, по дороге жена что-то мне рассказывала, и

вполоборота - увидела этого милого дэнди, который еще полные минут 10 провожал нас взглядом... Я уже ожидал, если честно, увидеть машину нашу со спущенными колесами минимум, но обошлось!

Романтическое СПА во Флорианополисе

Ну а потом нас ждал рай на земле - прекрасное аттоловой красоты - море, со шриланкийскими волнами, прекрасный сервис и самые резонные цены на планете наверное. Мы не постеснялись и заказали президентский люкс,

таковых только 2 на весь отель на 3 корпуса, 130 квадратов, 2 джакузи, одна на улице, и прочие вещи включены. Естественно полностью всё включено, конечно на ужин пихают вино исключительно за деньги

бутылками, и разные спец блюда. Ну мы не стеснялись и заказывали, и так же сэкономили сколько тысяч долларов на отеле благодаря Сержику и его команде.

Здравствуйте. На один час, сегодня в 20.00 ip 46.4.72.221, сколько это будет стоить и куда оплачивать? 16:14

день добрый 16:14

15$ киви кошелёк 16:15

Спрашивают на вм совсем не вариант, просто на киви еще переводить в $ надо 16:17

вариант 16:17

Ну тогда как работаем? Мы щас оплачиваем и 20.00 все начинается? 16:18

R6750932114926 16:18

да верно 16:18

R675093214926 16:19

Спрашивают коыелек рублевый, а оплата в $ по какому курсу тогда скидывать? 16:19

по курсу цб 16:19

так как поступим? 16:22

Сейчас оплачивают 16:22

океей 16:22

ждёмс 16:27

Смс от вм не приходит говорят 16:27

херова это 16:30

Это да 16:30

есть 16:33

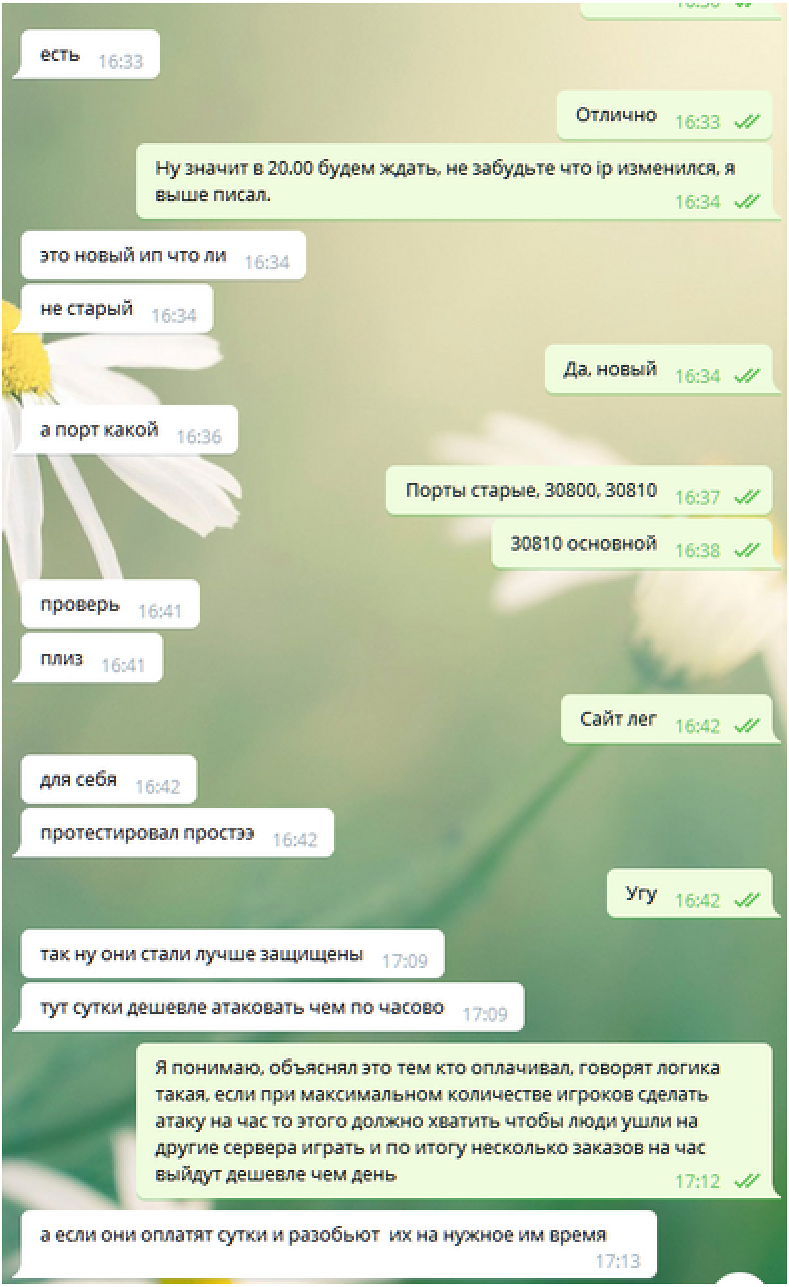
Отдыхали четвером в Дубае, брали у Сержика два разных отеля в разных районах с классным видом из окна. Что понравилось - так это внимательность, казалось что Сержик присутствует рядом и помогает, интересуется все ли в порядке. Так же брали отличную экскурсию на Яхте, где так же все было организовано на 100% и быстро. Очень довольны, жаль что раньше не решались, могли бы жить в гораздо более шикарных отелях за те же деньги)). Теперь будем брать отели и экскурсии только у сержика

10599



есть 16:33

Отлично 16:33

Ну значит в 20.00 будем ждать, не забудьте что ip изменился, я выше писал. 16:34

это новый ип что ли 16:34

не старый 16:34

Да, новый 16:34

а порт какой 16:36

Порты старые, 30800, 30810 16:37

30810 основной 16:38

проверь 16:41

плиз 16:41

Сайт лег 16:42

для себя 16:42

протестировал простээ 16:42

Угу 16:42

так ну они стали лучше защищены 17:09

тут сутки дешевле атаковать чем по часово 17:09

Я понимаю, объяснял это тем кто оплачивал, говорят логика такая, если при максимальном количестве игроков сделать атаку на час то этого должно хватить чтобы люди ушли на другие сервера играть и по итогу несколько заказов на час выйдут дешевле чем день 17:12

а если они оплатят сутки и разобьют их на нужное им время 17:13

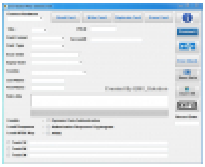
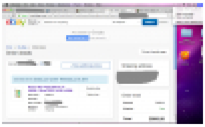
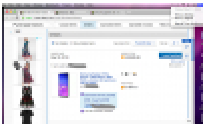
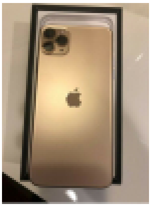
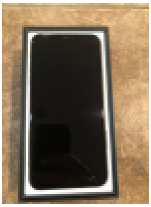
Удаление свойств и личной информации

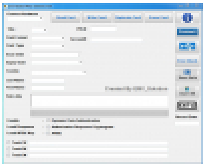


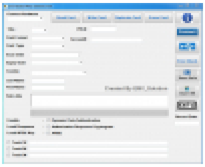


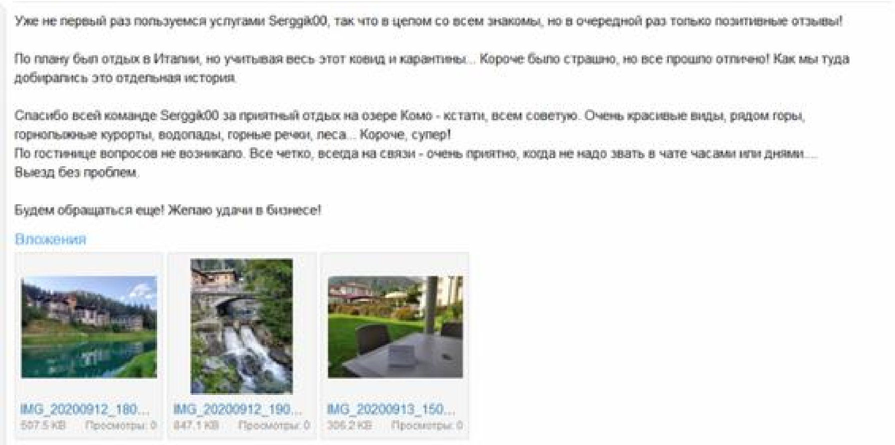












Уже не первый раз пользуемся услугами Serggik00, так что в целом со всем знакомы, но в очередной раз только позитивные отзывы!

По плану был отдых в Италии, но учитывая весь этот ковид и карантины... Короче было страшно, но все прошло отлично! Как мы туда добирались это отдельная история.

Спасибо всей команде Serggik00 за приятный отдых на озере Комо - кстати, всем советую. Очень красивые виды, рядом горы, горнолыжные курорты, водопады, горные речки, леса... Короче, супер!
По гостинице вопросов не возникало. Все четко, всегда на связи - очень приятно, когда не надо звать в чате часами или днями....
Выезд без проблем.

Будем обращаться еще! Желаю удачи в бизнесе!

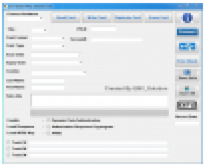
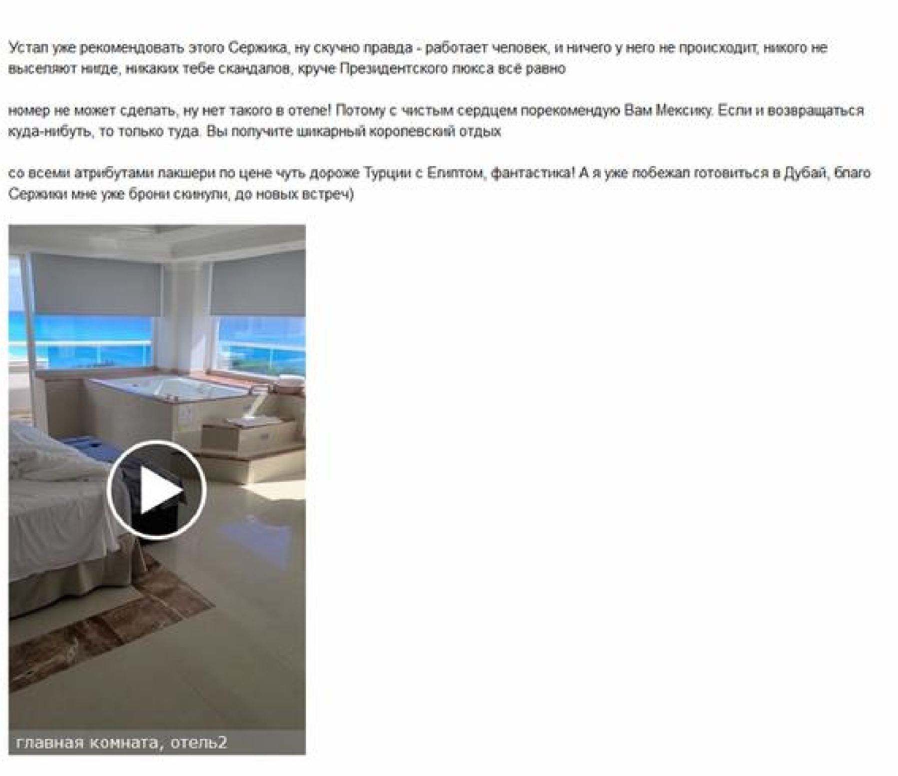
Суббота в 14:51 #1

Уважаемые друзья, коллеги! В связи со сложной ситуацией во всем мире, и закрытыми границами, мы предлагаем сотрудничество всем кто имеет свои отели, знакомых хозяев отелей, знакомых знакомых хозяев отелей по всему миру! Преобладающее желание это страны Евросоюза, но и не откажемся от Азии, Турции и США (так же рассмотрим и другие страны)! Готовы сотрудничать на долгосрок через площадку booking.com! Порядочность гарантируем, Гарант поддерживаем двумя руками ЗА!

PUTNIK



10603



Устал уже рекомендовать этого Сержика, ну скучно правда - работает человек, и ничего у него не происходит, никого не выселяют нигде, никаких тебе скандалов, круче Президентского люкса всё равно

номер не может сделать, ну нет такого в отеле! Потому с чистым сердцем порекомендую Вам Мексику. Если и возвращаться куда-нибуть, то только туда. Вы получите шикарный королевский отдых

со всеми атрибутами лакшери по цене чуть дороже Турции с Египтом, фантастика! А я уже побежал готовиться в Дубай, благо Сержики мне уже брони скинули, до новых встреч)

главная комната, отель2

Get your Identification Code — Select one of the options below to receive your temporary Identification Code. You will need to enter this code on the next page.

For text messages, there's no charge from us, but standard text messaging rates from your wireless provider apply.

Send My Code to:

Phone number

xxx-xxx-3803 ○ Voice ○ Text

xxx-xxx-7782 ○ Voice ○ Text

OR E-mail address

● e...s@yahoo.com

What you should know...

Already have an Identification Code?

What is an Identification Code?

What if my phone number has an extension or goes to an automated voice response unit?

The contact information you see here is from your current account profile with us. If it's outdated, you can change it later, but for security reasons, you must select one of these options to receive your Identification Code.

Please allow extra time to receive your Identification Code by e-mail or text message. We'll send the code immediately, but many factors can influence how fast it will appear in your inbox or on your mobile device (e.g., internet traffic, ISPs, software settings, etc.). You may also want to check your SPAM folder if you have one.

If you ask us to send you a new Identification Code, the previous code will become invalid, even if it has not arrived. You may want to receive the code by text message if an e-mail didn't arrive.

Отзыв немного запоздалый, за это прошу извинить. О теме данных путешествий узнал не так давно и из всех, с кем мне довелось пообщаться, Серж был самым адекватным и приятным в общении. Отвечал оперативно, вежливо, и я решил довериться, не привлекая гаранта (все таки больше отзывов, чем у тс я не видел ни у кого). Выбор пал на Шри-ланку, летел один и, в сравнении, сумма была не большая. Заказал, оплатил, через несколько дней пришло подтверждение и... так, как это был первый подобный трип, я, конечно же, натупил, решив сэкономить и на авиа. В результате никто не смог его сделать и пришлось брать другие билеты, из-за чего я потерял день и приехал заселяться в 3 ночи. Ситуация не приятная, но тс все решил и чек ин прошел успешно. На ресепшене, если я правильно понял их англ, хотели увидеть карту оплаты, но ответ, что отель оплачивал турагент снял все вопросы и меня заселили. Серж все время был на связи, и адекватно отвечал на тупые вопросы, за что ему большая благодарность. Все время проживания прошло без каких либо проблем. Тс топ!!!

Твой тренер

Нейтан Хаус

Ведущий эксперт по кибербезопасности

У меня ***24-летний опыт*** работы в области кибербезопасности, за время которого я консультировал крупнейшие компании по всему миру, обеспечивал безопасность многомиллионных и многомиллиардных проектов. Я руковожу консалтинговым агентством по вопросам безопасности **Station X**. Совсем недавно я выступал в качестве ведущего консультанта по безопасности в ряде компаний Великобритании, работающих в сфере мобильного банкинга и платёжных систем, помогая обезопасить транзакции на 71 млрд фунтов стерлингов.

В числе моих клиентов были: BP, ExxonMobil, Shell, Vodafone, VISA, T-mobile, GSK, COOP Banking Group, Royal Bank of Scotland, Natwest, Yorkshire bank, BG Group, BT, London 2012.

Много раз я был участником и спикером на различных конференциях по безопасности, разработчиком бесплатных инструментов по безопасности и открывал серьёзные уязвимости в безопасности популярных приложений.

Хочу сказать огробное спасибо Serggik00 за помощь с отелем в Турции. Так получилось что планировал отдохнуть в двух отелях и обратился к другому умельцу, но к сожалению он подвел и утром перед рейсом вернул деньги и сказал извини ничего не вышло. В итоге полетел в Турцию без брони отеля. По прилёту в Турцию был удивлен что там booking заблокирован. В итоге пришлось отдыхать за свои. Благо Serggik00 вызвался помочь со вторым отелем. быстро выбрали отель, оплатил дал данные и Serggik00 спокойно сделал отель и выдал ваучер. До вселения еще прозвонил отель и подтвердил что всё ок. Заселение и выезд как за свои никаких вопросов. Еще раз спасибо Serggik00, что выручил. Однозначно рекомендую!!!

3 Шаг Получайте сертификаты и квалификации

Если это возможно и у вас есть время, получите степень по релевантному безопасности предмету (компьютерная наука/IT). Ваша дипломная работа должна быть связана с безопасностью и раскрывать востребованную в индустрии тему. Это приведет вас напрямую к получению работы, поскольку вы станете признанным специалистом в сегменте безопасности на рынке труда.

С учетом огромного спроса на специалистов по безопасности, совершенно необязательно получать степень, тем не менее, это приведет вас к работе, доступной для выпускников ВУЗ-ов, и поможет вам продвинуться на руководящие должности в дальнейшем.

Сфера безопасности не считается работой начального уровня. Люди обычно приходят в нее из системного администрирования, программирования и сетевых технологий. Однако, если вы готовы продемонстрировать свои знания и навыки, то можно сразу же погружаться в безопасность.

Сертификации улучшают ваши возможности по трудоустройству и развивают умение применять на практике ваши знания и навыки.
Когда вы будете изучать локальный рынок труда на предмет наиболее интересующих вас специальностей, то обратите особое внимание на сертификации, которые обычно требуются для этих специальностей. Какие сертификаты вам следует получить, будет зависеть от вида специальности, интересующей вас. Например, сертификации для тестировщиков на проникновение отличаются от сертификаций для аудиторов. Приобретайте знания, необходимые для сдачи этих экзаменов, и как только наберете достаточно опыта — получайте сертификаты.

Базовые уровни сертификации, на которые вам стоит обратить внимание:

CompTIA A+
CompTIA Network+
CompTIA Linux+
CompTIA Security+
SSCP Systems Security Certified Practitioner
GSEC

Необязательно владеть этими сертификатами — вам нужно владеть знаниями.

Все так же стоит 16:09

Я в игре, если вылетит то отпишу 16:09

да щас подгруз сделаю 16:11

Щас норм вроде, вылетел и не могу по новой зайти уже 16:13

норм 16:14

Да, даже на логин не коннектится 16:14

Опять поднялся 16:20

Буду инфу дивать че как 16:20

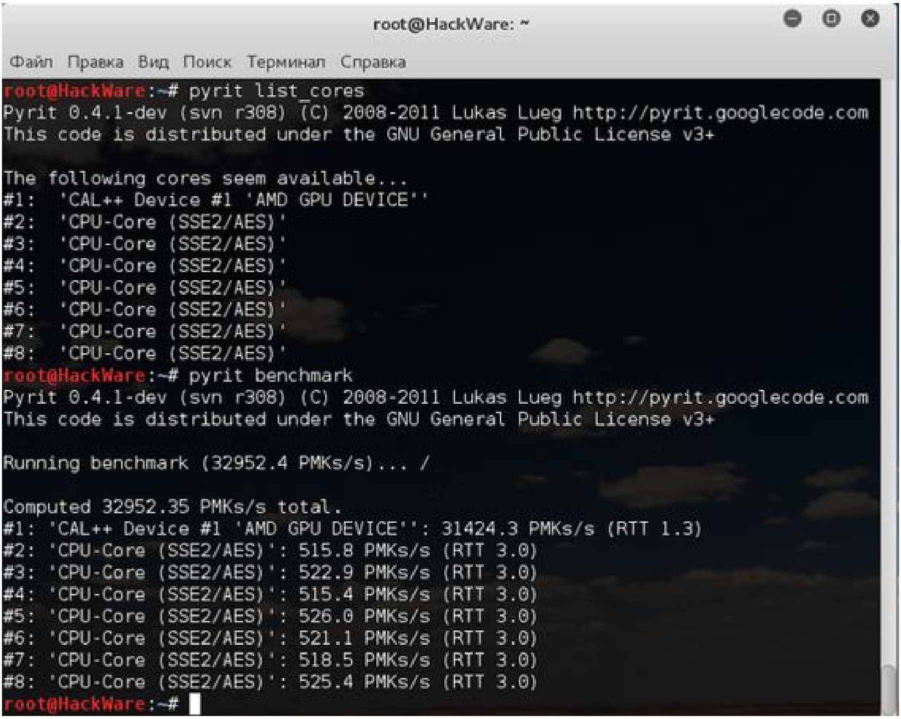
давать* 16:20

да работаю 16:20

стопнули на 30 мин 16:20

обновить софт 16:20

10628



```
root@HackWare:~# pyrit list_cores
Pyrit 0.4.1-dev (svn r308) (C) 2008-2011 Lukas Lueg http://pyrit.googlecode.com

Q&A

Говорят что часа хватает. И спрашвают такой про такой вариант, если допустим оплатить оптом за несколько часов сразу какая нидуль скидка будет? Например мы платим какую то сумму за 5 часов и потом атаку подключать по мере надобности в какие то дни. 14:34

да 14:35

я же предлагал такой вариант 14:35

меня он вообще устроит 14:35

если по 10 баксов час был на старом хосте с шаровой защитой 14:35

то тут час сделаю по 20$ 14:35

Отлично, тогда минимум по объему сколько будет? 5 часов или больше ? 14:38

вам сколько надо 14:38

ну я на 5 считал 14:38

можете 10 14:38

как бы ты знаешь я работаю норм 14:38

свою работу знаю поэтому переживать за бабки нет смысла 14:39

Ну да, пока 5 возмем. Переводить на тот же кошель ВМ? 14:39

можно на киви? 14:39

я на вм всё ещё зайти не омгу) 14:40

Да, можно киви 14:40

будет отлично 14:40

Ну тогда мы щас оплатим, и сегодня в 8 часов вечера первый час будет. 14:4

Постскриптум: Если Вы думаете, что так всё радужно написано, и оно легко и просто, то напомню такую штуку. Еще до кризиса в прошлом году, я неоднократно обращался к 5-7 селлерам на старых Мигах с предложением оформить мне ЮСУ. И что Вы думаете - НИ ОДИН не согласился это сделать - душно, стрёмно, вязко, опасно и.т.д. А в этом сервисе, мне даже об этом и не заикнулись. Просто молча сделали не глядя, что это отель президента страны - гордость и роскошь Чикаго)) Так то.

Ну и вот по доброй традиции последних лет, не отходя от кассы, если можно так выразиться в нашем случае, хаха)) Сервис прислал мне свежую версию бонусной карты. Которая имеет совершенно свежее дизайнерское решение, кучу степеней защиты, актуальный лозунг, который совершенно не хочется выполнять... Ну что сказать. У-РО-ВЕНЬ!

мне сюда или на почту мою 21:42

Ну оплатите треть за них, тогда скину 21:42

сосни 21:42

я не лох 21:43

за селфи никто не платит ибо это просто селфи 21:43

соизвольте скинуть все селфи в ваших же интересах 21:44

могу дать почту 21:44

У меня селфи только с паспортами. Поэтому бесплатно я ничего скидывать не буду. 21:45

вы думаете я куда буду юзать ваши селфи?орнул -там нету ни прописки ни разворота 21:45

это просто селфи ну да хуй с вами 21:45

У меня селфи только с паспортами-ясный хер селфи с паспортом в руках-не удивили 21:46

Поэтому бесплатно я ничего скидывать не буду.-не скидывайте селфи похуй найду продавца на форуме легалайзера значит 21:47

могу дать почту 21:44

У меня селфи только с паспортами. Поэтому бесплатно я ничего скидывать не буду. 21:45

вы думаете я куда буду юзать ваши селфи?орнул -там нету ни прописки ни разворота 21:45

это просто селфи ну да хуй с вами 21:45

У меня селфи только с паспортами-ясный хер селфи с паспортом в руках-не удивили 21:46

Поэтому бесплатно я ничего скидывать не буду.-не скидывайте селфи похуй найду продавца на форуме легалайзера значит 21:47

ОТВЕТЫ НА ЧАСТЫЕ ВОПРОСЫ
И ОПИСАНИЕ

ЧТО ЭТО ЗА ТАРИФЫ?

КОРП. НЕ ПУБЛИЧНЫЕ ТАРИФЫ - ЭТО ЗАКРЫТЫЕ ТАРИФЫ, ПРЕДОСТАВЛЯЮТСЯ
ТОЛЬКО ЮР. ЛИЦАМ, КОМПАНИЯМ, ФИРМАМ И Т.П. НА ВЫГОДНЫХ УСЛОВИЯХ.
ИМЕЮТ БОЛЬШИЕ ПАКЕТЫ, БЕЗЛИМИТЫ, И НИЗКУЮ АБОНЕНСКУЮ ПЛАТУ, НЕТУ РОУМИНГА!

КАКАЯ ЭКОНОМИЯ?

ЗА ГОД ВЫ ЭКОНОМИТЕ ПОЧТИ 70% СВОИХ СРЕДСТВ, НА СОТОВУЮ СВЯЗЬ.
ВЗЯТЬ К ПРИМЕРУ ПУБЛИЧНЫЙ ТАРИФ В МСК,
ОТ БИЛАЙН «СЕМЬЯ», РАВНЫЙ ПО ПАКЕТАМ НАШЕМУ, НЕ ПУБЛИЧНОМУ ТАРИФУ «МАКС БЕЗЛ. BRONZE»
ВЫ ЭКОНОМИТЕ, С УЧЕТОМ РАЗОВОЙ СТОИМОСТИ ПОДКЛЮЧЕНИЯ - 45%, ПОСЛЕДУЮЩИЕ ГОДА - 65%
ТАРИФ ОТ БИЛАЙН, ВЫЙДЕТ ВАМ В 10.800 РУБ. ГОД - А НАШ ТАРИФ В 3.600 РУБ.ГОД

What is 4chan?

4chan is a simple image-based bulletin board where anyone can post comments and share images. There are boards dedicated to a variety of topics, from Japanese animation and culture to videogames, music, and photography. Users do not need to register an account before participating in the community. Feel free to click on a board below that interests you and jump right in!

Be sure to familiarize yourself with the Rules before posting, and read the FAQ if you wish to learn more about how to use the site.

Третий отель был снова в Праге в самом центре города, один номер был порядка 100 кв.м с джакузи. Чекин и чекаут так же без вопросов. Сержик и его команда всегда на связи, на любые вопросы получали исчерпывающие ответы, сервис реально лучший с кем приходилось сотрудничать, отдых прошёл весь без переживаний и лишних напрягов. Спасибо огромное команде Сержика. Всё было сделано в лучшем виде.

Спасибо 20:26

Звонить нужно водителю??? 20:27

Да, как будет недалеко от вас, я напишу и можете с ним созвониться что бы найти друг друга 20:27

Спасибо 20:28

Водитель какой то дурак оказался, взял заказ и уехал в обратную сторону, сейчас закажу снова 20:30

Хорошо 20:30

К сожалению промо по 500 кончились, сможете 70р доплатить? 20:33

Add Account

Add an external (non-Chase) account — Complete the required fields below and click "Next." You may add external (non-Chase) accounts to your online profile as long as:

1. You own the account
2. The account is a U.S. bank account
3. We can verify the account information you've provided

*Required field

Add Account - Step 1 of 3

Routing number* 061120000

Account number* 45074701326393808

Bank name* synovus

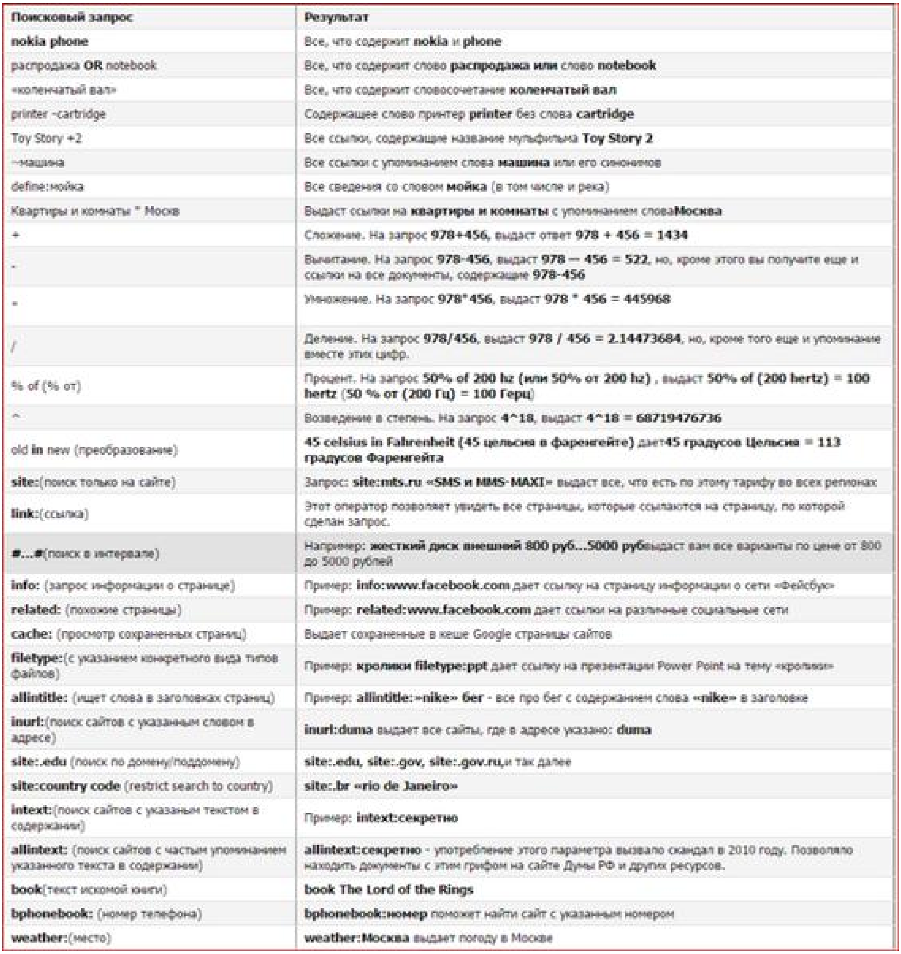
Account type ● Checking ○ Savings

Account nickname* checking

Is this a personal or business account?* ● Personal ○ Business

*Required field

10691



Поисковый запрос	**Результат**
nokia phone	Все, что содержит **nokia** и **phone**
распродажа **OR** notebook	Все, что содержит слово **распродажа или** слово **notebook**
«коленчатый вал»	Все, что содержит словосочетание **коленчатый вал**
printer -cartridge	Содержащее слово принтер **printer** без слова **cartridge**
Toy Story +2	Все ссылки, содержащие название мультфильма **Toy Story 2**
~машина	Все ссылки с упоминанием слова **машина** или его синонимов
define:мойка	Все сведения со словом **мойка** (в том числе и река)
Квартиры и комнаты * Москв	Выдаст ссылки на **квартиры и комнаты** с упоминанием слова**Москва**
+	Сложение. На запрос **978+456**, выдаст ответ **978 + 456 = 1434**
-	Вычитание. На запрос **978-456**, выдаст **978 — 456 = 522**, но, кроме этого вы получите еще и ссылки на все документы, содержащие **978-456**
*	Умножение. На запрос **978*456**, выдаст **978 * 456 = 445968**
/	Деление. На запрос **978/456**, выдаст **978 / 456 = 2.14473684**, но, кроме того еще и упоминание вместе этих цифр.
% of (% от)	Процент. На запрос **50% of 200 hz (или 50% от 200 hz)** , выдаст **50% of (200 hertz) = 100 hertz** (**50 % от (200 Гц) = 100 Герц**)
^	Возведение в степень. На запрос **4^18**, выдаст **4^18 = 68719476736**
old **in** new (преобразование)	**45 celsius in Fahrenheit (45 цельсия в фаренгейте)** дает**45 градусов Цельсия = 113 градусов Фаренгейта**
site:(поиск только на сайте)	Запрос: **site:mts.ru «SMS и MMS-MAXI»** выдаст все, что есть по этому тарифу во всех регионах
link:(ссылка)	Этот оператор позволяет увидеть все страницы, которые ссылаются на страницу, по которой сделан запрос.
#...#(поиск в интервале)	Например: **жесткий диск внешний 800 руб...5000 руб**выдаст вам все варианты по цене от 800 до 5000 рублей
info: (запрос информации о странице)	Пример: **info:www.facebook.com** дает ссылку на страницу информации о сети «Фейсбук»
related: (похожие страницы)	Пример: **related:www.facebook.com** дает ссылки на различные социальные сети
cache: (просмотр сохраненных страниц)	Выдает сохраненные в кеше Google страницы сайтов
filetype:(с указанием конкретного вида типов файлов)	Пример: **кролики filetype:ppt** дает ссылку на презентации Power Point на тему «кролики»
allintitle: (ищет слова в заголовках страниц)	Пример: **allintitle:»nike» бег** - все про бег с содержанием слова **«nike»** в заголовке
inurl:(поиск сайтов с указанным словом в адресе)	**inurl:duma** выдает все сайты, где в адресе указано: **duma**
site:.edu (поиск по домену/поддомену)	**site:.edu, site:.gov, site:.gov.ru,**и так далее
site:country code (restrict search to country)	**site:.br «rio de Janeiro»**
intext:(поиск сайтов с указаным текстом в содержании)	Пример: **intext:секретно**
allintext: (поиск сайтов с частым упоминанием указанного текста в содержании)	**allintext:секретно** - употребление этого параметра вызвало скандал в 2010 году. Позволяло находить документы с этим грифом на сайте Думы РФ и других ресурсов.
book(текст искомой книги)	**book The Lord of the Rings**
bphonebook: (номер телефона)	**bphonebook:номер** поможет найти сайт с указанным номером
weather:(место)	**weather:Москва** выдает погоду в Москве

Сегодня в 10:33

Наконец-то добралась написать отзыв. Это был мой первый отдых с Сержиком, поэтому было очень волнительно, но по прилету домой понимаю, что точно не последний. Настолько компетентных людей в своём деле я давно не встречала. На протяжении всего отдыха он интересовался всем, чем мог помочь. Общение тёплое, не заученными фразами как это бывает. В отеле, за всё время отдыха, к нам не возникло ни одного вопроса... А ещё очень важно то, что на связи был 24 на 7, именно это и позволило ни о чём не беспокоиться. Поэтому для меня уже очевидно, с кем я буду проводить все последующие путешествия)))) Спасибо тебе большое, за то что даешь такую возможность!!!

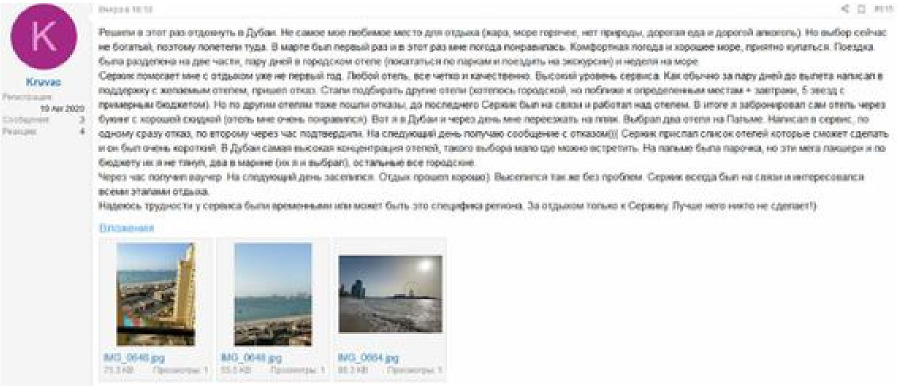
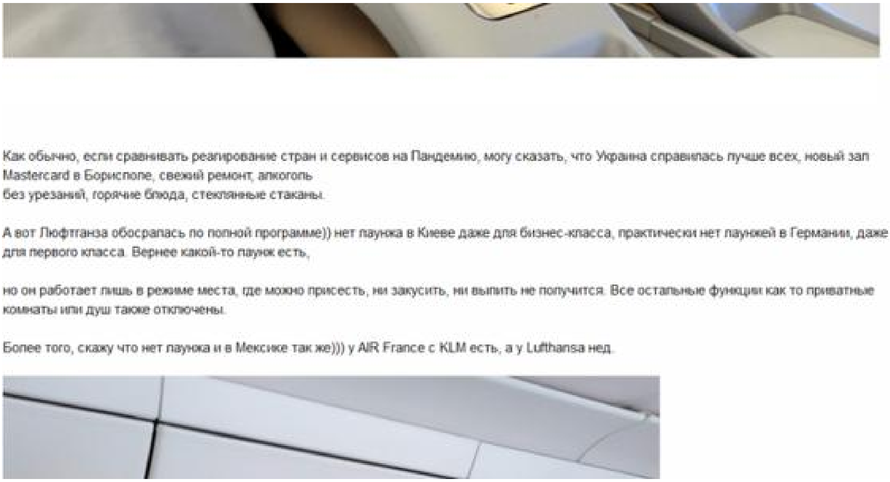
10725



Решили в этот раз отдохнуть в Дубаи. Не самое мое любимое место для отдыха (жара, море горячее, нет природы, дорогая еда и дорогой алкоголь). Но выбор сейчас не богатый, поэтому полетели туда. В марте был первый раз и в этот раз мне погода понравилась. Комфортная погода и хорошее море, приятно купаться. Поездка была разделена на две части, пару дней в городском отеле (покататься по паркам и поездить на экскурсии) и неделя на море.
Сержик помогает мне с отдыхом уже не первый год. Любой отель, все четко и качественно. Высокий уровень сервиса. Как обычно за пару дней до вылета написал в поддержку с желаемым отелем, пришел отказ. Стали подбирать другие отели (хотелось городской, но поближе к определенным местам + завтраки, 5 звезд с примерным бюджетом). Но по другим отелям тоже пошли отказы, до последнего Сержик был на связи и работал над отелем. В итоге я забронировал сам отель через букинг с хорошей скидкой (отель мне очень понравился). Вот я в Дубаи и через день мне переезжать на пляж. Выбрал два отеля на Пальме. Написал в сервис, по одному сразу отказ, по второму через час подтвердили. На следующий день получаю сообщение с отказом(((Сержик прислал список отелей которые сможет сделать и он был очень короткий. В Дубаи самая высокая концентрация отелей, такого выбора мало где можно встретить. На пальме была парочка, но эти мега пафосные и по бюджету их я не тянул, два в марине (их я и выбрал), остальные все городские.
Через час получил ваучер. На следующий день заселился. Отдых прошел хорошо). Выселился так же без проблем. Сержик всегда был на связи и интересовался всеми этапами отдыха.
Надеюсь трудности у сервиса были временными или может быть это специфика региона. За отдыхом только к Сержику. Лучше него никто не сделает!)

10726



Как обычно, если сравнивать реагирование стран и сервисов на Пандемию, могу сказать, что Украина справилась лучше всех, новый зал Mastercard в Борисполе, свежий ремонт, алкоголь
без урезаний, горячие блюда, стеклянные стаканы.

А вот Люфтганза обосралась по полной программе)) нет лаунжа в Киеве даже для бизнес-класса, практически нет лаунжей в Германии, даже для первого класса. Вернее какой-то лаунж есть,

но он работает лишь в режиме места, где можно присесть, ни закусить, ни выпить не получится. Все остальные функции как то приватные комнаты или душ также отключены.

Более того, скажу что нет лаунжа и в Мексике так же))) у AIR France с KLM есть, а у Lufthansa нед.

DNS through Prox

Proxifier DNS settings

☐ Detect DNS settings automatically

☑ Resolve hostnames through proxy

☐ Try to resolve via local DNS service first
(this option may cause significant delays if local DNS is unavailable!)

Note

It is impossible to get real IP addresses through proxy.
Proxifier assigns "fake" IP addresses (127.8.*.*) that are only valid when it is running.

DNS exclusion list

Do not resolve the following hostnames through proxy:

%ComputerName%; localhost; *.local

Example:
localhost; *.example.com; %ComputerName%; %SimpleHostnames%

Но зато Серёжик сделает Вам самый респектабельный отель, 550 $ за ночь в самом центре Мехико? 43 этаж пентхауз - не вопрос! Ночь обойдётся Вам в 250 $ максимум, и это просто фантастика,

никаких проблем и никаких вопросов.

20201103_205930.mp4

В Мехико полиция ездит на бронетранспортёрах с противотанковыми пулемётами...) весело прям, идёшь идёшь - а из за угла вот такой конвой выезжает.

Редактирование оплачиваемого задания

Описание оплачиваемого задания

Название: Скачать игру на Android и поиграть 5 минут

Описание задания:

```
Простое и хорошо оплачиваемое задание!

1. Возьмите в руки телефон
2. Перейдите на нем по ссылке [[Ссылка]]
3. Скачайте игру
4. Запустите игру и поиграйте в нее 5-10 минут
5. Для подтверждения пришлите фото экрана с игрой
```

Ссылка на сайт:

Доп. ссылки: 0 ссылок [добавить] [настроить]

Тип задания:

Повтор каждые XX ч.:

Повторное выполнение задания до проверки:

Механизм проверки задания

Механизм проверки: Ручной режим

Внимание! В описании задания Вы должны указать информацию, которую пользователь должен Вам отправить для проверки выполнения задания.

Настройка выполнения заданий

Выполнений за сутки: 0 (0 - без ограничений)

Стоимость выполнения: 0.1 $ (минимум 0.01$)

Вчера в 12:08 #548

В очередной раз обращался к Сержику по поводу бронирования отеля в Турции. Все прошло гладко. Сержик был постоянно на связи. Рекомендую.

Понедельник в 10:51 #545

Добрый день, всем!
Уже не первый раз путешествию с Serggik00 и всегда он только радует! каждый раз какие-нибудь подарки и бонусы, карты и так далее)
просто красавчик! Тьфу тьфу тьфу - ни разу не было слетов или проблем. Всегда на связи - что не может не радовать! просто профи!

В общем не нужно много слово - просто попробуйте и оцените качество и сервис =) будете в восторге однозначно!

Один вид из ресторана на завтраке чего стоил....уффф =)

В общем лучше не читать отзывы, а взять и поехать)

Дольше времени тратишь на подбор отеля, чем Serggik00 его для вас забронирует) спасибо

First Check Any site which you want to Crack.
It support proxies or proxyless.
Easy method is too check any Site just write anything in username and password and Enter again and again than you see if any site is With proxies it show you message like you ip banned or something like that, If it not show this message it mean its proxyless.
My target is Iptorrents.com only For noobs and easy way to make your configs.

#561

Времена тяжелые ныне)

мои кругосветки по 50 дней отошли немного на второй план, с границами беда, потому представляю Вам, 11 дневное путешествие в Мексику, которое содежит в себе всего 2 отеля,
машину на прокат, 5 перелётов (а не 28 как у меня обычно бывает)

план прилететь в Мехико сити, через Франкфурт с Киева, взять машину - приехать в Канкун сделав по Мексике около 2600 км посещая всяческие достопримечательности.

10768

Для получения многих сертификатов требуется, чтобы вы уже имели определенный опыт. Это означает, что вы не сможете пройти эти сертификации в самом начале своей карьеры.

CISSP должен быть первым сертификатом, на который вам следует нацелиться в начале своей карьеры. После сдачи экзамена на CISSP, я рекомендую вам сразу же сдать экзамен на сертификат CISA, поскольку в них много общего материала и легко сдавать оба экзамена один за другим. Далее идет CISM. Далее другие специализации, перечисленные ниже.

Расширенная общая безопасность

CISSP - Certified Information Systems Security Professional

ISO 27001 lead implementer

Аудит безопасности

ISO 27001 lead auditor

CISA - Certified Information Systems Auditor

PCI QSA qualifications

Тестирование на проникновение

CEH - Certified Ethical Hacker
(Средний уровень)

OSCP - Offensive Security Certified Professional

(Продвинутый уровень)

CREST for UK penetration testing

Crest CRT, Crest CCT, CHECK, Tigerscheme - Check Team Member, Tigerscheme - Check Team Leader

GPEN - GIAC Certified Penetration Tester

GWAPT - GIAC Web Application Penetration Tester

Менеджмент безопасности / CISO

CISM - Certified Information Security Manager

MBA/Masters Degree in security

Архитектура информационной безопасности предприятия / CISO

SABSA - Sherwood Applied Business Security Architecture

(Настоятельно рекомендован)

Сетевая безопасность

Cisco Security - CCNA Security
(Начальный уровень)
CCNP Security (Средний)
CCIE Security (Экспертный)

Hey bro, i saw your post in your thread in the escrow area saying that HFR is a scam and that you didn't received any money.
So, are you really telling the truth or just joking ?!
Have you received the money already or not ?!
Can you show proof that they are just scammers or you just joking ?!

Will appreciate if you can explain why you said they are scammers, thanks.

Yes they are SCAMMERS.
They wrote me about successful receive. But edited post and SCAM message wrote by me.
Come here through 12-16 hours and view this post.
I was at that time go to BAN and lose access to my account.

Hi,

Thank you for reporting this to us.

Your transaction has been pushed and your funds are now available.

We apologize for the inconvenience!

Best regards,
LocalBitcoins

[redacted] 50 minutes ago

Hello. I have some weird problem, I just made a 0.513 Btc deposit to my localbitcoins address - [redacted] but it wasn't added to my account. I can still see my deposit in the "incoming transactions" with "Undefined" estimated time of confirmation. Can you fix this transaction please? It's a lot of money which I need to sell quickly but I am unable to access the funds now. Thanks

Receive bitcoins

Give out the bitcoin address below to receive bitcoins.

[redacted]

Press CTRL + C or ⌘ + C to copy the bitcoin address.

This address will expire in 12 months. A new one will be automatically generated.

You have incoming transactions:

Time	Address	BTC	Confirmed in about
2 a.m	[redacted]	0.513	Undefined

Incoming transactions and fees

Current deposit fee for incoming transactions: **0.00015** BTC

Receiving Bitcoin usually takes 30 minutes, however it can take up to 14 days or longer. An incoming transaction needs to receive 3 Bitcoin network confirmations to appear in your wallet. You can find out more in our FAQ.

мелкому так чтобы проверить тебя, а ты убедился что и я намерян работать серьезно. В моих интересах чтобы ты работал на постоянной основе. 19:58

Готов предоплату залить на гарант 19:59

Так устроит? 20:00

С гарантом работать не буду так как это полшейший бред. Через гаранта можно игры продавать, но не карты обналичивать. Или же гарант будет стоять с тобой у банкомата и смотреть все как ты делаешь? Ибо в ином случаи ты просто скажешь гаранту что никаких денег небыло! Да и что это за гаранты вообще такие.. 20:00

Можешь рискруть, можешь отказаться 20:01

Новичок

В ICQ ИГНОРИШЬ МЕНЯ.
ОК.
За тобой долг в 6548 с 12 мая. Прошло больше месяца уже.
До 18:00 по МСК жду ответ со сроками возврата. Если там же игнор - открываю арбитраж и решаем все там.

Новичок

Прошу бронирование до 29 или максимум до 02.7 отдам деньги

Nosok Proxy

Обновляемый список

Обновляемый список прокси с возможностью фильтрации по странам, пингу и аптайму. Если прокси уходит в оффлайн, вместо него будет использован любой случайный прокси на этом же порту. Рекомендуем использовать для минимизации ошибок. Не рекомендуется использовать в ситуациях когда необходимо сохранить регион при переключении прокси.

Обновляемый список без замены

Обновляемый список прокси без замены. Обновляемый список прокси с возможностью фильтрации по странам, пингу и аптайму. Если прокси уходит в оффлайн, то порт становится недоступным и любые последующие запросы к прокси будут выдавать ошибку подключения. Рекомендуется использовать в ситуациях когда необходимо сохранить регион при переключении прокси.

Статичный список

Статичный список из 25000 прокси с автоматической заменой. Рекомендуется использовать в программах, которые не поддерживают автоматическое обновление прокси листа по ссылке. Доступно скачивание прокси текстовым файлом.

Ротация каждые 10 минут

Статичный список из 5000 прокси. Каждые 10 минут происходит переназначение выходных IP на всех портах.

Случайный IP

Статичный список из 1000 прокси, каждое подключение к прокси происходит через случайный выходной IP.

ТОП 1000

Статичный список из 1000 самых быстрых прокси в системе.

БЕСПЛАТНЫЙ ТЕСТ!

Task board

To receive payments, you need to complete the following tasks as required by Indian regulations. You can start with any task.

Tasks	Details	Status
Provide PAN	The PAN information you provide will be verified. Please make sure your PAN information is correct.	✓ Complete
Confirm email	Confirm your email to receive payments.	✓ Complete
Add bank account	By adding a bank account you can receive funds and withdraw it. Once you add a Bank account, PayPal will send two small deposits to the bank account within 3-5 business days. Please log in to your PayPal account, and enter the two amounts to lift your sending and withdrawal limit.	✓ Complete
Provide Purpose Code	Your Purpose Code indicates the nature of business for which you receive payments into your PayPal Account. Please make sure you select the Purpose Code that accurately describes your business transactions. This is required as per Indian regulations.	✓ Complete

Мы работаем в двух направлениях и предоставляем услуги:

VPN

Ваш безопасный интернет в любой точке земного шара, откроет доступ к любому заблокированному сайту и сделает Вас анонимным. Работает с любыми приложениями на мобильных устройствах и на компьютерах

PROXY

Приватные, анонимные, элитные прокси по логину и паролю, а также с привязкой по IP-адресу. Работают с любым браузером и приложением, идеально подходят для работы с VKBOT, AVITO и не только

карте?
19:55

Смотри, у меня есть карта на 2000грн с копейками. Я могу тебе ее отправить скажем так чтобы начать с мелкого. Получаешь ты ее бесплатно без какой либо наложки на почте (был бы я кидок отправил бы конечно наложкой) а так на доверии. После получения ты платишь 500грн и получаешь ПИН. После получения обналичиваешь ее и отдаешь еще 500грн. Тобиж уйдешь в + на 1000грн. Далее будут суммы больше и карты идти партиями. Это на первый раз по мелкому так чтобы проверить тебя, а ты убедился что и я намерян работать серьезно. В моих интересах чтобы ты работал на постоянной основе.
19:58

Готов предоплату залить на гарант

Cybercrime service automates creation of fake scanned IDs, other verification docs

The service produces high-quality fake scans that can be used in fraud attacks to impersonate victims, Group-IB researchers said

By **Lucian Constantin**
Romania Correspondent, CSO
AUG 27, 2013 8:00 AM PT

A new Web-based service for cybercriminals automates the creation of fake scanned documents that can help fraudsters bypass the identity verification processes used by some banks, e-commerce businesses and other online services providers, according to researchers from Russian cybercrime investigations firm Group-IB.

The service can generate scanned copies of passports, ID cards and driver's licenses from different countries for identities supplied by the service users, fake scanned utility bills from various companies, as well as fake scanned copies of banking statements and credit cards issued by a large number of banks, said Andrey Komarov, head of international projects at Group-IB, via email.

It is common practice for banks, payment and money transfer providers, online gambling sites and other types of businesses that engage in money transactions via the Internet to ask their customers for scanned copies of documents in order to prove their identities or verify their physical addresses, especially when their anti-fraud departments detect suspicious account activity.

Fake CNN Alert Still Spreading Malware

By Gregg Keizer

Computerworld

AUG 9, 2008 11:24 AM PT

The massive attack that has infected PCs by tricking users into clicking links in fake messages from CNN.com shows little sign of ending soon, security researchers say.

According to MX Logic Inc. , spam posing as CNN.com Top 10 lists peaked at close to 11 million messages per hour early Thursday, but remained at high volumes throughout the day Friday. The Colorado security vendor said it had been tracking an average of 8 million messages per hour since midnight.

MX Logic's vice president of information security, Sam Masiello , called the trend "a very slow, but steady decline" from the 11 a.m. Mountain Time peak the day before.

[Further reading: How the new age of antivirus software will protect your PC]

Masiello also said that the spam has changed since attacks were first launched on Tuesday. "We've also seen several morphs of this spam over the past couple of days," he said in an entry posted on the MX Logic blog Friday . Where the messages once trumpeted " CNN .com Daily Top 10" in the subject heading and linked to a single filename on malware-hosting sites, now the spam sports a subject reading "CNN Alerts: My Custom Alert" and uses a variety of filenames in the malicious URL.

Customizable Mobile Number Harvesting Service Found on Underground Market

Start searching now... GO

The information can be used for SMS spam campaigns

Advertisement

WORLD of TANKS
PLAY FOR FREE

Jul 4, 2013 13:51 GMT · By Eduard Kovacs · Share:

Security experts have come across a new mobile number harvesting service that allows users to fully customize the type of information they want to collect. The collected information can then be utilized to drive SMS spam campaigns that rely on specialized services.

Identified by Webroot's Dancho Danchev in the underground market, the mobile number harvesting service can be used to collect information based on region, types of companies, age, interests, work position, gender and other options.

According to the service's operators, it takes up to 12 hours to harvest between 1,000 and 35,000 phone numbers, and it takes between 72 and 86 hours if the customer wants over 50,000 numbers based on certain criteria.

The individuals that advertise the service accept payment via WebMoney, which shows that experts might have been right when they said that cybercriminals might slowly migrate back to WebMoney now that Liberty Reserve was out of the picture.

"We expect to continue observing an increase in vendors offering cybercrime-as-a-service solutions with vertical market integration in mind, in an attempt by the cybercriminals operating them to occupy an even bigger market share within the TDoS and the SMS spam market segments," Danchev explained.

Spammers unleash DIY phone number slurping web tool

Well it is Valentine's Day... How else are you going to get those digits?

By John Leyden 14 Feb 2013 at 17:03

Mobile spammers have released a DIY phone number harvesting tool, but instead of advertising it solely on criminals-only online hangouts, they're trying to flog it out in the open.

The availability of the utility turns the simple act of submitting a mobile number to a website something that might lead to the receipt of more SMS (text message) spam.

A new version of the phone number harvesting tool crawls the web and indexes mobile numbers, phone ID numbers, the names of the owner, and the associated mobile operator - among other information. Users of the tool can choose which country they want to target.

The harvested information is later used for various malicious and fraudulent purposes.

Key features of the tool include automatic recognition of Russian and Ukrainian mobile phone providers (based on its initial target market), indexing based on a region and city for both Russia and Ukraine, multi-threaded software allowing up to 100 "indexing streams", as well as an option to collect only numbers attached to a particular mobile provider.

"Cybercriminals and spammers are not strangers to the concept of market segmentation," explained Dancho Danchev, a security researcher at Webroot, in a blog post.

"Just like true marketers, the developer of the tool has included the option to choose a specific region within the available countries, with the idea to assist in the inevitable malicious and fraudulent activity that will result from this phone number harvesting activity."

Danchev advises surfers to double-check whether any website that requests your phone number is actually listing it on the web. The phone number harvesting tool has yet to crawl through sites that require authorisation or spread outside Russia and the Ukraine, he said, but future versions are likely to expanding indexing capabilities and geographical reach, Danchev warned.

Mass website hacking tool alerts to dangers of Google dorks

Google dorks are not geeks who love the internet-related services and products provider. Google dorks are akin to super-specific searches, which attackers have been known to take advantage of in attempts to expose vulnerable websites.

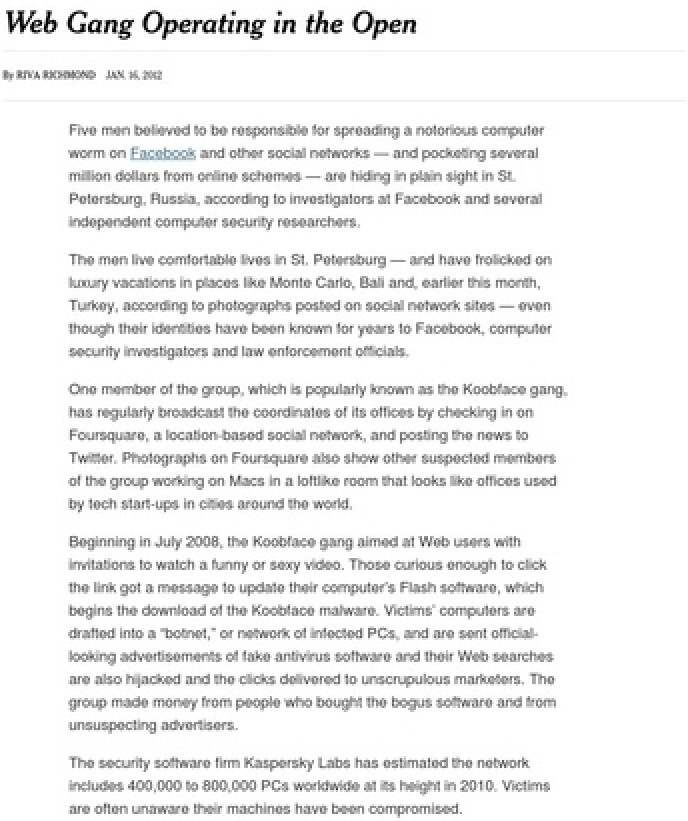
Cyber crime researcher Dancho Danchev recently blogged about a mass, do-it-yourself (DIY) website-hacking tool making the rounds that takes advantage of those Google dorks.

"The proxy supporting tool has been purposely designed to allow automatic mass websites reconnaissance for the purpose of launching SQL injection attacks against those websites that are vulnerable," Danchev wrote.

SQL stands for structured query language and is programming terminology designed for managing data. SQL injection typically involves an attacker inputting SQL statements into an entry field that will force the system to execute potentially malicious commands.

"Once a compromise takes place, the attacker is in a perfect position to inject malicious scripts on the affected sites, potentially exposing their users to malicious client-side exploits serving attacks," according to Danchev.

Danchev wrote that an escalating number of DIY tools circulating the internet may open the door for novice attackers, but Barry Shteiman, director of security strategy with Imperva, told SCMagazine.com on Tuesday that it is the Google dorks that should be raising alarms.



Web Gang Operating in the Open

By RIVA RICHMOND JAN. 16, 2012

Five men believed to be responsible for spreading a notorious computer worm on Facebook and other social networks — and pocketing several million dollars from online schemes — are hiding in plain sight in St. Petersburg, Russia, according to investigators at Facebook and several independent computer security researchers.

The men live comfortable lives in St. Petersburg — and have frolicked on luxury vacations in places like Monte Carlo, Bali and, earlier this month, Turkey, according to photographs posted on social network sites — even though their identities have been known for years to Facebook, computer security investigators and law enforcement officials.

One member of the group, which is popularly known as the Koobface gang, has regularly broadcast the coordinates of its offices by checking in on Foursquare, a location-based social network, and posting the news to Twitter. Photographs on Foursquare also show other suspected members of the group working on Macs in a loftlike room that looks like offices used by tech start-ups in cities around the world.

Beginning in July 2008, the Koobface gang aimed at Web users with invitations to watch a funny or sexy video. Those curious enough to click the link got a message to update their computer's Flash software, which begins the download of the Koobface malware. Victims' computers are drafted into a "botnet," or network of infected PCs, and are sent official-looking advertisements of fake antivirus software and their Web searches are also hijacked and the clicks delivered to unscrupulous marketers. The group made money from people who bought the bogus software and from unsuspecting advertisers.

The security software firm Kaspersky Labs has estimated the network includes 400,000 to 800,000 PCs worldwide at its height in 2010. Victims are often unaware their machines have been compromised.

Sony PlayStation site victim of SQL-injection attack

Automated attack claims another high-profile target, offering sale of a fake antivirus scanner.

BY **ROBERT VAMOSI** / JULY 2, 2008 11:58 AM PDT

T · · Mobile ·

FORCE
Pre-order now

Early Wednesday, antivirus vendor Sophos reported that some visitors to the Sony PlayStation site may have been prompted to download an antivirus scanner.

Pages promoting the PlayStation games SingStar Pop and God of War contained SQL-injected code. Visitors to those specific game pages would see a fake antivirus scan, then a message that their computer was infected with different viruses and Trojan horses. Warned, the user would then be asked to purchase the scanner to remove the bogus malware.

The injected code linking to the scanner has since been removed.

Sophos said the attack could have downloaded malicious payloads, but did not.

Security researcher Dancho Danchev said in his ZDNet blog that Sony wasn't alone. It was one of 794 domains hit in the latest automated SQL-injection campaign using a multilayer fast-flux superstructure built around coldwop.com. Over the last 90 days, Google reports that 794 domains have been infected with code pointing to that domain. These are legitimate sites with vulnerabilities that allow criminal hackers to inject code pointing to their servers.

Fake CNN Alert Still Spreading Malware

By Gregg Keizer
Computerworld
AUG 9, 2008 11:24 AM PT

The massive attack that has infected PCs by tricking users into clicking links in fake messages from CNN.com shows little sign of ending soon, security researchers say.

According to MX Logic Inc. , spam posing as CNN.com Top 10 lists peaked at close to 11 million messages per hour early Thursday, but remained at high volumes throughout the day Friday. The Colorado security vendor said it had been tracking an average of 8 million messages per hour since midnight.

MX Logic's vice president of information security, Sam Masiello , called the trend "a very slow, but steady decline" from the 11 a.m. Mountain Time peak the day before.

[Further reading: How the new age of antivirus software will protect your PC]

Masiello also said that the spam has changed since attacks were first launched on Tuesday. "We've also seen several morphs of this spam over the past couple of days," he said in an entry posted on the MX Logic blog Friday . Where the messages once trumpeted " CNN .com Daily Top 10" in the subject heading and linked to a single filename on malware-hosting sites, now the spam sports a subject reading "CNN Alerts: My Custom Alert" and uses a variety of filenames in the malicious URL.

"This is likely in response to all of the media attention and awareness that has been brought up over the past couple of days," Masiello speculated.

Also on Friday, Websense Inc. reported that its researchers had seen the attack mutating, with the spam subject heading not only touting "CNN Alerts: My Custom Alert," but also using legitimate news stories culled from CNN to make the messages more convincing.

Users who clicked on the "FULL STORY" link in the message were redirected to a fake CNN site, where they were told they needed to download an update to Flash Player, Adobe System Inc. 's popular Internet media player, to view a video clip from CNN.

Websense also said it had spotted traces of the campaign in blog spam.

SponsoredPost Sponsored by Microsoft
What's next for cloud and cognitive technologies
From bots to big data, cloud technologies spur today's innovation and tomorrow's bottom line. Our survey results reveal why.

If users agreed to download the bogus Flash update, they were trapped in an endless loop, where clicking "Cancel" in the initial dialog produced a second pop-up. Clicking "Cancel" there returned the user to the first pop-up. The only options at that point were for users to shut down the browser or give in and install the malware.

MX Logic added that it had seen the URLs in the spam lead to legitimate domains that had probably been compromised, and named a U.K.-based roofing company as an example.

Earlier this week, Bulgarian security researcher Dancho Danchev had found

OPINION

Crimeware gets worse - How to avoid being robbed by your PC

The malware threat to Windows computers continues to get worse. So much so, there's a new term to describe malicious software that transfers money from online accounts at financial services companies - crimeware.

Last week, an article at Technology Review told about a construction firm that had $447,000 taken out of their bank account by crimeware software on one of their computers. What makes this story particularly interesting is that the unnamed bank employed one time passwords.

Perhaps you've seen the small key fobs that display a new password every minute. If you don't have the key fob, you can't logon. But the computer was already infected and was being used by a legitimate user. Retina scanners would not have prevented the crime.

While the well-verified user was logged on, making legitimate transfers, the crimeware software generated 27 transfers in the space of a few minutes. According the firms president "They not only got into my system here, they were able to ascertain how much they could draw, so they drew the limit". It can't get any worse.

What to do?

Dancho Danchev suggests setting "daily, weekly or monthly account transaction limits", assuming your financial institution allows it. He also suggests being notified of transactions via SMS.

Spammers unleash DIY phone number slurping web tool

Well it is Valentine's Day... How else are you going to get those digits?

By John Leyden 14 Feb 2013 at 17:03

Mobile spammers have released a DIY phone number harvesting tool, but instead of advertising it solely on criminals-only online hangouts, they're trying to flog it out in the open.

The availability of the utility turns the simple act of submitting a mobile number to a website something that might lead to the receipt of more SMS (text message) spam.

A new version of the phone number harvesting tool crawls the web and indexes mobile numbers, phone ID numbers, the names of the owner, and the associated mobile operator - among other information. Users of the tool can choose which country they want to target.

The harvested information is later used for various malicious and fraudulent purposes.

Key features of the tool include automatic recognition of Russian and Ukrainian mobile phone providers (based on its initial target market), indexing based on a region and city for both Russia and Ukraine, multi-threaded software allowing up to 100 "indexing streams", as well as an option to collect only numbers attached to a particular mobile provider.

"Cybercriminals and spammers are not strangers to the concept of market segmentation," explained Dancho Danchev, a security researcher at Webroot, in a blog post.

"Just like true marketers, the developer of the tool has included the option to choose a specific region within the available countries, with the idea to assist in the inevitable malicious and fraudulent activity that will result from this phone number harvesting activity."

Danchev advises surfers to double-check whether any website that requests your phone number is actually listing it on the web. The phone number harvesting tool has yet to crawl through sites that require authorisation or spread outside Russia and the Ukraine, he said, but future versions are likely to expanding indexing capabilities and geographical reach, Danchev warned.

The DIY phone number harvesting tool is an example of a wider trend of selling tools that once were exclusively available to sophisticated cybercriminals to less elite cybercrooks though underground forums. Services that offers a means to launch managed SMS flooding and phone ring flooding have recently become available through these forums. Both managed SMS flooding and phone ring flooding are pitched as a means to "take care of your competitor's phone lines" or a DDoS attack on phones instead of websites. However, these services might easily lend themselves to helping along more ambitious scams, such as flooding out a bank's call centres to prevent early reports of card fraud cash-out operations, according to Webroot.

"By starting to advertise these very same malicious (DIY) tools and services on publicly accessible forums, they're proving that they're willing to sacrifice a certain degree of OPSEC (Operational Security) for the sake of growing their business model and attracting new customers," Danchev reports. ®

The Rise of Malware as a Service (MaaS)

February 18, 2013 · botnets, images, Security, Software

- authors Pierluigi Paganini

The Internet is becoming a mine for criminals that is an easy way to access to any kind of resources or to arrange a cyber attacks, a cyber espionage campaign or complex banking and identity fraud.

What is very frightening is the simplicity with which it is possible to acquire any kind of criminal services in the underground and the creativity of cyber criminals that are able to offer a business model that is both efficient and inexpensive. This is especially true of the Russian criminal underground which is the one that is considered the most active globally.

In the last month various malicious campaigns have been launched by cyber criminals with specific intent to infect the largest number of machines composing dangerous botnets. The availabilities of a great number of infected machines translates into the availability of valuable resources and services to be marketed by cybercrime organizations.

Cyber criminals are offering malware-infected-hosts, also known as "loads", in a new business model that proposes the monetization of botnet activities through renting of the compromised systems. Of course the services offered are totally customizable, clients can choose the type of malware that infects the victims and their geographic location, it is possible rent US-based malware infected hosts or machine in European Union.

Security expert Dancho Danchev in a post on Webroot threat blog revealed newly launched underground service offering access to thousands of malware-infected machine for unsettlingly low prices, a thousand US-based hosts costs $200 meanwhile for a thousand EU-based hosts price varies between $60/$120, and the price for a thousand international mix type of hosts is $20.

Cybercrime service automates creation of fake scanned IDs, other verification docs

The service produces high-quality fake scans that can be used in fraud attacks to impersonate victims, Group-IB researchers said

By **Lucian Constantin**
Romania Correspondent, CSO
AUG 27, 2013 8:00 AM PT

A new Web-based service for cybercriminals automates the creation of fake scanned documents that can help fraudsters bypass the identity verification processes used by some banks, e-commerce businesses and other online services providers, according to researchers from Russian cybercrime investigations firm Group-IB.

The service can generate scanned copies of passports, ID cards and driver's licenses from different countries for identities supplied by the service users, fake scanned utility bills from various companies, as well as fake scanned copies of banking statements and credit cards issued by a large number of banks, said Andrey Komarov, head of international projects at Group-IB, via email.

It is common practice for banks, payment and money transfer providers, online gambling sites and other types of businesses that engage in money transactions via the Internet to ask their customers for scanned copies of documents in order to prove their identities or verify their physical addresses, especially when their anti-fraud departments detect suspicious account activity.

[**Related:** 4 places to find cybersecurity talent in your own organization]

Using image manipulation software to change the photo, name and other details on a scanned ID is obviously not a new practice, but services like the one identified by Group-IB that automate the whole process and produce high-quality results are new on the cybercriminal market, Komarov said.

According to Group-IB, the service is provided through a website hosted on a server in Germany. The domain name was registered in May, but the service was launched in mid-August, Komarov said.

Independent cybercrime researcher Dancho Danchev described a very similar service in a July blog post; however, Komarov could not confirm whether it is the same one because there was no reference to the service's domain name in Danchev's report.

The service found by Group-IB has templates for passports, ID cards and driver's licences for the U.S., Canada, Russia, the U.K., Germany, the Netherlands and other European Union countries. It also has templates for bank statements, credit cards -- front and back -- and utility bills from banks and utility companies operating in those countries.

The templates are for documents and cards that show signs of use and are scanned at different angles and different positions on the canvas. This makes the resulting image appear more authentic.

by Adam Greenberg, Senior Reporter

November 05, 2013

Mass website hacking tool alerts to dangers of Google dorks

Google dorks are not geeks who love the internet-related services and products provider. Google dorks are akin to super-specific searches, which attackers have been known to take advantage of in attempts to expose vulnerable websites.

Cyber crime researcher Dancho Danchev recently blogged about a mass, do-it-yourself (DIY) website hacking tool making the rounds that takes advantage of those Google dorks.

"The proxy supporting tool has been purposely designed to allow automatic mass websites reconnaissance for the purpose of launching SQL injection attacks against those websites that are vulnerable," Danchev wrote.

SQL stands for structured query language and is programming terminology designed for managing data. SQL injection typically involves an attacker inputting SQL statements into an entry field that will force the system to execute potentially malicious commands.

"Once a compromise takes place, the attacker is in a perfect position to inject malicious scripts on the affected sites, potentially exposing their users to malicious client-side exploits serving attacks," according to Danchev.

Danchev wrote that an escalating number of DIY tools circulating the internet may open the door for novice attackers, but Barry Shteiman, director of security strategy with Imperva, told SCMagazine.com on Tuesday that it is the Google dorks that should be raising alarms.

"The reason Google dorks have gotten so popular is because they create the threat landscape of finding targets," Shteiman said, explaining that he regularly uses Google dorks in his research to see the scale of a particular issue. "If I know of an exploit, Google will find those targets."

The problem is that people want Google to index their websites so it can be found in a regular search, Shteiman said. He explained that website owners can, and should, mask things about their sites by removing certain tags and not letting the public know what kinds of systems run under the hood.

"It's a huge a problem," Shteiman said. "I believe that most hackers use these techniques because they are looking for easy money. Why would I go into a website and start digging when I can do it the other way around. You're reversing the wheel and making your life very easy."

Shteiman most recently took advantage of Google dorks when researching an exploit in certain versions of vBulletin. He discovered that 35,000 websites using the proprietary internet message board software were vulnerable to a flaw that allowed hackers to create new admin accounts.

Customizable Mobile Number Harvesting Service Found on Underground Market

The information can be used for SMS spam campaigns

WORLD of TANKS PLAY FOR FREE

Jul 4, 2013 13:51 GMT · By Eduard Kovacs · Share:

Security experts have come across a new mobile number harvesting service that allows users to fully customize the type of information they want to collect. The collected information can then be utilized to drive SMS spam campaigns that rely on specialized services.

Identified by Webroot's Dancho Danchev in the underground market, the mobile number harvesting service can be used to collect information based on region, types of companies, age, interests, work position, gender and other options.

According to the service's operators, it takes up to 12 hours to harvest between 1,000 and 35,000 phone numbers, and it takes between 72 and 86 hours if the customer wants over 50,000 numbers based on certain criteria.

The individuals that advertise the service accept payment via WebMoney, which shows that experts might have been right when they said that cybercriminals might slowly migrate back to WebMoney now that Liberty Reserve was out of the picture.

"We expect to continue observing an increase in vendors offering cybercrime-as-a-service solutions with vertical market integration in mind, in an attempt by the cybercriminals operating them to occupy an even bigger market share within the TDoS and the SMS spam market segments," Danchev explained.

Spammers unleash DIY phone number slurping web tool

Well it is Valentine's Day... How else are you going to get those digits?

By John Leyden 14 Feb 2013 at 17:03

Mobile spammers have released a DIY phone number harvesting tool, but instead of advertising it solely on criminals-only online hangouts, they're trying to flog it out in the open.

The availability of the utility turns the simple act of submitting a mobile number to a website something that might lead to the receipt of more SMS (text message) spam.

A new version of the phone number harvesting tool crawls the web and indexes mobile numbers, phone ID numbers, the names of the owner, and the associated mobile operator - among other information. Users of the tool can choose which country they want to target.

The harvested information is later used for various malicious and fraudulent purposes.

Key features of the tool include automatic recognition of Russian and Ukrainian mobile phone providers (based on its initial target market), indexing based on a region and city for both Russia and Ukraine, multi-threaded software allowing up to 100 "indexing streams", as well as an option to collect only numbers attached to a particular mobile provider.

"Cybercriminals and spammers are not strangers to the concept of market segmentation," explained Dancho Danchev, a security researcher at Webroot, in a blog post.

"Just like true marketers, the developer of the tool has included the option to choose a specific region within the available countries, with the idea to assist in the inevitable malicious and fraudulent activity that will result from this phone number harvesting activity."

Danchev advises surfers to double-check whether any website that requests your phone number is actually listing it on the web. The phone number harvesting tool has yet to crawl through sites that require authorisation or spread outside Russia and the Ukraine, he said, but future versions are likely to expanding indexing capabilities and geographical reach, Danchev warned.

The DIY phone number harvesting tool is an example of a wider trend of selling tools that once were exclusively available to sophisticated cybercriminals to less elite cybercrooks though underground forums. Services that offers a means to launch managed SMS flooding and phone ring flooding have recently become available through these forums. Both managed SMS flooding and phone ring flooding are pitched as a means to "take care of your competitor's phone lines" or a DDoS attack on phones instead of websites. However, these services might easily lend themselves to helping along more ambitious scams, such as flooding out a bank's call centres to prevent early reports of card fraud cash-out operations, according to Webroot.

"By starting to advertise these very same malicious (DIY) tools and services on publicly accessible forums, they're proving that they're willing to sacrifice a certain degree of OPSEC (Operational Security) for the sake of growing their business model and attracting new customers," Danchev reports. ®

Web Gang Operating in the Open

By RIVA RICHMOND JAN. 16, 2012

Five men believed to be responsible for spreading a notorious computer worm on Facebook and other social networks — and pocketing several million dollars from online schemes — are hiding in plain sight in St. Petersburg, Russia, according to investigators at Facebook and several independent computer security researchers.

The men live comfortable lives in St. Petersburg — and have frolicked on luxury vacations in places like Monte Carlo, Bali and, earlier this month, Turkey, according to photographs posted on social network sites — even though their identities have been known for years to Facebook, computer security investigators and law enforcement officials.

One member of the group, which is popularly known as the Koobface gang, has regularly broadcast the coordinates of its offices by checking in on Foursquare, a location-based social network, and posting the news to Twitter. Photographs on Foursquare also show other suspected members of the group working on Macs in a loftlike room that looks like offices used by tech start-ups in cities around the world.

Beginning in July 2008, the Koobface gang aimed at Web users with invitations to watch a funny or sexy video. Those curious enough to click the link got a message to update their computer's Flash software, which begins the download of the Koobface malware. Victims' computers are drafted into a "botnet," or network of infected PCs, and are sent official-looking advertisements of fake antivirus software and their Web searches are also hijacked and the clicks delivered to unscrupulous marketers. The group made money from people who bought the bogus software and from unsuspecting advertisers.

The security software firm Kaspersky Labs has estimated the network includes 400,000 to 800,000 PCs worldwide at its height in 2010. Victims are often unaware their machines have been compromised.

The Koobface gang's freedom underscores how hard it is to apprehend international computer criminals, even when identities are known. These groups tend to operate in countries where they can work unmolested by the local authorities, and where cooperation with United States and European law enforcement agencies is poor. Meanwhile, Western law enforcement is awash in computer crime and lacks the resources and skilled manpower to tackle it effectively, especially when evidence putting individuals' fingers on keyboards must be collected abroad.

On Tuesday, Facebook plans to announce that it will begin sharing information about the group and how to fight them with security researchers and other Internet companies. It believes public namings can make it harder for such groups to operate and send a message to the criminal underground.

None of the men have been charged with a crime and no law enforcement agencies have confirmed they are under investigation.

The group investigators have identified has adopted the tongue-in-cheek

Sony PlayStation site victim of SQL-injection attack

Automated attack claims another high-profile target, offering sale of a fake antivirus scanner.

BY **ROBERT VAMOSI** / JULY 2, 2008 11:58 AM PDT

T-Mobile Buy one, get one FREE. moto z² FORCE Pre-order now

Early Wednesday, antivirus vendor Sophos reported that some visitors to the Sony PlayStation site may have been prompted to download an antivirus scanner.

Pages promoting the PlayStation games SingStar Pop and God of War contained SQL-injected code. Visitors to those specific game pages would see a fake antivirus scan, then a message that their computer was infected with different viruses and Trojan horses. Warned, the user would then be asked to purchase the scanner to remove the bogus malware.

The injected code linking to the scanner has since been removed.

Sophos said the attack could have downloaded malicious payloads, but did not.

Security researcher Dancho Danchev said in his ZDNet blog that Sony wasn't alone. It was one of 794 domains hit in the latest automated SQL-injection campaign using a multilayer fast-flux superstructure built around coldwop.com. Over the last 90 days, Google reports that 794 domains have been infected with code pointing to that domain. These are legitimate sites with vulnerabilities that allow criminal hackers to inject code pointing to their servers.

T-Mobile Buy one, get one FREE. Pre-order now moto z² FORCE

With fast-flux, a registered domain name stays the same while its node changes frequently, presumably thwarting any attempts to shut down the server hosting malicious content.

Danchev concludes: "If you don't take care of your Web application vulnerabilities, someone else will."

74% OF ENTERPRISES RATE SECURITY AS CRITICAL.

Crimeware gets worse - How to avoid being robbed by your PC

The malware threat to Windows computers continues to get worse. So much so, there's a new term to describe malicious software that transfers money from online accounts at financial services companies - crimeware.

Last week, an article at Technology Review told about a construction firm that had $447,000 taken out of their bank account by crimeware software on one of their computers. What makes this story particularly interesting is that the unnamed bank employed one time passwords.

Perhaps you've seen the small key fobs that display a new password every minute. If you don't have the key fob, you can't logon. But the computer was already infected and was being used by a legitimate user. Retina scanners would not have prevented the crime.

While the well-verified user was logged on, making legitimate transfers, the crimeware software generated 27 transfers in the space of a few minutes. According the firms president "They not only got into my system here, they were able to ascertain how much they could draw, so they drew the limit". It can't get any worse.

What to do?

Dancho Danchev suggests setting "daily, weekly or monthly account transaction limits", assuming your financial institution allows it. He also suggests being notified of transactions via SMS.

Another possibility is creating, up-front, a list of valid payees so that your financial institution won't pay anyone not on the list. I know a company that does this and it protected them from forged paper payroll checks.

Of course, the bank should flag suspicious activity such as: a group transfers just under $10,000, any large outflow of money, a collection of transfers to new, first-time payees or multiple transfers from a new IP address. Maybe someday.

BrandPost Sponsored by Dell EMC-Intel
Defense in Breadth
This puts forth the discussion of how now, as organizations continue to leverage more and more diverse types of cloud-based services, a security mindset needs to be at the center of any cloud strategy.

But when it comes to your computer, there is one obviously best solution.

Do online banking from Linux using Firefox.

You can run Linux on pretty much any computer from a CD, a USB flash drive, an SD card or a Compact Flash card.

Linux is free. You can download any of dozens of different versions (called "distributions") in ISO format and burn them to a CD.

The Rise of Malware as a Service (MaaS)

February 18, 2013 · botnets, images, Security, Software

- authors Pierluigi Paganini

The Internet is becoming a mine for criminals that is an easy way to access to any kind of resources or to arrange a cyber attacks, a cyber espionage campaign or complex banking and identity fraud.

What is very frightening is the simplicity with which it is possible to acquire any kind of criminal services in the underground and the creativity of cyber criminals that are able to offer a business model that is both efficient and inexpensive. This is especially true of the Russian criminal underground which is the one that is considered the most active globally.

In the last month various malicious campaigns have been launched by cyber criminals with specific intent to infect the largest number of machines composing dangerous botnets. The availabilities of a great number of infected machines translates into the availability of valuable resources and services to be marketed by cybercrime organizations.

Cyber criminals are offering malware-infected hosts, also known as "loads", in a new business model that proposes the monetization of botnet activities through renting of the compromised systems. Of course the services offered are totally customizable, clients can choose the type of malware that infects the victims and their geographic location, it is possible rent US-based malware infected hosts or machine in European Union.

Security expert Dancho Danchev in a post on Webroot threat blog revealed newly launched underground service offering access to thousands of malware-infected machine for unsettlingly low prices, a thousand US-based hosts costs $200 meanwhile for a thousand EU-based hosts price varies between $60-$120, and the price for a thousand international mix type of hosts is $20.

The different prices applied are calculated based on purchasing power and long-term value of a malware infected host, US users are considered by cybercriminal organization the most wealthy, the pricing policy varies, so in many cases the malicious services are sold to US users at higher prices. I add that probably there are also other considerations behind cost evaluation such as specificity of the demand in specific areas and cost to maintain alive botnet in countries in which cyber security is more responsive.

Dancho Danchev a couple of years ago conducted an interesting study on botnet renting:

> *"The logical shift from static pricing lists, to the embracing of multiple pricing schemes such as price discrimination (differentiated pricing), or penetration pricing, naturally resulted in different prices for different targeted groups."*

What are the principal uses of thousands of infected hosts?

Typically the criminals are interested in the arrangement of cyber frauds and so large number of machines is used for launching related

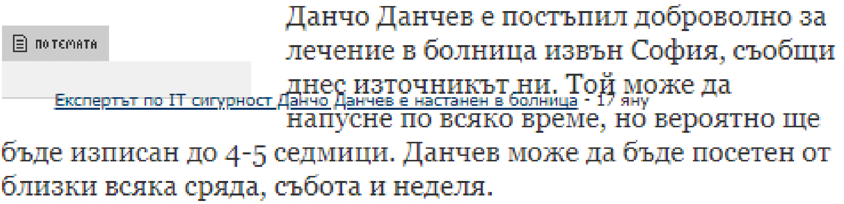
Dancho Danchev’s Private Party - Sample Video (2021-10-02 01:21)

Dear blog readers,

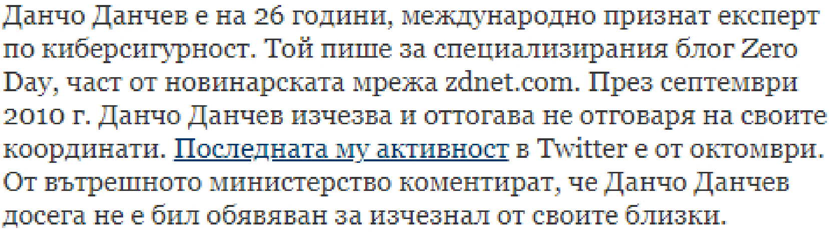
I’ve decided to share with everyone a personal private video from a New Year’s celebration.

Stay tuned!



Данчо Данчев е постъпил доброволно за лечение в болница извън София, съобщи днес източникът ни. Той може да напусне по всяко време, но вероятно ще бъде изписан до 4-5 седмици. Данчев може да бъде посетен от близки всяка сряда, събота и неделя.

по темата
Експертът по IT сигурност Данчо Данчев е настанен в болница - 17 яну



Данчо Данчев е на 26 години, международно признат експерт по киберсигурност. Той пише за специализирания блог Zero Day, част от новинарската мрежа zdnet.com. През септември 2010 г. Данчо Данчев изчезва и оттогава не отговаря на своите координати. Последната му активност в Twitter е от октомври. От вътрешното министерство коментират, че Данчо Данчев досега не е бил обявяван за изчезнал от своите близки.

Deep from the Trenches in Bulgaria! - Part Three (2021-10-03 04:26)

[1]

[2]define:dipshit

Dear blog readers,

According to this [3]article I was voluntarily taken into a psychiatric clinic in the town of Lovech

Bulgaria in 2010 while in reality my place was vandalized and trashed including the fact that I was taken by force by three local police officers from the local police department in my home-

town Troyan who illegally stole my personal ID from my place and a made a copy of it out

of my place once again by force and with no witnesses and taken into a car where the final

destination was unknown during the period of my travel and while I asked while I was still in

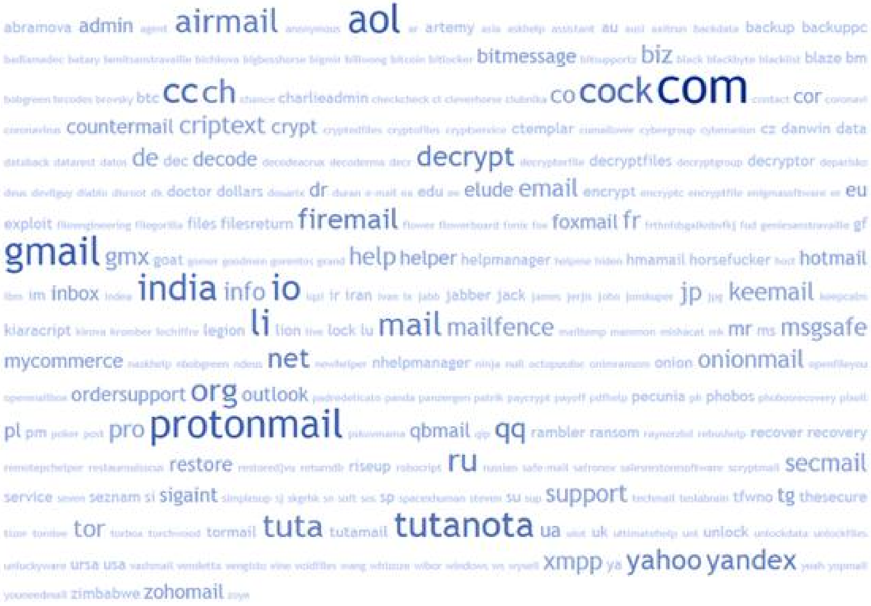
my place who are you and can you show me your ID there was no answer as to where we were

going and what was the reason.

[4]

[5]

10984



Yet another comment from the article states that the Bulgarian Interior Ministry wasn't aware of

the case and that my parents did not file a kidnapping or missing person report while in reality both of my parents travel with me with the local police officers in another car where upon the

travel finished I was asked to actually hand a copy of my personal ID under the presence of

the same local police officers from my hometown Troyan who basically dragged me out of my

place and showed my a copy of my stolen personal ID including a nurse who was present in

the house back in 2010.

Stay tuned!

Profiling a Currently Active High-Profile Cybercriminals Portfolio of Ransomware-Themed Extortion Email Addresses - Part Three (2021-10-03 14:40)

Dear blog readers,

10985

This is Dancho and I’ve decided to share yet another [1]compilation of ransomware themed

emails involved in currently ongoing malicious and fraudulent campaigns with the idea to take

them offline potentially causing financial and related issues to the individuals behind these

campaigns.

Sample currently active list of ransomware themed email addresses:

"Exposing Protonmail and Tutanota's Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active Ransomware-Themed Email Addresses - Part Three

(2021-10-03 14:41)

[1]

Dear blog readers,

This is Dancho and I've decided to share yet another currently active [2]Tutanota ransomware themed email address accounts with the idea to attempt to take them offline potentially causing financial and related issues to the individuals behind these campaigns.

Sample currently active Tutanota ransomware themed email address accounts known to have been involved in related malicious and fraudulent campaigns:

Dear blog readers,

Check out my new Dark Web Onion address which is - [2]http://
aklw6fojficmu3zqsdsffprbas3kqrhee-

j4ntvynfl5xkrjpqhlq55yd.onion/ wordpress where I intend to continue publishing high-quality

and never-released before cybercrime research and threat intelligence including OSINT

analysis type of research on a daily basis.

Big thanks to everyone visiting my Dark Web Onion on the Dark Web and keep it coming.

Zero Day Exploit Auction

We're a partnership between the world's leading expert in the field of cybercrime research OSINT and threat intelligence gathering Dancho Danchev and one of the Web's most popular destinations for hackers and security experts since 1994 the infamous Astalavista.box.sk where we aim to set the foundationds for a ground-breaking and fully working Zero Day Exploits auction business model where users researchers vendors and companies can buy and sell exploits in an anonymous and fully automated without any sort of supervision fashion where the ultimate goal would be to improve everyone's security and provide the necessary publicity and financial incentive for researchers and users to submit buy and sell their exploits online.

Current Project Statistics:

Exploits: 36,640 | Researchers: 44,134

Multiple Local Versions for This Project Include:
Russia | Germany | Turkey | France | Italy | Spain | Romania | Poland | Argentina | Japan | China |

Zero Day Exploit and Vulnerability Auction

Please contact us via mail (ddanchev@cryptogroup.net) or XMPP/Jabber/OMEMO (ddanchev@cryptogroup.net) with your exploit and vulnerability submissions!
PGP Key:
https://astalavista.box.sk/Dancho_Danchev.asc

Looking for a Cyber Security Project Investor? (2021-10-04 04:09)

Dear blog readers,

I’ve just received a direct acquisition proposal for a high-profile cyber security project and I

need an investment partner who can work with me and make it happen.

Are you interested in working with me for this project?

Drop me a line at dan-

cho.danchev@hush.com

Sample project screenshots:

Press Release

For Immediate Release

Company Name
123 Main St. Los Angeles, CA 90028
Phone: 310-555-1234
www.companywebsite.com

Dancho Danchev Launches and Acquires Zero Day Exploits Auction Aims for Growth and Cyber Security Innovation

The world's leading expert in the field of cybercrime research security blogging and threat intelligence gathering Dancho Danchev has recently acquired a Zero Day Exploits Auction and aims for marker expansion and cyber security innovation growth

Dancho Danchev the World's leading cybercrime researcher security blogger and threat intelligence analyst recently acquired and plans to re-launch a Zero Day Exploit Auction where the ultimate goal would be to aim for portal and project growth in terms of acquiring new researchers and improving the overall traffic of the portal including to emphasize on active localization techniques where the portal is currently available in a variety of local market languages which include Russia, Germany, Turkey, France, Italy, Spain, Romania, Poland, Argentina, Japan, China where the ultimate goal is to reach out to local researchers in terms of offering them financial and intangible incentives which would allow them to submit their researchers which will result in having us properly approach the affected vendor allowing the researchers to earn revenue in the process of submitting their research to us.

About Your Company
Zero Day Exploits Auction aims to empower security researchers penetration testers and bug hunters with an extremely sophisticated and market relevent Zero Day Auction where users can submit their research and earn revenue in the process of submitting their research while the company takes responsibility for notifying the affected vendor including their products about any specific flaws.

Press Contact

Name: Dancho Danchev
Phone: +359 87 689 3890
Email: ddanchev@cryptogroup.net
Web site: https://astalavista.box.sk
Social Media Handles: Facebook, Twitter, LinkedIn

The project is acquired launched managed and maintained by Dancho Danchev who is an internationally recognized expert in the field of cybercrime fighting and threat intelligence gathering having actively pioneered his own methodlogy for processing threat intelligence leading to a successful set of hundreds of high-quality anaysis and research articles published at the industry's leading threat intelligence blog - ZDNet's Zero Day, Dancho Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat Blog with his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister, NYTimes, CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the industry's leading threat intelligence blog - Dancho Danchev's - Mind Streams of Information Security Knowledge with his research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol the researcher continues to actively produce threat intelligence at the industry's leading threat intelligence blog - Dancho Danchev's - Mind Streams of Information Security Knowledge publishing a diverse set of hundreds of high-quality research analysis detailing the malicious and fraudulent activities at nation-state and malicious actors across the globe.

Deep from the Trenches in Bulgaria! - Part Four (2021-10-06 13:46)

[1]

[2]define:moron

Big thanks to all the dipshits based in Bulgaria who basically broke my life for the sake of their

own well being. Mad props kudos all god bless and don't forget to bow down and behold to the

almighty – the dollar is not for you – savior and basically everything that you don't understand

and don't forget we're always there "looking for you".

The Dark Web Market Segment - FUD or Hype? - An Analysis (2021-10-18 11:25)

In recent years it became clearly evident that the over-population of the Dark Web with hundreds of thousands of active low profile and high-profile Dark Web Onion web sites

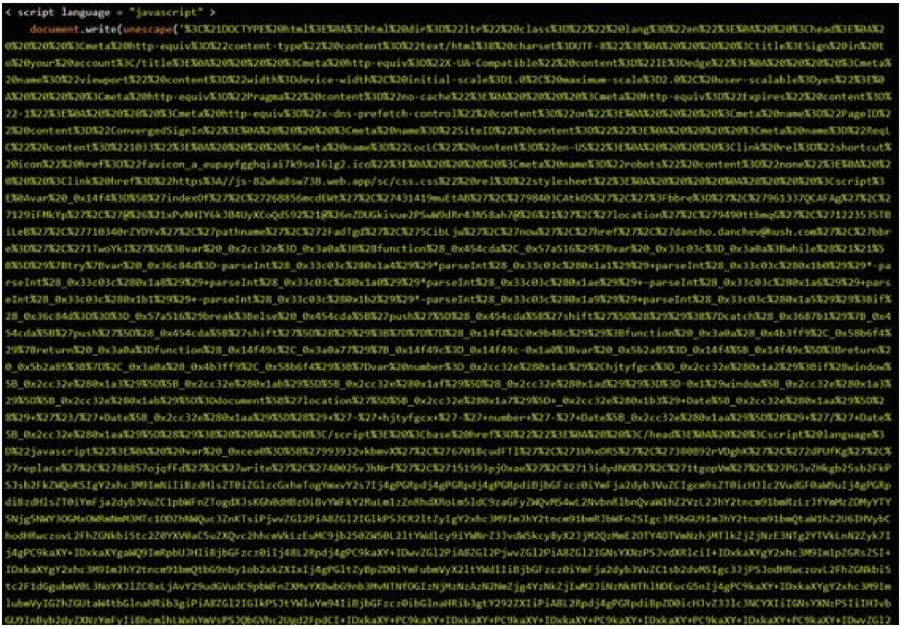
Massive Phishing Campaign Domain Farm Spotted in the Wild

Uses Google’s Firebase

Thousands of Users Affected - An OSINT Analysis (2021-10-18 12:18)

[1]

11154



I’ve just stumbled across a pretty decent and massive phishing domains farm that using

Google’s for the purpose of hosting and distributing the rogue and malicious content.

In this post I’ll provide actionable intelligence on the infrastructure behind it including to discuss

in-depth the TTPs (Tactics Techniques and Procedures) of the cybercriminals behind it.

Sample rogue and malicious URL known to have participated in the campaign:

hxxp://js-82wha8sw738.web.app/sc/css.css

Sample malicious and rogue responding IPs known to have

participated in the campaign:

199.36.158.100

151.101.1.195

151.101.65.195

Sample screenshots of the rogue and malicious phishing domains known to have been involved in the campaign:

Introducing Dancho Danchev's "Intelligence Community" 2.0 Dark Web Onion - Exclusive Content Available! (2021-10-18 13:05)

[1]

11177

Dear blog readers,

It’s been approximately 12 years since I’ve originally launched my Dancho Danchev’s Blog -

Mind Streams of Information Security Knowledge blog which quickly became one of the

security industry’s leading publications and since I’ve recently received quite a few

censorship attempts that basically say that some of my research violates Google’s Terms of

Service I’ve decided to migrate my personal blog including to resume my research at the

official Dark Web Onion for this blog which is:

- [2]http://aklw6fojficmu3zqsdsffprbas3kqrheej4ntvynfl5xkrjpqhlq55yd.onion

and therefore I’ve decided that this is my last post on my personal Dancho Danchev’s Blog.

Users and readers interested in continuing to follow my research can grab the Tor browser

and visit - [3]http://aklw6fojficmu3zqsdsffprbas3kqrhe ej4ntvynfl5xkrjpqhlq55yd.onion where

I’ll ensure that I’ll be posting high-quality and never-published and discussed before research

and OSINT type of analysis.

Sample screenshots from my "Intelligence Community" 2.0 Dark Web Onion blog:

From China With "Love" - Exposing the HKLeaks Propaganda Campaign - An OSINT Analysis (2021-10-29 01:36)

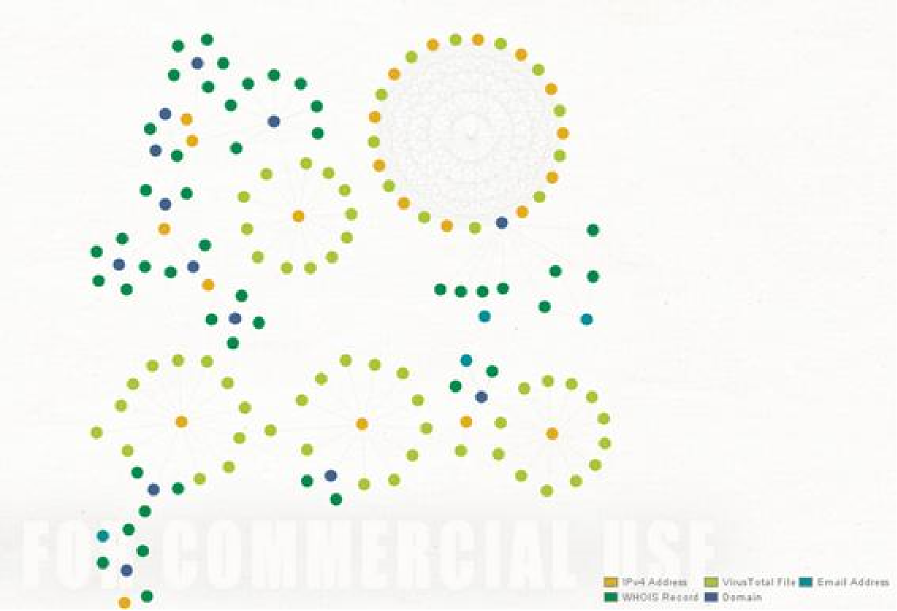
I’ve recently came across to a currently active information warfare operation propaganda campaign courtesy of China that somehow aims to successfully identify protesters using a variety

of "leak" based Web sites.

In this analysis I'll provide actionable intelligence on the whereabouts of the individuals behind

these campaigns and offer an in-depth technical discussion on their online whereabouts.

11190



Based on a variety of publicly accessible sources including the use of WhoisXML API's WHOIS

database I've managed to find the following domains which are known to have been involved in

the campaign including one personally identifiable email address which could lead to possible

cyber campaign attribution campaigns.

Sample domains known to have been involved in the HKLeaks information warfare propa-

ganda campaign:

hxxp://hkleaks.pk

hxxp://hkleaks.ru

hxxp://hkleaks.pk

hxxp://hkleaks.tj

hxxp://hkleaks.ml - Email: spiker@elude.in

hxxp://hkleaks.af

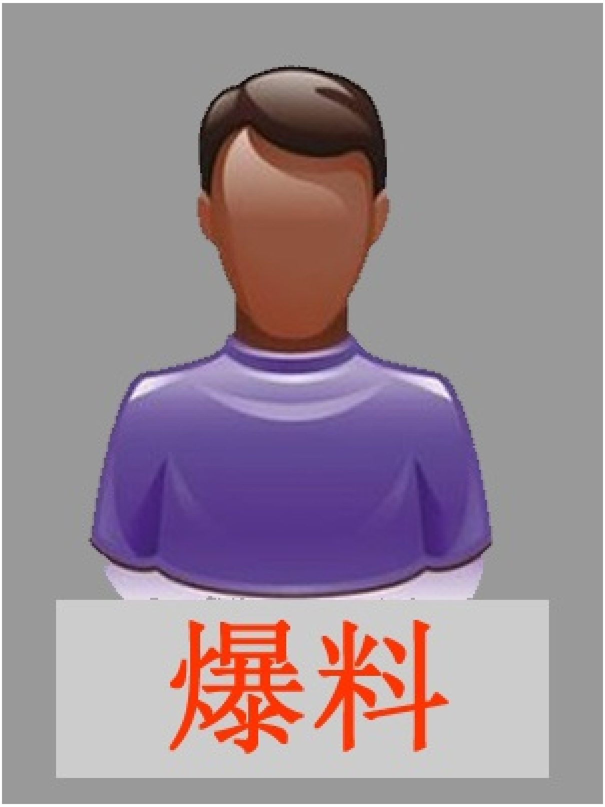
hxxp://hkleaks.cc

hxxp://hkleaks.pw

hxxp://hkleaks.kz

hxxp://hkleaks.kg

11191



Sample email address accounts known to have been involved in the campaign:

hkleaks@yandex.com

hongkongmob@163.com

Hongkongmob@protonmail.com

hongkongmob@yandex.com

Sample responding IPs known to have been involved in the campaign:

185.178.208.132

185.178.208.152

96.126.123.244

194.58.112.174

Massive "Facebook Appeal" Themed Phishing Campaign Uses Google's Firebase Spotted in the Wild - An OSINT Analysis (2021-10-29 01:48)

I just came across to a currently active phishing campaign that's using Google's Firebase as a

hosting infrastructure for the purpose of enticing users into falling victim into a rogue and fake

"Facebook Appeal" themed phishing campaign.

11194

You can check out my initial analysis at my official Dark Web Onion [1]here as my initial post

got censored by Google as it violates its Terms of Service.

Sample malicious and rogue phishing domains known to have been involved in the campaign:

Deep from the Trenches in Bulgaria! - Part Five (2021-10-29 06:28)

[1]define:moronic

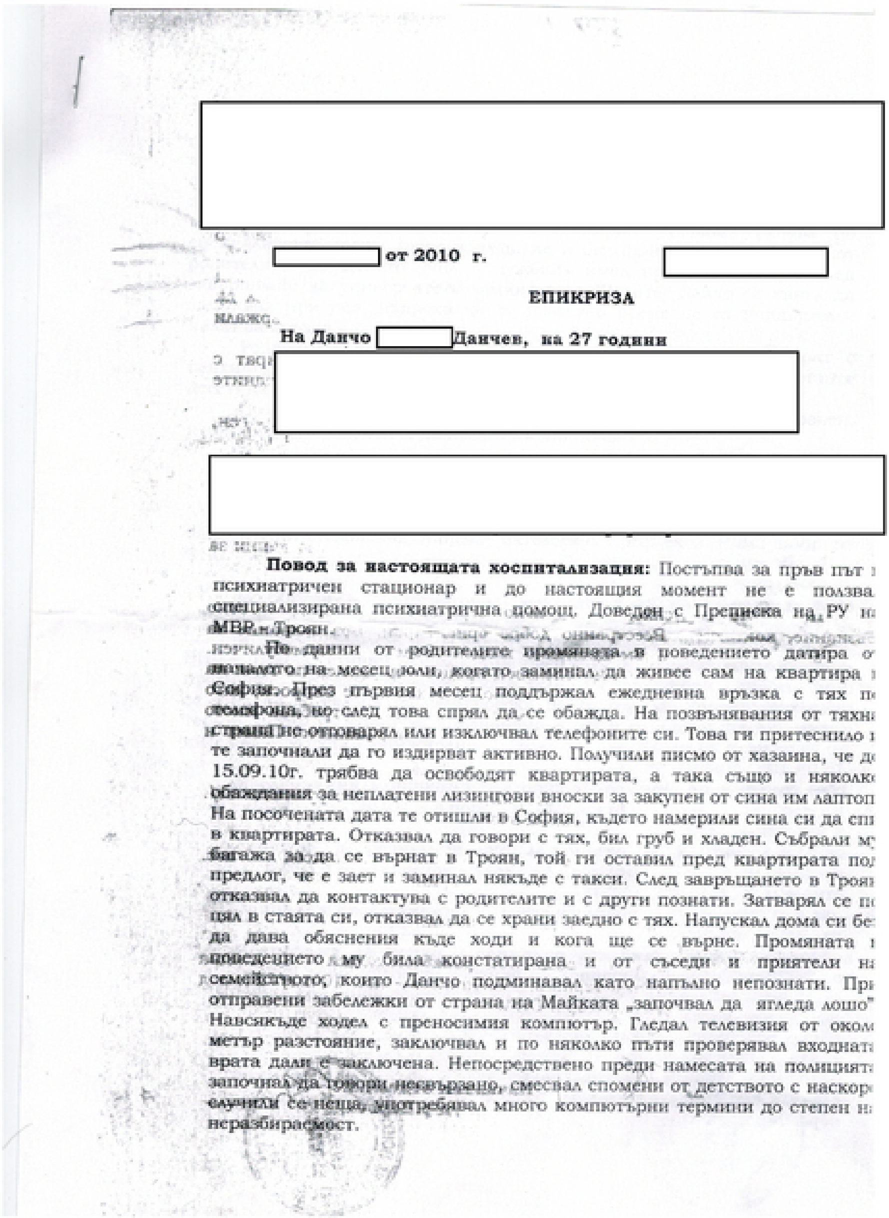
[2]Thanks, but, no thanks.

Sample document courtesy of my homeland Bulgaria courtesy of Bulgarian Law Enforcement

who kidnapped and home molested me and basically robbed me of $85,000 five years later

after my illegal arrest and kidnapping attempt circa 2010:

11202



[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път психиатричен стационар и до настоящия момент не е ползва специализирана психиатрична помощ. Доведен с Преписка на РУ МВР – Троян.

По данни от родителите промяната в поведението датира о началото на месец юли, когато заминал да живее сам на квартира София. През първия месец поддържал ежедневна връзка с тях п телефона, но след това спрял да се обажда. На позвънявания от тяхн страна не отговарял или изключвал телефоните си. Това ги притеснило те започнали да го издирват активно. Получили писмо от хазаина, че д 15.09.10г. трябва да освободят квартирата, а така също и няколк обаждания за неплатени лизингови вноски за закупен от сина им лаптоп. На посочената дата те отишли в София, където намерили сина си да сп в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали м багажа за да се върнат в Троян, той ги оставил пред квартирата по предлог, че е зает и заминал някъде с такси. След завръщането в Троя отказвал да контактува с родителите и с други познати. Затварял се п цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си бе да дава обяснения къде ходи и кога ще се върне. Промяната поведението му била констатирана и от съседи и приятели н семейството, които Данчо подминавал като напълно непознати. Пр отправени забележки от страна на Майката „започвал да ягледа лошо" Навсякъде ходел с преносимия компютър. Гледал телевизия от око метър разстояние, заключвал и по няколко пъти проверявал входнат врата дали е заключена. Непосредствено преди намесата на полицият започнал да говори несвързано, смесвал спомени от детството с наскор случили се неща, употребявал много компютърни термини до степен н неразбираемост.

Exposing the Darkode Forum Bust and the Associated Individuals Behind It - Or How I Almost Got Kidnapped? - An OSINT Analysis (2021-10-30 09:19)

I’ve decided to share with everyone an in-depth analysis and assessment using public sources that basically exposes key members of the Darkode forum community who actually ordered a

hitman for me for the price of $10,000 back in 2010 prior to my illegal arrest and kidnapping

attempt.

In this post I'll provide actionable intelligence on their online whereabouts with the idea to

assist U.S Law Enforcement on its way to track down monitor and prosecute the cybercriminals

behind these campaigns.

R.I.P Dancho Danchev?

so it's been over 2 months since anyone heard from him, i saw some tweets by Mikko Hypponen where he asked danchos buttbuddy Ryan Naraine if he heard from him, and the reply was:

"ryanaraine: @mikkohypponen we've been trying to reach him for several weeks. no answer anywhere. very strange and worrying."

so what you guys think have happend? my theory:

he pissed someone off with his blogposts, and made the revenue from someones rogue av schemes go down so some russian assassin came to him wherever he lives, ripped his heart out with a fucking hadouken punch and buried him somewhere in siberia

does anyone have some other theories?

i would never wish someone to be death and i hope he isnt tho, but he probably pissed of the wrong guys too much (koobface, money mule websites and so).

i wonder when roman from zeus/spyeyetracker will be "gone" tho...hes also costing the wrong guys alot of money.

white hat info

fellow members of dk i call upon thee to feed thy brother with useful information.

i need:
list of "white hat" type certificates, and their abbreviations (ex: cisco, CEH <<lol)

a list of "white hat" forums, like, virustotal, malware domain list, offensivecomputing etc.

and some "white hat" conventions

that is all.

Just give a big shoutout to Mikko Hyppunen & Dancho and everyone will think you are legit.

-

Hello

My name is __________, I'm a whitehat

To start off I'll give a shoutout to Mikko Hyppunen & Dancho Danchev for keeping it real

I have cerificates in Botnet Takedown 101 & OllyDBG for Dummies, I'd love to discuss the evilness of blackhats with some decent whitehats and also receive samples of the latest threats, thanks, bye

U.K and Australia Launch "Think Before You Link" Counter Espionage Using Social

Media Awareness Campaign - An Analysis (2021-11-27 04:14)

The U.K and Australia have recently launched an extremely popular and relevant "[1]Think

Before You Link" counter-intelligence social media link sharing security awareness building

campaign that aims to spread awareness on the use of "foreign information seeking" foreign

third-parties who will somehow benefit and expose sensitive national security information to

third-parties.

Sample video from the "Think Before You Link" security awareness raising campaign:

applications which are often used by end users to spy on their friends and colleagues

including family and relatives.

[4]

According to a recently released [5]research and presented at the Virus Bulletin conference by ESET’s Lukas Štefanko the company managed to find out that on the majority of occasions

stalkerware applications are poorly coded and often represent a security and privacy risk for

the actual stalker and user of the application and that they fall victim to a variety of security

flaws and vulnerabilities which often include the actual compromise of already collected and

gathered information by third-parties.

Sample actionable intelligence on some of the currently active stalkerware variants spotted

in the wild by ESET’s Lukas Štefanko include:

Israel's Spyware Vendor NSO Group Restrics Spyware Exports List to 37 Countries

Only - An Analysis (2021-11-27 04:16)

[1]

Taking into consideration the recent U.S Sanctions against the infamous Israel-based Spyware

vendor NSO Group the company has recently shortened the list of countries allowed to purchase

its spyware products which currently include the following countries:

11218

The current NSO Group Spyware vendor list of countries where it's allowed to sale its products

in 2021 include:

" *Australia, Austria, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Es-*

tonia, Finland, France, Germany, Greece, Iceland, India, Ireland, Italy, Japan, Latvia, Liecht-

enstein, Lithuania, Luxembourg, Malta, New Zealand, Norway, Portugal, Romania, Slovakia,

Slovenia, South Korea, Spain, Sweden, Switzerland, the Netherlands, the UK, and the US. "

What should be kept into consideration about the infamous NSO Group Spyware vendor is

that it's just the tip of the iceberg in terms of commercially obtainable or proprietary available

spyware aiming to affect dissidents and political activists globally and that the market share

shouldn’t be necessarily taken into consideration when profiling one of the market leading

commercial vendors of spyware targeting various restrictive governments across the globe.

The following are publicly accessible NSO Group Spyware vendor C &C (Command and Control) server IPs which you should definitely consider blocking in terms of protecting from yet

another spyware vendor out there in terms of keeping in mind that the NSO Group Spyware

vendor is just the tip of the iceberg when it comes to commercial or proprietary spyware

● *Researchers working with Trend Micro's Zero Day Initiative*

Microsoft Releases Its MSRC Researcher Recognition Program Award Winners - An Analysis (2021-11-28 05:37)

Microsoft has recently released its [1]MSRC Researcher Recognition Program Award Winners that basically covers several key areas of vulnerability research categories that are basically

targeting a variety of Microsoft-based online platforms products and services where the re-

searchers directly contribute with their knowledge and know-how for the purpose of sharing

actionable intelligence and actual PoC (Proof of Concept) code that's basically capable of ex-

ploiting various vulnerabilities in various Microsoft products and services and actually earn a

reward.

These internal bug-bounty and actual public and private sector including crowd-sourced vulner-

ability and research based programs actually help Microsoft on its way to secure its products

11248

and services while the company publicly offers researcher and contributor recognition which

can greatly contribute to a researcher's portfolio of research services and actually help the

company secure its products and services.

The company is prone to make an additional impact by publicly promoting the MSRC Researcher

Recognition Program Award Winners including its active collaboration with [2]TrendMicro's Zero

Day Initiative.

The more the marrier.

SPORTS WEAR

Dear blog readers,

I’ve decided to let everyone know that following a successful kidnapping attempt and home mo-

lestation attempt which was successful using doctors and local police officers from the Bulgaria

city of Troyan using corruption where I’ve lost approximately $85,000 due to home molestation and illegal doctor interference I’m about to submit an official complaint to Bulgaria’s Ministry

of Interior citing possible police officer crime and home molestation and illegal kidnapping at-

tempt which was illegal and was using my stolen ID from my place where I was dragged out

of my place with force by three local police officers from the Bulgaria town of Troyan following

a visit and a knock on my door by two unknown people the previous day where one on them

showed me a copy of his ID and the other was waiting for him in my a place.

Sample personally identifiable information regarding these individuals including primary

contact points in case someone is concerned about my whereabouts include:

[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път
психиатричен стационар и до настоящия момент не е ползва
специализирана психиатрична помощ. Доведен с Преписка на РУ н
МВР – Троян.
По данни от родителите промяната в поведението датира о
началото на месец юли, когато заминал да живее сам на квартира
София. През първия месец поддържал ежедневна връзка с тях п
телефона, но след това спрял да се обажда. На позвънявания от тяхн
страна не отговарял или изключвал телефоните си. Това ги притеснило
те започнали да го издирват активно. Получили писмо от хазаина, че д
15.09.10г. трябва да освободят квартирата, а така също и няколк
обаждания за неплатени лизингови вноски за закупен от сина им лаптоп
На посочената дата те отишли в София, където намерили сина си да сп
в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали м
багажа за да се върнат в Троян, той ги оставил пред квартирата по
предлог, че е зает и заминал някъде с такси. След завръщането в Троян
отказвал да контактува с родителите и с други познати. Затварял се п
цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си бе
да дава обяснения къде ходи и кога ще се върне. Промяната
поведението му била констатирана и от съседи и приятели н
семейството, които Данчо подминавал като напълно непознати. Пр
отправени забележки от страна на Майката „започвал да изгледа лошо”
Навсякъде ходел с преносимия компютър. Гледал телевизия от око
метър разстояние, заключвал и по няколко пъти проверявал входнат
врата дали е заключена. Непосредствено преди намесата на полицият
започнал да говори несвързано, смесвал спомени от детството с наскор
случили се неща, употребявал много компютърни термини до степен н
неразбираемост.

Exposing Aleksandr Zhukov from the Media Methane Rogue Fraudulent and Malicious

Advertising Enterprise - An OSINT Analysis (2021-11-29 05:28)

[1]

Following the recent revelations and actual U.S DoJ bust and lawsuit against [2]Aleksandr

Zhukov from Media Methane responsible for the MethBrowser ad-fraud scheme I've decided

to take a little bit deeper look inside its online infrastructure and actually elaborate more on

the fraudulent practices applied by the group including to offer practical and relevant action-

able intelligence in terms of exposing the group's online infrastructure.

In this post I'll discuss the group's online infrastructure and elaborate more on some of the

key individuals behind the gang with the idea to empower the security community and U.S

Law Enforcement with the necessary data and information to track down and prosecute the

cybercriminals behind these campaigns.

Why Publishers love Adzos?

We play for real. Guided by an ambitious, long-term strategy we achieve milestone after milestone and do it in a timely fashion, just according to the plan. Now we proudly admit we do offer a truly global reach, and it's not about rending the air. In 2014 the list of industries we specialize was significantly expanded - we've plunged into 56 areas which is equal to a 27% increase. In 2015 we are looking to press for another 30% growth, and we are doing great so far. In the world of technology we bet on technology - we gather programming, design and marketing gurus to create an ideal revenue-growth ecosystem.

Laser-guided campaigns, designed to squeeze the most of investments and leaving competitors in the dust is the main reason why publisher make a choice in our favour. Become a part of an ambitious community and a global plan - join us and make your business prosper.

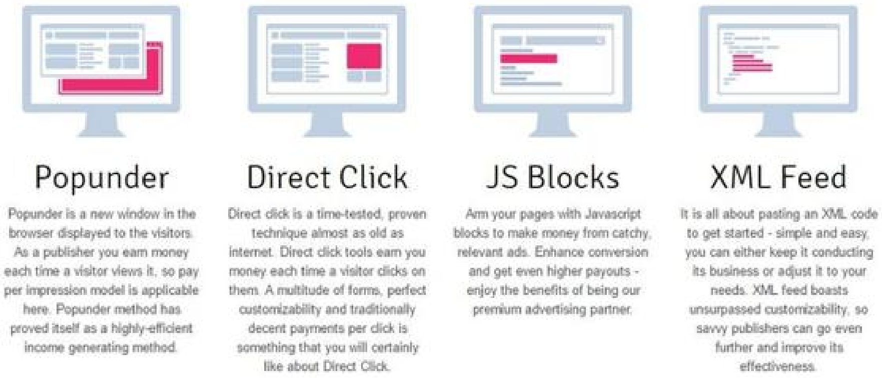
✓ **Transparency and straight dealing**

✓ **A variety of payment options**

✓ **Bi-weekly payouts, holds and delays-free**

paxum Payoneer PayPal

There is also an opportunity for referral programs - Earn 5% for everyone you bring to our system.



Popunder

Popunder is a new window in the browser displayed to the visitors. As a publisher you earn money each time a visitor views it, so pay per impression model is applicable here. Popunder method has proved itself as a highly-efficient income generating method.

Direct Click

Direct click is a time-tested, proven technique almost as old as internet. Direct click tools earn you money each time a visitor clicks on them. A multitude of forms, perfect customizability and traditionally decent payments per click is something that you will certainly like about Direct Click.

JS Blocks

Arm your pages with Javascript blocks to make money from catchy, relevant ads. Enhance conversion and get even higher payouts - enjoy the benefits of being our premium advertising partner.

22 декабря 2016

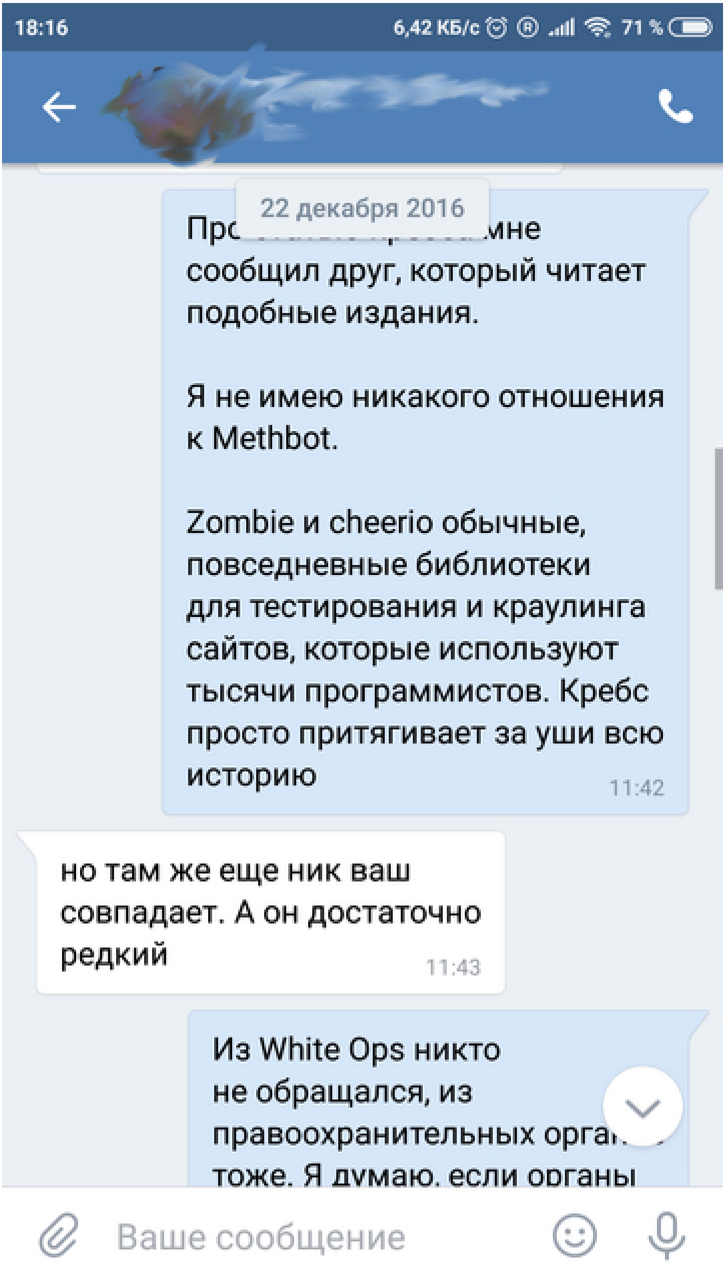
Из White Ops никто не обращался, из правоохранительных органов тоже. Я думаю, если органы будут разбираться, то поймут, что я отношения никакого не имею к Methbot. А тем более к таким суммам, которые явно завышены (так считают и специалисты в области рекламы), выглядит так, что White Ops просто пиарится 11:46

Той почтой я не владею, пробовал получить к ней доступ, но там указан номер телефона (последние 2 цифры номера), которым я точно не владею и не владел

Ясно! Спасибо большое! Очень

[14]

11268



22 декабря 2016

Про мне сообщил друг, который читает подобные издания.

Я не имею никакого отношения к Methbot.

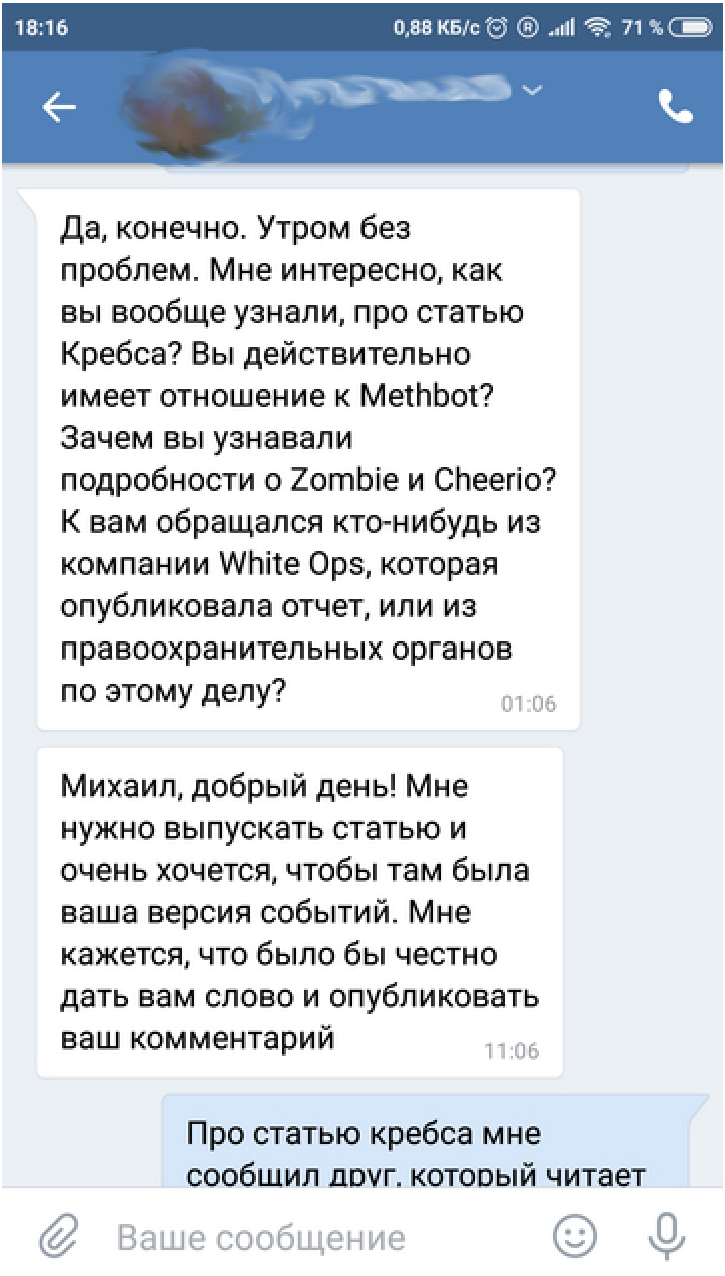
Zombie и cheerio обычные, повседневные библиотеки для тестирования и краулинга сайтов, которые используют тысячи программистов. Кребс просто притягивает за уши всю историю 11:42

но там же еще ник ваш совпадает. А он достаточно редкий 11:43

Из White Ops никто не обращался, из правоохранительных орга
тоже. Я думаю, если органы

[15]

11269



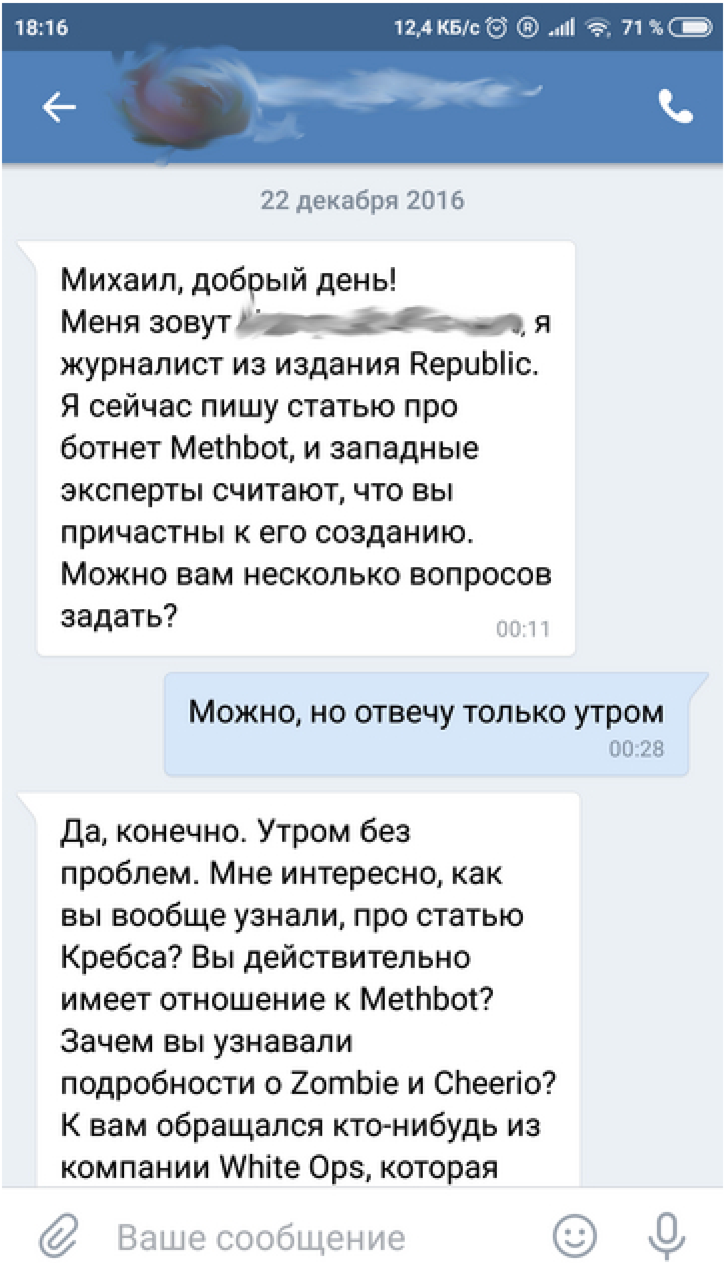
Да, конечно. Утром без проблем. Мне интересно, как вы вообще узнали, про статью Кребса? Вы действительно имеет отношение к Methbot? Зачем вы узнавали подробности о Zombie и Cheerio? К вам обращался кто-нибудь из компании White Ops, которая опубликовала отчет, или из правоохранительных органов по этому делу? 01:06

Михаил, добрый день! Мне нужно выпускать статью и очень хочется, чтобы там была ваша версия событий. Мне кажется, что было бы честно дать вам слово и опубликовать ваш комментарий 11:06

Про статью кребса мне сообщил друг, который читает

[16]

11270



[redacted]

22 декабря 2016

Михаил, добрый день!
Меня зовут [redacted], я журналист из издания Republic. Я сейчас пишу статью про ботнет Methbot, и западные эксперты считают, что вы причастны к его созданию. Можно вам несколько вопросов задать?
00:11

Можно, но отвечу только утром
00:28

Да, конечно. Утром без проблем. Мне интересно, как вы вообще узнали, про статью Кребса? Вы действительно имеет отношение к Methbot? Зачем вы узнавали подробности о Zombie и Cheerio? К вам обращался кто-нибудь из компании White Ops, которая

Выплата

[redacted] 06/07/2017 12:04:52

Привет, сделайте выплату, уже месяц не было, а сумма вроде больше минималки на балансе.

[redacted] 08/02/2017 08:31:54

Привет, сделайте выплату!

[redacted] 10/01/2017 07:29:50

Добрый день, оформите пожалуйста выплату.

[redacted] 10/04/2017 05:56:43

Вы прислали выплату только за прошлых 2 недели, а не делали вы ее 2 месяца. Выплата должна быть с 01.08. Т.к. вы уже прислали за прошлые 2 недели, то остаток, который вы должны за период с 1 августа по 15 сентября составляет еще 275.31

Stay tuned!

U.K's National Cyber Security Centre has just released its [2]2021 annual report which includes

some pretty interesting findings from what appears to be a pretty modern and relevant fraud

report infrastructure in the U.K where users can report cyber fraud incidents including actual

cybercrime incidents and basically get the necessary assistance where the actual Center is

responsible for taking offline the majority of fraudulent campaigns and actually offering the

necessary assistance to victims from within the U.K.

Some of the key findings include:

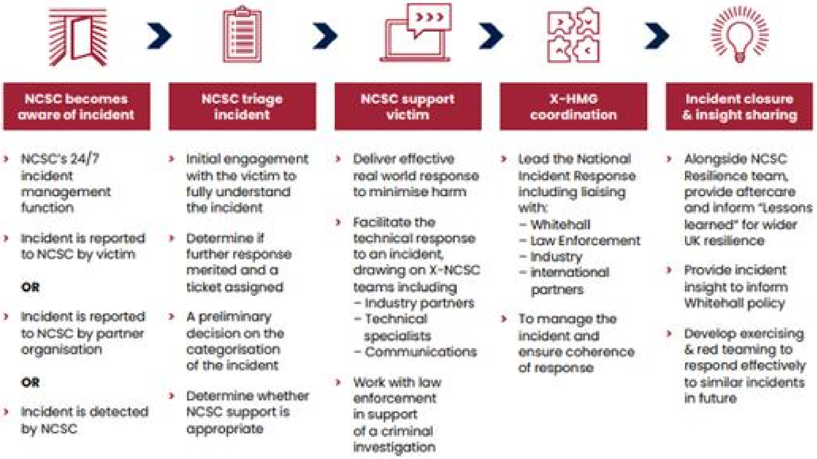
" *Our pioneering Active Cyber Defence programme has taken down 2.3 million cyber-enabled*

commodity campaigns – including 442 phishing campaigns using NHS *branding and 80 illegiti-*

mate NHS apps hosted and available to download outside of official app stores. "

[3]

11274



NCSC becomes aware of incident

- NCSC's 24/7 incident management function
- Incident is reported to NCSC by victim

OR

- Incident is reported to NCSC by partner organisation

OR

- Incident is detected by NCSC

NCSC triage incident

- Initial engagement with the victim to fully understand the incident
- Determine if further response merited and a ticket assigned
- A preliminary decision on the categorisation of the incident
- Determine whether NCSC support is appropriate

NCSC support victim

- Deliver effective real world response to minimise harm
- Facilitate the technical response to an incident, drawing on X-NCSC teams including
  - Industry partners
  - Technical specialists
  - Communications
- Work with law enforcement in support of a criminal investigation

X-HMG coordination

- Lead the National Incident Response including liaising with:
  - Whitehall
  - Law Enforcement
  - Industry
  - International partners
- To manage the incident and ensure coherence of response

Incident closure & insight sharing

- Alongside NCSC Resilience team, provide aftercare and inform "Lessons learned" for wider UK resilience
- Provide incident insight to inform Whitehall policy
- Develop exercising & red teaming to respond effectively to similar incidents in future

" *Our Suspicious Email Reporting Service has received 5.4 million reports from the public of*

potentially malicious material – leading to the removal of more than 50,500 scams and more

than 90,100 malicious URLs. "

The primary purpose for coming up with such a service would be to empower novice and experienced cybercriminals with the necessary information to further commit related and relevant cybercrime-friendly activities which also includes the ability to fake or spoof a new identity which could lead to related fraudulent and rogue cybercrime-friendly online schemes.

Sample Rogue and Stolen Gift Cards Offered for Sale on the Underground Marketplace

- An Analysis (2021-12-03 23:51)

I’ve recently stumbled upon a currently active underground forum market proposition for

stolen and fraudulently obtained online E-Shop gift cards and I've decided to share some of

the key factor propositions based on the original proposition which I'll profile in this post.

Sample screenshots based on the original underground forum market proposition:

I’ve just stumbled upon a newly launched and currently active E-Shop for stolen credit cards

information and I’ve decided to take a deeper look potentially exposing it and offering action-

able intelligence on its online infrastructure part of the "[2]Exposing the Market for Stolen Credit

Cards Data" blog post series.

Sample domains involved in the campaign include:

hxxp://majorcc.shop/

hxxp://majorcc.store/

hxxp://majorcc.ru

Sample Dark Web Onion known to have been involved in the campaign:

http://xktoxobz3jv6epntuj5ws7nc6zuihfroxziprd5np5xkbby4nzmmmiyd.onion

Sample screenshots of the rogue and fraudulent E-Shop for stolen credit cards information:

Based on the actual underground forum market proposition the newly launched vendor appears

to have been persistently and systematically supplying newly obtained and stolen credit cards

information which in reality means that a lot of people including financial institutions are really

affected by this boutique stolen credit cards information E-Shop operation.

Profiling Yet Another Currently Active E-Shop for Stolen and Compromised Credit

Cards Information - An Analysis (2021-12-04 03:03)

[1]

I've recently stumbled upon yet another currently active online E-Shop for stolen and compro-

mised credit cards information and I've decided to provide some actionable intelligence on its

online infrastructure including to discuss the possible revenue schemes that could originate

from the existence of such E-Shops for stolen credit cards information.

The possibilities for related fraudulent and malicious online activity that could originate from

the existence of such E-Shops for stolen and compromised credit cards information are limitless

in the context of having the bad guys steal actual financial amounts directly from the victims

or using them in related purchases that also includes the use of [4]money mules to cash out

the amounts.

Indian-Based VoIP SIP Provider Fuels Growth In Russia's Caller

ID Spoofer Services

Market Segment - An Analysis (2021-12-04 04:28)

I’ve just stumbled upon a currently active and pretty prolific across the cybercrime ecosystem

Caller ID and one-time-password bypassing the verification services which is currently advertised on several cybercrime-friendly forum communities courtesy of the India-based company known as Sipco Systems where the ultimate goal is to offer and provide cybercriminals internationally with the necessary Caller ID and online mobile application based stores verification process services allowing them to commit related cybecriminal activity online.

\

These services are just the tip of the iceberg and the ability to come up with a spoofed or

custom caller ID in an automated fashion can be definitely attributed to a growing social engi-

neering vector based market segment that’s also fully and successfully capable of intercepting

one-time-passwords including to result in possible mobile application store verification process

fraud and bypassing.

Automated Social Engineering Driven OTP (One-Time-Passwords) and Two Factor Authentication Bypassing Platform and Mobile Application Spotted in the Wild - An Analysis (2021-12-04 11:49)

I've recently stumbled upon a newly released DIY social engineering and OTP (One-Time-

Passwords) and two-factor authentication bypassing platform and mobile application which

is fully capable of socially engineering a gullible end user into falling victim into a targeted

social engineering driven campaign that's currently impersonating a variety of services and

financial institutions globally.

Sample screenshots of the DIY OTP (One-Time Passwords) and two-factor authentication by-

passing platform:

Presenting Astalavista.box.sk's Flagship "Wisdom Kings Magazine" - Issue One - Grab a Copy Today! (2021-12-09 00:00)

Dear blog readers,

I’ve decided to let everyone know that I just released and came up with Astalavista.box.sk’s

flagship E-Zine for hackers security cybercrime research OSINT and threat intelligence and

actually released issue one of the E-Zine which you can grab a copy of on my personal blog in

the true spirit of the Christmas holidays.

Wisdom Kings Magazine Issue One - "Existence is Futile, Relevance Is Non-Existent"

+ 01. Introduction.......................................by Phemonix

+ 02. 10 years back in the future.........................by Phemonix

11326

+ 02. Back to basics ....by Phenomix

+ 03. The basics of Social engineering....................by Phenomix

+ 04. How to make anarchy for beginners..................by Phenomix

+ 09. Exposing the "Data Leaks" Paradise.................by Phenomix

+ 10. How not to get "caught"............................by Phenomix

+ 11. CYBERINT and Virtual SIGINT Exposed................by Phenomix

+ 12. From Cybercrime to Multi-Billion Dollar Industry....by Phenomix

+ 13. The "Dark Web" Exposed and Profiled................by Phenomix

+ 14. Exposing the Bastards who stole the Scene..........by Phenomix

+ 15. Top 20 Hacking Sites and Hacking Forums............by Phenomix

+ 16. Greetz and Shouts go out to.........................by Phenomix

+ 17. Conclusion...by Phenomix

01. Introduction

Greetings,

Welcome, to the first issue of Wisdom Kings Magazine.

Let us introduce, ourselves.

Over the years the demise of the scene greatly contributed to the overall irrelevance of

the basic principles that used to drive it - knowledge and power and yes irrelevance.

With major scene information repositiories and hacking sites going down the landscape

greatly re-transformed itself into a commercial landscape re-transforming the scene the way

we know it into a commercial paradise in particular the rise of the Threat Intelligence and

Virtual CYBERINT marketplace consisting of thousands of active participants sharing data

information and knowledge on current and emerging cyber threats and cyber threat attack

vectors including a multitude of nation-state sponsored and tolerated Cyber Threat Actor

adversaries successfully running a huge portion of fraudulent and malicious online campaigns

and participating in a multi-million dollar underground Cybercrime Ecosystem.

The first issue of "Wisdom Kings" aims to inform and educate on the basic principles

that used to drive the Scene - knowldge information and power.

Happy hacking!

Greetz,

Phenomix

+-+-+ +-+-+ +-+-+ +-+-+ +-+-+ +-+-+ +-+-+-+-+

+ 01. Setting them straight - 10 years back in the future

11327

The year is 1998 and Progenic's Top 100's has just added yet another hacking group's

portfolio such as for instance among my favorite hacking and security resources which

included at the time - WarIndustries, System7, Blackcode, Progenic. Web Fringe, Neworder

and TechnicalWarfare.

What was really taking place within the Scene and the Industry at the time?

With new

hacking and community projects continuing to pop-up on a daily basis it wasn't largely a

surprise that a new generation of novice and amateur hackers was just beginning to take place

with vast repositiories of tools and tutorials including articles and guides publicly accessible for

everyone to take advantage of and most importantly to get in touch with someone and to learn.

What did we managed to achieve throughtout the past decade in terms of innovation development knowledge and data spreading to thousands of novice and experienced users across the globe? Let’s take for instance the Threat Intelligence market segment - a pioneering passive and active virtual SIGINT marketplace with hundreds of groups participating including thousands of malicious and fraudulent online actors utilizing and relying on basic quality assurance and malicious economies of scale type of market-driven factors to scale their cybercrime and fraud-driven operations online prompting a systematic and nation-state driven response to a growing set of economic and financial terrorism type of online activity largely provoked by a specific set of Russian and Eastern European online adversaries.

Among my favorite personal Web site bookmarks at the time were the NBA.com including various other X-Files and related UFO-themed video and photo archive type of personal Web sites.

Believe it or not among the early basics of Technical Collection that I managed to inquire were throughout the public and proprietary research published by a company called iDefense which was basically always there to provide the necessary intelligence on current and future cyber groups and current and future cyber actors which greatly inspired me on my way to do my research in the field of OSINT (Open Source Intelligence) and later on Cybercrime

Research and Threat Intelligence gathering. Who were the hackers and what were they up

to? What tools did they use? How famous were they at the time? How did they manage to

achieve all of this?

Remember the U.S-China crashed airplance skirmish?

If it’s going to be massive it bet-

ter be good. What this incident clearly showcased at the time is the possible offensive cyber

warfare scenario where U.S based and China-based hackers actually popped-up online to

defend and actually launch attacks against each other potentially signifying one of the first

major international cyber incidents at the time.

With TextFiles.com additions continuing to pop-up among the first and most notable sec-

tions that truly made me an impression and actually inspired me to get involved in the world of

Hacking and basically the Scene was the Anarchy and Phreaking and Hacking sections next to

the daily visits to Progenic.com Top100 list of hacking and security Web sites to actually catch

up with the votes and check the new additions to the list to potentially obtain various hacking

tools and trojan horses futher motivating me to work with them and potentially show them

and share them with some of my closest friends of the time circa the 90’s for the purpose of

attempting to trick irc.dal.net users from various channels including #gay and #lesbians into accepting the latest bogus "screensaver" while exploiting a common flaw in the actual mIRC

11328

client where you could easily make it look like that the actual user is receiving an image which

in reality was actually an executable part of the server client of a popular trojan horse release

at the time.

01. Back to basics

When was the last time you actually bothered to visit the archive.org looking for old

copies of your favorite Web sites to possibly inspire you on your way to achieve your latest

project in the field of Intelligence Studies and the Information Security market segment or to

actually upload your old UFO photos and videos collection online? Keep reading.

Among the key Web sites that you should consider visiting using archive.org include:

- Progenic.com

- TextFiles.com

- Webfringe.com

- Newoder.box.sk

- rootshell

- packetstormsecurity

Including the following modern alternatives in terms of your will and desire to acquire

data information and knowledge:

- C4I.org
- packetstormsecurity
- link-base.org
-

The Definite Manual to Helping Re-surrect the Scene and the Security Industry in this particular case would be for novice users to launch a personal blog where they can share their ideas and actual research publications with the rest of the security community and the Scene including to launch and maintain something in the lines of a file and security directory repository next to a personal Web site or a YouTube vlog that also includes a podcast including to publicly host and share their research and presentations.

03. The Basics of Social Engineering

01. Introduction

Social engineering is the art, of portraying, a situation, to one’s perceivable conscious needs, for, the purpose, of pre-emptively, portraying, the same situation, seeking long term and short team, social gain.

02. Picking up a target

For the purpose of this article, we’ll pick up your local school.

You can be anything, that, you, want to be.

It’s all a matter of perspective.

And objective. Setting up the right, expectations, when, assuming to, own, a target, is vital, for the

11329

success of your, attack.

Successfully, presumuing, the very best, in a, person, greatly, ensures, your success,

from a self-positioning, potentially, owning, phrase, of the actual communication. We’re all

elite, when, we, tend, to rock, together. The difference?

We rock for ourselves. Our wisdom is our king, and our king is our prevalence. Pre-dominantly,

positioning, ourselves, as communication,

Invite:

CrackZ@hotmail.com

09. Exposing the "Data Leaks" Paradise

In a world dominated by a countless number of malicious and fraudulent cyber threat

actor adversaries including the rise of the "penetration testing" crowd whose ultimately goal

is to actually lower down the entry barriers into the World of Information Security potentially

resulting in thousands of enthical and unethetical penetration testing aware users across the

globe who have the capacity and the potential to target thousands of legitimate Web sites

in an attempt to take advantage of the "low-hanging fruit" it should be clearly noteated that

throughout the past couple of years a new generation of wannabe hackers and information

security enthusiasts began to take place namely the rise of the data brach and data leaks

community within the Information Security Industry whose ultimately goal is to actually obtain

access to compromised and potentially leaked database of confidential records including

high-profile data leaks in the context of government-based leaked data that will be later on

eventually traded and attempted to be taken advantage of in the context of launching targeted

phishing and malware-spreading campaigns potentially affecting hundreds of thousands of

users in the process.

The very notion that cybercriminals including white hat security experts and cybercrime

fighters will eventually attempt to obtain access to for instance a compromised cybercrime

forum for the purpose of exposing the personal details of its users that also include to possibly

track down and geolocate including to actually profile and prosecute some of its members

should be definitely considered as an old-fashioned trend in the actual fight against cybercrime

online with more users and researchers joining the fight including the actual cybercriminals

who might take additional measures to actually protect and prevent possible data leaks

including various other OPSEC (Operational Security) type of measures in terms of positioning

their cybercrime-friendly forum community as a invite-only or actually launching it in a a

vetted and invite-only fashion.

What’s should be clearly noted is that with the mainstream media continuing to raise

awareness on the existence of high-profile hacking groups and hackers including the rise

of the Anonymous crowd it should be clearly noted that wannabe and potential hackers

would continue trying to steal the necessary media attention and actual "know-how" from

high-profile hacking groups and individual hackers involved in high-profile data leaks and data

breaches.

10. How not to get "caught"

Have you ever dreamed of getting "caught" and actually making the headlines with your

latest research that also includes the digirally naughty party of your research? It should be

11330

clearly noted that every decent security researcher and wannabe hacker should take basic

pracautions for the purpose of ensuring that their online activities including access to their

research remains properly protected from nation-state and fellow researcher’s access with

basic OPSEC (Operational Security) in mind which basically includes basic "sock-puppet" type

of online personas including the active use of proprietary and off-the-shelf VPN (Virtual Private

Network) including the active use of anti-fingerprint based browser including basic online

pracautions such as for instance the use of PGP and end-to-end real-time communication encryption for the purpose of getting involved in related projects and actually keeping in touch

with fellow colleagues and researchers.

Let’s discuss some basic OPSEC (Operational Security) principles and offer an in-depth

discussion on various practical OPSEC tactics and strategies for the purpose of ensuring

that your online activity remains properly protected including the actual protection of your

intelellectual "know-how" and research and analysis data. Among the first basic principles

that you should properly ensure is the active use of basic "hardware-isolation" principles that

also includes the active use of a proprietary commercial and off-the-shelf VPN service provider

such as for instance Cryptohippie.

14. Exposing the Bastards who the Scene

It used to be a situation where technological "know-how" and operational capabilities to

make an impact globally used to be the primary motivation factor for an entire generation of

hackers/crackers/phreakers and security experts globally today’s modern and sophisticated

security industry with hundreds of participants and high-profile experts who are basically

responsible for protecting high-profile and nation-state networks including their direct involvement in high-profile and sensitive security and cyber intelligence gathering projects where

everyone is busy gathering cyber intelligence including to actually take the game a little bit deeper potentially causing widespread industry buzz in case where a successful cyber

attack attribution takes place or in case where the team of professionals somehow manages

to establish a direct relationship between a cyber attack instance with a real-life person or a

group of people most notably hackers or another team of high-profile or nation-state hacking

group or a team of professional security experts.

Do you remember the Scene the way we know it circa the 90’s?

Who were some of

your favorite high-profile researchers at the time including high-profile hackers and security

experts? Did you hang out a lot on IRC? Have you ever dreamed of speaking with a hacker or

joining a hacker group on your own? Keep reading.

In this article I’ll discuss in-depth the Scene the way we know it circa and try to compile

in-depth personal dossiers of some of the people that inspired me to join the Scene and the

security industry at the time and offer an in-depth overview and discussion of their professional

path and achievements circa the 90’s up to present day and basically explain and actually

expose the bastards who stole the scene. Keep reading.

16. Greetz and Shouts go out to

In this section we wanted to take the time and effort and elaborate more on folks that

we know touch base with work with cherish and continue to support in a variety of projects namely:

What You Get From "Peasant-aria Land" - A New Cyber Security Center - Behold Your-

self To the Almighty Savior! - An Analysis (2021-12-10 10:42)

[1]

Is it crap or is it bullshit? Is it a dipshit or is it a moron? Did the Klingons did it or did we do it

on our own? Did Jessus give us the money or did we steal it from somewhere? No. It’s called

[2]cyber security industry in [3]Bulgaria in 2021 led managed and operated by the infamous

[4]Yavor Kolev who kidnapped and home molested me with a stolen ID and dragged me out of

my place with no witnesses and no legal repercussion for his illegal activities in the country and

my illegal arrest with the assistance of local police offers from the city of Troyan, [5]Bulgaria

circa 2010 which is my hometown in Bulgaria.

11332

EUROPOL
EUROPOL

In this post I'll elaborate more on one of my kidnappers who greatly contributed to my illegal

arrest courtesy of Bulgaria Law Enforcement and basically dragged me out of my place with a stolen ID and held me hostage for a period of several months in a confined environment

without Bulgaria Ministry of Interior knowing anything about this and with no witnesses and

with force which resulted in a direct loss of $85,000 throughout the next period of five years

following a successful kidnapping and home molestation attempt courtesy of local police

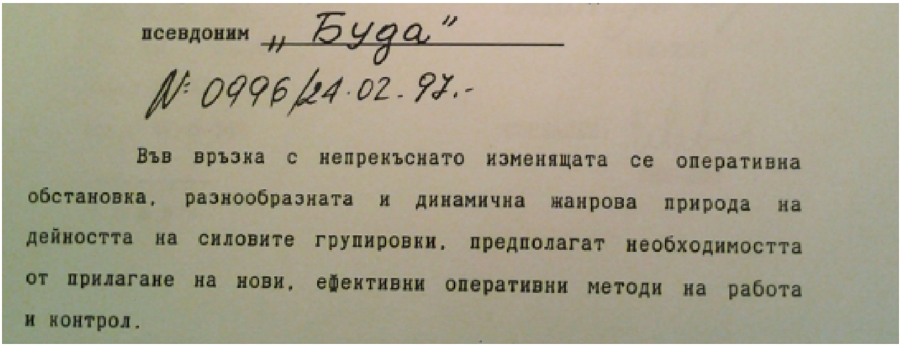
officers from Troyan Bulgaria which is my home town which you can catch up in terms of going

through the related posts at the end of this post.

[6]

[7]

11333



псевдоним „Буда"

№ 0996/24.02.97.-

Във връзка с непрекъснато изменящата се оперативна обстановка, разнообразната и динамична жанрова природа на дейността на силовите групировки, предполагат необходимостта от прилагане на нови, ефективни оперативни методи на работа и контрол.

[8]

[9]

[10]

[11]

11334

The Bulgarian Exception:

Organized Crime feeds corruption in Bulgaria. The country was ruled and is ruled now by true criminals;

This is possible because of the Western Realpolitik: Political «Doublethink» and «Our-Son-of-a-Bitch» doctrine.

Why Did Bulgaria’s DANS Agency Gave Me a Visit and a Pension? (2021-12-24 19:12)

[1]

Dear blog readers,

I’ve been persistently asked on what really took place back in [2]2010 when I was kidnapped

by local police officers in my hometown Troyan Bulgaria using my stolen ID and back in 2015

when I was drug poisoned by Bulgaria’s DANS Agency who gave me a visit to my place? Keep

reading.

It appears that back in my homeland it has a long way to go in terms of getting lost to the

point of oblivion where when you don’t have anything it means don’t touch other people’s

stuff or they will break your ankle and then politely take you back to your non-existent method

of existence called a car in your homeland and politely ask you to enter and never think of

coming back or going to anyone’s place again. Whether you are a moron or let’s not forget

whether you’re a Bulgarian or not take a photo of yourself and never show it to anyone. No

one cares and we don’t care. Try to forget about the fact that you took a photo of yourself and

believe it or not the photo never really existested. It does not exist.

By the way who hacked DANS.bg? We did not. We did not. Someone else did it and we came

up with an [3]analysis on the topic. For free. Forget about public sources. We did it using public

sources.

Do you want to infect journalists with [4]malware? This is amusing as they have infected you

already. With themselves.

Do you want to celebrate the "holidays"? Do you know what a work day is to begin with? You

can't celebrate the holidays. There are no holidays.

Don't forget to use your ultra favorite Web site to post photos of your social spit and vomit and

don't forget no one cares. Including you.

Sanctions [5]anyone? You bet. And yes you bet.

Now the single most important thing to remember is to go back home. Only in case you know

what a home is. Only in a case whether you have a home and never forget not to go to other

people's homes to do your naughty stuff. Steal rob kidnap molest and steal everyone’s money.

This is not Bulgaria and this is not the holidays.

Happy holidays!

Stay tuned!

"It’s Full of Secrets of User-Generated Classified Information" - The Inside Story Behind the Infamous Bulgarian Hacker Dancho Danchev from the Trenches up to Present Day (2022-01-20 09:43)

[1]

A modern whiz-kid child story of the son of an ex-Communist era famous family from Bulgaria

up to present day from the trenches in the world of computer security from the 90’s up to

present day as the world’s leading expert in the field of cybercrime research

Who would have thought?

A 20+ something Bulgarian dude an ex-hacker teenager enthusiast from Bulgarian that suc-

cessfully compromised the official Web site of his hometown using what he believes to be

the first known case of successful social engineering as today’s world’s leading cybercrime

researcher security blogger and threat intelligence analyst making the news at TechMeme and

Techcrunch including the headlines at Slashdot to have successfully visited the GCHQ to make

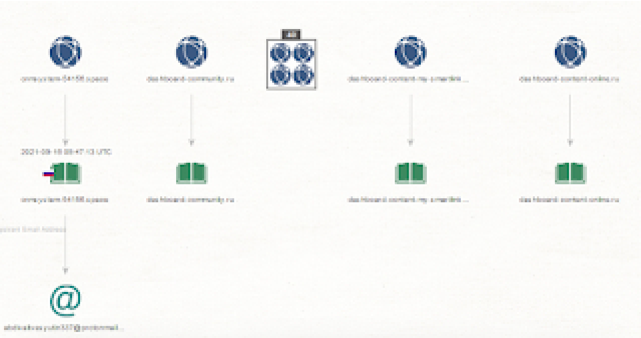
a presentation and to have successfully been invited to Canada’s Secret Service headquar-

ters to make a presentation - a true marvelous story of user-generated classified and sensitive

cyber attack and cyber attack trends information begins to unfold a practice courtesy of the

same individual that he’s been doing for over a decade currently running one of the security

11357



industry’s most popular security publications with over 5.6M page views and approximately

6M direct clicks interactions with his Dancho Danchev’s Blog - Mind Streams of Information

Security Knowledge blog using Feedburner.

TrendMicro Releases New Report on a New Cybercrime Group called “Void Balaur” –

An OSINT Analysis (2022-01-20 10:34)

[1]

Based on TrendMicro’s recently released report on the Eastern European cybercrime syndicate

known as "[2]Void Balaur" I’ve decided to proceed further and enrich the original IoCs (Indica-

tors of Compromise) using public sources including my employer’s – WhoisXML API’s – real-time

and historical WHOIS database and look for additional clues and offer an in-depth analysis and

practical and relevant threat intelligence that could assist you in potential cyber attack and

cyber threat actor attribution campaigns.

Sample Portfolio of Dancho Danchev's Personal and Conference Event Photos - A Compilation (2022-01-20 10:34)

[1]

Dear blog readers,

I've decided to share with everyone a personal conference and event photos compilation with the idea to assist everyone and assist everyone in catching up in terms of what I've been up to in terms of conference and event presentations.

Sample Dancho Danchev Personal Conference and Event Photos Compilation:

Members Area / Installation Files

In order for us to be able to track the installations you perform, you need to use an installation file which is tagged with your Affiliate ID (and, optionally, Tracking ID if you want to track installs for each of your sites individually). The tagging of the installation package is done automatically, so in order to get the installation files, you just need to specify Tracking ID (optional) and request them, by clicking the Request Install Files button below.

The installation files are available as either a .exe or a .dll.

To install from DLL execute the following command:
rundll32.exe <name_of_dll>.dll,Start

The status of your requests can be seen below. If you have problems with your Installation Files downloading, please contact your affiliate manager.

Date requested	Affiliate ID	Tracking ID	Detailed
2008-04-11 19:28:27	152459		Download installation files
2008-04-12 23:26:14	152510		Download installation files
2008-04-08 16:57:15	152356		Download installation files
2008-04-08 09:07:17	152304		Download installation files
2008-04-08 05:10:13	152302		Download installation files

Exposing the Pay Per Install (PPI) Underground Market Fraudulent and Rogue Business Model - A Photos Compilation (2022-01-20 10:40)

[1]

Dear blog readers,

I’ve decided to share with everyone a photos compilation which I obtained and actually collected back in 2008 using Technical Collection for the purtpose of demonstrating the basics of the pay per install fraudulent anda rogue underground market business model with the idea to improve’s situational awareness in the field of researching the pay per install underground business model.

Sample Pay Per Install Rogue and Fraudulent Underground Market Business Model Photos

Compilation Photos:

Дорогой Партнер!

Спасибо за то, что был с нами в 2008 году.

Разреши от чистого сердца и всей команды ГлавМеда поздравить тебя с Новым 2009 Годом!

Как бы не сгущались краски в мире, мы уверены, что Бабло и Труд - все перетрут.

Надеемся, что наши небольшие сувениры поднимут тебе настроение и станут символо новых возможностей в Новом 2009 году!

Ура!

Бабло - ДА!
Кризис - *уй!

My Participation in GCHQ’s Top Secret "Lovely Horse" Program to Monitor Hackers Online - An Elaboration (2022-01-22 20:57)

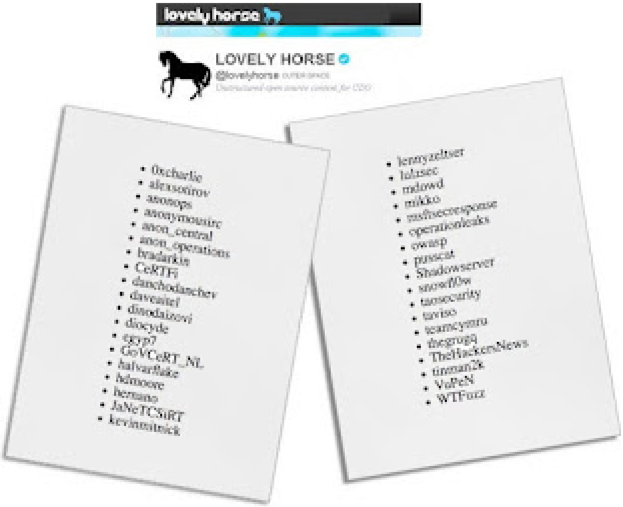
[1]

Dear blog readers,

Did you know that you can actually find me in [2]Snowden’s archive by simply searching for

my name where it will eventually lead you to a GCHQ Top Secret lawful surveillance program

to monitor hackers online in specific their Twitter accounts?



lovely horse

Profiling the Blood and Honor Online Hate Group - An OSINT Analysis (2022-01-22 20:57)

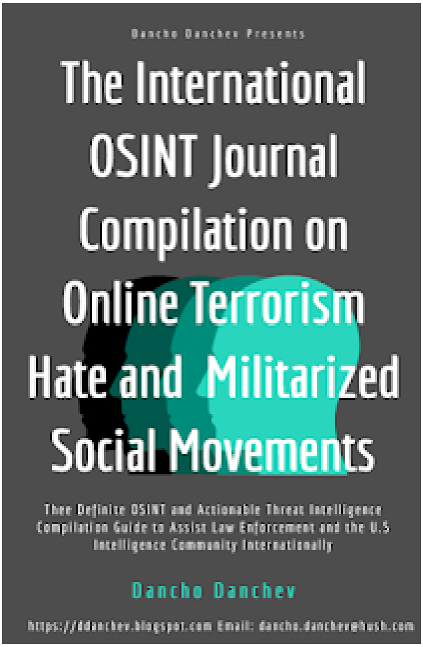
[1]

As it’s been a while since I’ve last posted a quality update I wanted to take the time and effort

and elaborate more on a current project of mine which is the " *International OSINT Journal*

Compilation on Online Terrorism Hate and Militarized Social Movements" which aims to expose

11465



Dancho Danchev Presents

The International OSINT Journal Compilation on Online Terrorism Hate and Militarized Social Movements

Thee Definite OSINT and Actionable Threat Intelligence Compilation Guide to Assist Law Enforcement and the U.S Intelligence Community Internationally

Dancho Danchev

https://ddanchev.blogspot.com Email: dancho.danchev@hush.com and offer a massive information on currently active online terrorism hate and militarized social

movements including actionable information on their online infrastructure.

[2]

In this post I'll elaborate more and offer actionable intelligence on the online infrastructure of

the Blood and Honor hate group with the idea to help you get a better perspective of their

online infrastructure and possibly assist you in your cyber campaign attribution efforts.

Training

Today!

(2022-01-22 21:10)

[1]

Folks,

Who’s been following my work on this blog since December, 2005?

Are you interested

in OSINT training?

One-on-one or one-to-many sessions?

Drop me a line today at dancho.danchev@hush.com on behalf of you or your organization or team and let’s help you take

your team and organization to the next level.

Sample portfolio of services which I’m currently offering can be also seen here -

[2]https://disruptive-individuals.com including a copy of my [3]CV here including the following

two sample of my work [4]here and [5]here.

Check out some sample chapters from a free book on cyber attribution that I’m currently working on to get a better idea of what I have in mind including my style and methodology:

[6]

[7]

Exposing the Internet-Connected Infrastructure of the REvil Ransomware Gang - An In-Depth OSINT Analysis (2022-01-24 04:29)

[1]

Dear blog readers,

In this post I've decided to do an in-depth OSINT analysis on the recently busted REvil ransomware

gang and decided to elaborate more and emphasize on the key fact in specific how

come that a single ransomware group with several publicly accessible and easy to shut down

C &C (command and control) server domains including several randomly generated Dark Web

Onion URLs could easily result in millions of damage and who really remembers a situation

when getting paid for getting hacked including the basic principle that you should never interact

with cybercriminals but instead should passively and proactively monitor them could

result in today's modern and unspoken ransomware growth epidemic and the rise of wrong

buzz words as for instance ransomware-as-a-corporation where you basically have the bad

guys obtain initial access to an organization's network and then hold its information encryption

leading us to the logical conclusion who on Earth would pay millions of dollars to avoid

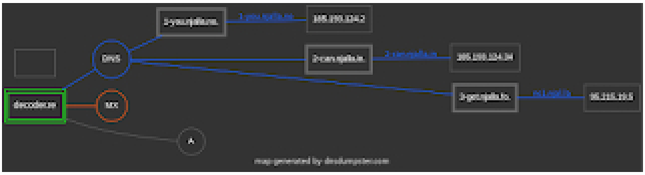
possible bad reputation damage including to fuel growth into a rogue and fraudulent scheme

as as for instance the encryption of sensitive company information and leaking it to the public

in exchange for financial rewards.

[2]

11474



Sample REvil ransomware gang publicly accessible C &C (command and control) servers include:

hxxp://decoder[.]re

hxxp://decryptor[.]cc - 136[.]243[.]214[.]30; 45[.]138[.]74[.]27

hxxp://decryptor[.]top

Related name servers known to have been used in the campaign include:

(2022-01-24 10:43)

This presentation aims to detail Dancho Danchev's perspective into gathering threat intelligence processing it and enriching and disseminating it to users vendors and organizations globally heavily relying on a threat intelligence "rock star" model and methodology where the ultimate goal for this case study would be to take down Iran-based hackers and hacking groups and their entire online operations and attempt to shut them down and take them offline citing possible malicious use and actual abuse of international Internet laws and regulations and ultimatetely attempt to make an impact in terms of tracking them down and offering never-published and discussed personally identifiable information on their whereabouts and malicious online activities.

Exposing a Portfolio of Pay Per Install Rogue and Fraudulent and Malicious Affiliate Network Domains - An OSINT Analysis (2022-01-24 11:02)

[1]

Dear blog readers,

11477

I’ve decided to share with everyone an in-depth historical OSINT analysis on some of the primary pay per install rogue fraudulent and malicious affiliate network based rogue and fraudulent revenue sharing scheme operating malicious software gangs that are known to have been active back in 2008 with the idea to assist everyone in their cyber campaign attribution efforts.

Sample portfolio of pay per install rogue fraudulent and malicious affiliate network domains known to have been in operation in 2008 include:

Who Wants to Support My Work Commercially? (2022-01-25 12:39)

[1]

Folks,

Who wants to dive deep into some of my latest commercially available research and stay on

the top of their OSINT/cybercrime research and threat intelligence gathering game that also

includes their team and organization?

Check out my latest project [2]here where I’m currently doing my best to guarantee and deliver

approximately 12 unique articles and OSINT research and analysis on a daily basis including

the following currently active portfolio of research which I made available online exclusively for

commercial purposes and to further empower you and your team and organization:

- A Compilation of Currently Active and Related Scams Scammer Email Addresses – An OSINT Analysis
- A Compilation of Currently Active Cyber Jihad Themed Personal Email Addresses – An OSINT Analysis
- A Compilation of Currently Active Full Offline Copies of Cybercrime-Friendly Forum Communities – Direct Technical Collection Download -[RAR]
- A Compilation of Personally Identifiable Information on Various Iran-based Hacker Groups and Lone Hacker Teams – Direct Technical Collection Download – [RAR]
- A Koobface Botnet Themed Infographic Courtesy of my Keynote at CyberCamp – A Photo
- Advanced Bulletproof Malicious Infrastructure Investigation – WhoisXML API Analysis
- Advanced Mapping and Reconnaissance of Botnet Command and Control Infrastructure using Hostinger's Legitimate Infrastructure – WhoisXML API Analysis
- Advanced Mapping and Reconnaissance of the Emotet Botnet – WhoisXML API Analysis
- Assessing The Computer Network Operation (CNO) Capabilities of the Islamic Republic of Iran – Free Research Report
- Astalavista Security Newsletter - 2003-2006 - Full Offline Reading Copy

- Compilations of Personally Identifiable Information Including XMPP/ Jabber and Personal

Emails Belonging to Cybercriminals and Malicious Threat Actors Internationally – An OSINT

Analysis

Exposing a Currently Active List of Iran-Based Hacker and Hacker Team's Handles - An OSINT Analysis - Part Two (2022-01-26 12:45)

Profiling Russia's U.S Election Interference 2016 - An OSINT

Analysis (2022-01-26 16:00)

[1]

Note: This OSINT analysis has been originally published at my current employer's Web site -

[2]https://whoisxmlapi.com where I'm currently acting as a DNS Threat Researcher since January, 2021.

We've decided to take a closer look at the U.S Elecetion 2016 interference provoked by several spear phishing and malicious campaigns courtesy of Russia for the purpose of offering and providing actionable threat intelligence including possible attribution clues for some of the known participants in this campaign potentially assisting fellow researchers and Law Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns.

In this analysis we'll take a closer look at the Internet connected infrastructure behind the U.S Election 2016 campaign in terms of malicious activity and offer practical and relevant including actionable threat intelligence on their whereabouts.

Exposing a Currently Active Domain Portfolio Managed and Operated by Members of the Ashiyane Digital Security Team - An OSINT Analysis (2022-01-26 16:00)

[1]

Note: This OSINT analysis has been originally published at my current employer's Web site - [2]https://whoisxmlapi.com where I'm currently acting as a DNS Threat Researcher since January, 2021. We've decided to take a closer look at the current and historical domain portfolio managed and operated by members of Iran's Ashiyane Digital Security Team using Maltego in combination with WhoisXML API's integration for the purpose of providing actionable threat intelligence including to assist fellow researchers vendors and organization on their way to track down and monitor the Internet connected infrastructure of key members of Iran's Ashiyane Digital Security Team for the purpose of monitoring it and attempting to take it offline.

In this article we'll provide actionable intelligence on some of the currently active domains managed run and operated by Iran's Ashiyane Digital Security Team with the idea to assist fellow researchers vendors and organizations on their way to track down and monitor the infrastructure managed run and operated by Iran's Ashiyane Digital Security Team.

A list of currently active domain portfolio known to be managed and operated by members of

Exposing a Currently Active Free Rogue VPN Domains Portfolio Courtesy of the NSA -

An OSINT Analysis (2022-01-26 16:00)

[1]

Note: This OSINT analysis has been originally published at my current employer's Web site -

[2]https://whoisxmlapi.com where I'm currently acting as a DNS Threat Researcher since

January, 2021.

We've recently came across to a currently active free VPN domains portfolio which based on

ourn research and publicly accessible sources appears to be run and operated by the NSA

where the ultimate goal would be to trick users into using these rogue and bogus free VPN

service providers in particular Iran-based users where the ultimate goal would be to monitor an eavesdrop on their Internet activities and we've decided to take a deeper look inside the Internet-connected infrastructure of these domains and offer practical and relevant threat intelligence and cyber attack attribution details on the true origins of the campaign.

In this case study we'll offer practical and relevant technical information on the Internet-connected infrastructure of this campaign with the idea to assist the security community on its way to track down and monitor this campaign including to offer actual cyber attack and cyber campaign attribution clues which could come handy to a security researcher or a threat intelligence analyst on their way to track down and monitor the campaign.

Exposing a Currently Active List of Iran-Based Hacker and Hacker Team's Handles -

An OSINT Analysis (2022-01-26 16:00)

[1]

Dear blog readers,

I've decided to share with everyone a currently active list of Iran-based hacker and hacker

team's handles which could greatly assist in possible cyber attack attribution campaigns in-

cluding cyber threat actor attribution campaigns.

Sample currently active Iran-based hacker and hacker team's handles currently used in mas-

sive or targeted Web site defacement campaigns:

Exposing FBI’s Most Wanted Iran’s Mabna Hackers - An OSINT Analysis

(2022-01-26 16:01)

[1]

Dear blog readers,

In this post I've decided to share actionable intelligence on the online infrastructure of FBI's

Most Wanted Iran's Mabna Hackers for the purpose of assisting everyone in their cyber attack

and cyber threat actor attribution campaigns.

Exposing Behrooz Kamalian’s Ashiyane ICT Company - An OSINT Analysis

(2022-01-26 16:01)

[1]

Dear blog readers,

I’ve decided to share with everyone some practical and actionable threat intelligence information regarding members of the Ashiyane Digital Security Team also known as Behrooz Kamalian’s Ashiyane ICT Company for the purpose of assisting everyone in their cyber attack and cyber attack attribution campaigns.

Name: Behrooz Kamalian

Postal address:

Tajrish Sq, Fana Khosro St,Amir Salam Alley,No 22, Ashiyane ICT Company

Phone number: 22727284-5

Fax number: 22727283

email: nima.salehi@yahoo.com

Technical Handle: nic36928h37

Name: Behrooz Kamalian

email: nima.salehi@yahoo.com

Domain Name: ashiyane.ir

Legal Holder: Behrooz Kamalian

Postal address:

Unit 28, Floor Seven, 36 Building , Daneshvar alley, Jamalzadeh St. , Enghelab Sq.

Tehran, IR

1336925748

Phone number: +98.2166935551

11544

Profiling the Emotet Botnet C&C Infrastructure - An OSINT Analysis (2022-01-26 16:01)

[1]

Dear blog readers,

I've decided to share a recently obtained Emotet botnet C &C server IPs for the purpose of

empowering everyone with the necessary technical information on their way to track down

and monitor the botnet including to possibly assist and help where necessary in terms of cyber

attack campaign attribution including cyber threat actor attribution campaigns.

Sample currently active Emotet botnet C &C server IPs:

hxxp://109[.]123[.]78[.]10

hxxp://66[.]54[.]51[.]172

hxxp://108[.]161[.]128[.]103

Exposing a Currently Active "Jabber ZeuS" also known as "Aqua ZeuS" Gang Personal

Email Portfolio - An OSINT Analysis (2022-01-26 16:01)

[1]

Note: This OSINT analysis has been originally published at my current employer's Web site -

[2]https://whoisxmlapi.com where I'm currently acting as a DNS Threat Researcher since

January, 2021.

Dear blog readers,

I've decided to share a recently obtained portfolio of personal emails belonging to the "Jabber

ZeuS" also known as "Aqua ZeuS" gang members with the idea to assist everyone on their way

to track down and monitor the botnet masters behind the botnet including to assist in possible

cyber attack campaign attribution including possible cyber threat actor attribution campaigns.

Sample personal emails known to have been currently in use by the "Jabber ZeuS" also known

as "Aqua ZeuS" gang:

Profiling the Liberty Front Press Network Online - An OSINT Analysis (2022-01-26 16:01)

[1]

Note: This OSINT analysis has been originally published at my current employer's Web site -

[2]https://whoisxmlapi.com where I'm currently acting as a DNS Threat Researcher since Jan-

uary, 2021.

We've decided to take a closer look at the Internet-connected infrastructure of the Liberty

Front Press Network part of a recent takedown and domain seizure part of an ongoing law

enforcement operation fighting online propaganda online and to offer practical and relevant

including actionable intelligence on the Internet-connected infrastructure behind the Liberty

Front Press Network including the individuals behind it.

In this analysis we'll take a closer look inside the Internet-connected infrastructure behind the

Liberty Front Press Network and offer practical and relevant information including actionable

intelligence on its Internet-connected infrastructure including the individuals behind it. Sample

screenshot of various related domain name registrations using WhoisXML API's and Maltego's

Integration

Profiling Yaroslav Vasinskyi from the Kaseya Ransomware Attack Campaign - An OSINT Analysis (2022-01-26 23:28)

[1]

It appears that the U.S Justice Department has recently made arrests in the [2]Kaseya ransomware dropping campaign and I've decided to dig a little bit deeper and actually offer and provide the necessary actionable intelligence in the context of exposing the individuals behind these campaigns in the context of assisting U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns.

Sample personally identifiable information on Yaroslav Vasinskyi:

Mobile: +380993082660

Phone: 1-800-225-5324 which is actually the phone number of the FBI

Personal email address accounts: yarik45@gmail[.]com, yaroslav2468@mail[.]ru

Online handles: Yarik45, Yaroslav2468

ICQ: 635995970

including the following Web site which is he known to have been offering around various

cybercrime-friendly forum communities as a template - hxxp://wholesale-dress[.]net which is

11568

currently owned and managed by hxxp://counterfeittechnology[.]com including the following

domains known to have been registered by the same individual that registered the original

domain:

Exposing a Currently Active CoolWebSearch Domains Portfolio - An OSINT Analysis

(2022-01-26 23:29)

[1]

Dear blog readers,

I’ve decided to share with everyone a currently active portfolio of rogue and malicious CoolWeb-

Search IPs with the idea to help everyone in their cyber attack attribution campaign including

cyber threat actor attribution campaigns.

Sample currently active rogue and malicious CoolWebSearch domains portfolio:

Exposing a Currently Active CoolWebSearch Rogue and Malicious Domains Portfolio -

Part Two – An OSINT Analysis (2022-01-28 04:07)

[1]

Dear blog readers,

I’ve decided to share with everyone yet another batch of currently active rogue and malicious

CoolWebSearch domains with the idea to assist everyone in their cyber attack attribution campaigns including cyber threat actor attribution campaigns.

Sample currently active rogue and malicious CoolWebSearch domains portfolio:

Profiling a Currently Active Personal Email Address Portfolio of Members of Iran's

Ashiyane Digital Security Team - An OSINT Analysis (2022-01-28

04:09)

[1]

Dear blog readers,

I’ve decided to share with everyone a currently active personal email portfolio belonging to members of Iran’s Ashiyane Digital Security Team with the idea to assist everyone in their cyber attack or cyber threat actor attribution campaigns.

Sample currently active personal emails known to belong to members of Iran’s Ashiyane Digital Security Team:

Dear blog readers,

I’ve decided to share with everyone yet another batch of currently active rogue and malicious CoolWebSearch domains with the idea to assist everyone in their cyber attack attribution campaigns including cyber threat actor attribution campaigns[.]

Sample currently active rogue and malicious CoolWebSearch domains portfolio:

Dear blog readers,

I've decided to share with everyone a currently active portfolio of RATs (Remote Access Tools)

and trojan horses C &C (Command and Control) communication channels including actual cur-

rently active names of RATs (Remote Access Tools) and trojan horses wit the idea to assist

everyone in their cyber attack and cyber attribution campaigns where the C &C (Command

and Control) communications channels which I'll share exclusive rely and use static and dy-

namic DNS and IP providers for the actual C &C infrastructure which is a common TTP (Tactics

Techniques and Procedures) for this type of malicious software releases.

Sample RATs (Remote Access Tools) and trojan horses names currently in circulation in 2021

include:

Casa RAT

Back Orifice

Bandook RAT

Dark Comet Rat

Cerberus

Cybergate

Blackshades

Poison Ivy

Profing FBI’s Most Wanted Cybercriminal Mujtaba Raza from Forwarderz and Second-Eye Solution - An OSINT Analysis (2022-01-28 04:50)

[1]

In this post I’ve decided to offer in-depth and practical and relevant OSINT analysis of FBI’s Most Wanted Cybercriminal [2]Mujtaba Raza from the Forwarderz and SecondEye Solution fake documents and IDs selling Pakistan-based rogue fraudulent and malicious online enterprise with the idea to assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns.

Paypal Documents

we can provide documents for your PayPal Account but we do not provide any kind of guarantee of acceptance because there are many other reasons behind your account limitations. According to our case study, PayPal also limit all those suspicious accounts even you provide them with your genuine or real documents.

Documents are provided as an initiative for PayPal so that they look in to your case and decide to restore it or permanent limit it after manual reviewing your transactions, your purchases, your charge back, refunds, age and many other factors.

If PayPal find some irregularity in Documents then they will not go further in to your case and ask you to provide "Legit Documents" and in this case you can ask us to issue refund else no refund will be issued for any other reasons.

Note: You will get your order in JPEG image format (Scanned or snapshot). No Shipment of documents included.

Toll Free Support: 1-888-709-5348

DO NOT TRY TO MANUALLY REMOVE THE VIRUS,
HARD-DISK FAILURE MAY OCCUR

Dear blog readers,

I’ve decided to share with everyone a currently active portfolio of fake and rogue fake tech

support scam domains with the idea to assist everyone in their cyber attack attribution efforts.

Sample rogue fraudulent and malicious tech support scam domains include:

The Evolution of Encrypted IM Messenging Platforms - The Rise and Future of the OMEMO Protocol - An Analysis (2022-01-28 06:14)

[1]

Dear blog readers,

I’ve decided to share with everyone an article that I’ve been recently working on namely the rise of the OMEMO real-time Jabber/XMPP encryption protocol and also discuss in-depth the security risks involved in OMEMO type of communications including to offer practical security and privacy recommendation advice which I originally wrote for my ex-employer [2]Armadillo Phone.

In a modern and vibrant secure and encrypted mobile device ecosystem facing various hardware and physical security type of threats including the general rise of insecure WiFi hotspots and various other factors including the rise of various nation-state and rogue and malicious advanced persistent threat type of malicious and fraudulent campaigns a new protocol has recently emerged called OMEMO basically limiting the burden of online ID verification mechanisms and adding a new set of privacy and security enhancing features to modern instant messaging applications making it hard potentially virtually impossible for a malicious attacker to eavesdrop and intercept an OMEMO user’s personal private including sensitive and personally identifiable information further aiming to commit financial fraud and launch a variety of social engineering campaigns aimed at targeting the victim’s address book and the confidentiality availability and integrity of their devices further exposing the mobile device to a multi-tude of malicious and fraudulent software and rogue and malicious campaigns.

Protocol Introduction

What exactly is OMEMO? Long story short it’s an OTR and OpenPGP-based communication protocol that actually has a lot of new improvements in terms of privacy and security including interoperability between multiple IM clients and mobile applications courtesy of different vendors. Compared to OTR (Off-the-Record) which basically allows single-user type of secure and encrypted communication the OMEMO protocol actually allows multi-user type of data and information exchange further strengthening the protocol’s position on the market for secure mobile IM (instant messaging) applications.

Basic OTR Protocol Overview in the context of the global growing cybercrime trend

Throughout the years Jabber's OTR (Off-the-Record) plugin and feature quickly became the de-facto communication channel for a huge portion of Eastern European and Russia-based cybercriminals looking for ways to properly offer and present their cybercrime-friendly services including to actively communicate with each other for the purpose of managing and launching cybercrime-friendly online communities including to actually offer a newly launched cybercrime-friendly service or a tool and actually reach out to current and potential customers in a secure fashion. It should be worth pointing out over 98 % of Russian and Eastern European cybercrime-friendly propositions actively rely on the use of public and private proprietary Jabber-based servers and active OTR (Off-the-Record) type of communications. How does the process work in terms of Russian and Eastern European cybercrime gangs and groups? Pretty simple. Basically the cybercriminal in question would either use a custom-made and set up proprietary Jabber-server or a publicly accessible one in combination with a popular off-the-shelf or proprietary offshore VPN service provider to actually attempt to hide the actual metadata from law enforcement and would then include the actual contact details in terms of user ID within the actual cybercrime-friendly proposition which on the majority of occasions is a newly launched stolen and compromised credit card shop or a newly launched cybercrime-friendly service aiming to assist novice or experienced cybercriminals on their way to commit financial fraud online.

The following mobile device IM clients are known be currently compatible with the OMEMO secure and privacy-enhancing protocol:

- BeagleIM
- ChatSecure
- Conversations
- Cryptocat
- Dino
- Gajim
- Psi
- Adium
- Profanity
- SiskinIM

Possible Threat Modelling Scenarios

It should be worth pointing out that on the vast majority of occasions the majority of IM-based encryption protocols are perfectly suited to respond and actually protect against a large portion of modern eavesdropping and surveillance campaigns. It should be also noted that a direct compromise of the actual mobile device or a device in question might be successfully acting as the "weakest link" in the entire secure and privacy-conscious communication chain

including the actual impersonation attacks launched against a specific participant in the actual

communication next to good old fashioned social engineering type of campaigns.

Possible physical security and network-based attack scenarios:

- physical device compromise

A possible device compromise through device stealing or actually obtaining a physical copy of

the device for digital forensic examination by third-parties. Users interested in protecting their

personal including sensitive IM communication should definitely look into using time-expiring

messages with a short period of time and actually take advantage of Armadillo Phone's built-

in advanced physical protection features including the availability of anti-theft token and NRC

11979

Shadowcrew

physical authentication card including heavy reliance on off-the-shelf and heavily modified going beyond industry-standards implementation of popular encryption ciphers.

- network communication provider compromise

Among the key factors to consider when attempting to actually launch an encrypted IM conver-

sation with a colleague or a friend including possible third-party that also includes a journalist

or a free speech writer is to ensure that the network infrastructure provider has taken all the

necessary measures to protect its network from external and internal cyber attacks including

plain simple social engineering attempts and active network-based reconnaissance and actual

network-based infrastructure compromise. A possible attack surface mitigation scenario here

would be the use of a vendor-specific VPN (Virtual Private Network) further ensuring that the

actual metadata including actual traffic obfuscation will prevent possible man-in-the-middle

attacks launched through the use of insecure WiFi hotspots or the actual GSM-based 3G/4G/5G

type of network connectivity infrastructure.

The Armadillo Phone has a built-in VPN (Virtual Private Network) service built-in which is free

of charge and can heavily assist in possible network-based metadata obfuscation including

actual network-traffic obfuscation making it harder for a malicious attacker including rogue

actors to actually attempt to launch a possible eavesdropping or active traffic interception or

surveillance campaign.

A rather practical and often neglected privacy-conscious advice would be to periodically verify the actual participant’s fingerprint by asking a very specific question that only he knows the answer to.

Stay tuned!

Exposing A Portfolio of Shadow Crew Cybercrime-Friendly Forum Communities IP Addresses - An OSINT Analysis (2022-01-28 06:16)

[1]

Dear blog readers,

11980

I’ve decided to share with everyone a currently active portfolio of IM screen names from the infamous Shadow Crew cybercrime-friendly forum community part of a currently ongoing Technical Collection campaign for the purpose of assisting everyone in their cyber attack and cyber threat actor profiling campaigns.

Sample Shadow Crew cybercrime-friendly forum community IP addresses accounts:

Exposing A Portfolio of Shadow Crew Cybercrime-Friendly Forum Communities Personal Email Address Accounts - An OSINT Analysis (2022-01-28 06:17)

[1]

Dear blog readers,

I’ve decided to share with everyone a currently active portfolio of IM screen names from the infamous Shadow Crew cybercrime-friendly forum community part of a currently ongoing Technical Collection campaign for the purpose of assisting everyone in their cyber attack and cyber threat actor profiling campaigns.

Sample Shadow Crew cybercrime-friendly forum community personal email address accounts:

shadow@shadowcrew[.]com

Who is Dancho Danchev? (2022-02-04 15:09)

Folks,

Do you remember who I am? Do you need to do a historical check on the security industry

including me as an individual including my personal blog and all the socially-oriented work and

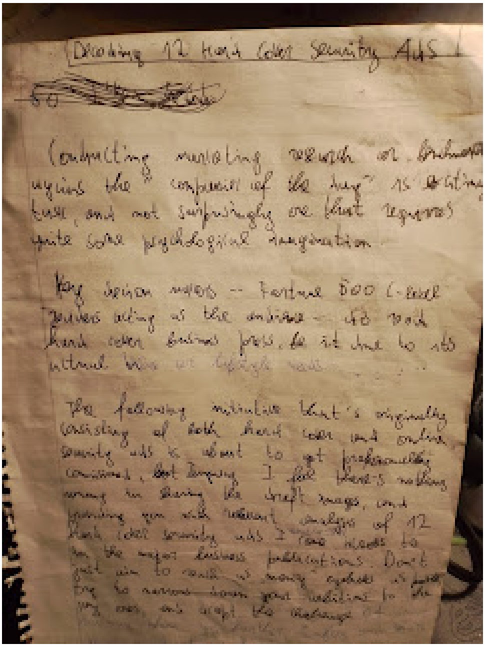
contributors that I’ve made to the industry during the past ten years? If an image is worth a

thousand words consider going through these images which I just found and took photos of

and guess what - brace yourselves for the ultimate reality where I’ve officially spend over two

decades actively working and researching the security industry.

12118



What’s my idea to publish these images? My personal goal and motivation is to make it clear

and to ensure that my readers truly know what I’ve been up to in terms of challenges and all

the hard work that I’ve done and achieved over the past twenty years in the security industry

when I was basically a teenage hacker enthusiast that many folks and friends remember from

back in the 90’s.

Grab a copy of these images and keep them just in case they vanish somewhere or just in case

and always remember to say "hi" or "keep up the good work" in a personal message or using

email. It will be greatly appreciated. Don’t forget - "[1]The Best is Yet to Come".

Public STIX STIX2 TAXII Threat Actor Specific Threat Intelligence Feed - Your Lifetime API Key! (2022-02-17 11:03)

[1]

Hi, everyone,

This is Dancho. Big news! I've decided to make approximately 15 years of active and unique

threat actor specific research publicly accessible online for free using the OpenCTI STIX STIX2

TAXII platform and not only convert all the cool and juicy and full of never-published and discussed before niche threat actors both internationally and in Russia but also make them into

a free STIX STIX2 TAXII threat intelligence feed and turn them into a machine readable format

with the idea to centralize and speed up the communication of my research and potentially allow you to better catch up improve your situational awareness and learn new things about the

international bad guys including the bad guys in Russia including their Internet infrastructure

and catch up with who they are and what are some of their latest campaigns in the world of

fighting cybercrime.

Your Lifetime API Key: f8aa0cca-a0ac-4eff-9c03-1c86ad7aee93

Users of [2]Anomali ThreatStream, [3]LogRhythm, [4]Palo Alto MineMeld, [5]TruSTAR TAXII

Server including [6]Trend Micro Vision One or [7]Cortex XSOAR and basically anyone using STIX

STIX2 and TAXII in their security solution can now freely grab and explore my historical threat

actor specific research including to actually pull some of my latest research which I produce

every day for free.

Here are the details:

Portal: [8]https://ddanchev.ngrok.io

API: [9]https://ddanchev.ngrok.io/graphql

API Documentation: [10]https://luatix.notion.site/GraphQL-API-cfe267386c66492eb73924ef059d6d59

How To Integrate or Query My Public STIX STIX2 TAXII Threat Actor Specific Threat Intelligence Feed In Your Firewall or Security Solution - An Analysis (2022-02-20 17:02)

[1]

Dear blog readers,

Did you already pull my public and free STIX STIX2 TAXII threat intelligence feed using your

and your organization’s [2]Lifetime API Key?

12164

In this post I’ve decided to elaborate more and offer practical advice and links in terms of how

you can pull and integrate my daily updated STIX STIX2 TAXII threat intelligence feed in your

firewall or security solution and how you can actually use your Lifetime API Key for my feed in

Maltego for possible enrichment of your IoCs (Indicators of Compromise).

Here’s your Lifetime API Key for you and your organization -

f8aa0cca-a0ac-4eff-9c03-1c86ad7aee93
